Unfavorable Publicity Postpones Plan of Surgeons to Separate Two 17-Year-Old Girls, Joined at Birth

NEW YORK, Aug. 16.—The proposed operation to separate Mary and Margaret Gibb, 17-year-old "Siamese twins," has been indefinitely postponed due to unfavorable publicity.

Dr. Francis P. Weston, New York surgeon who had charge of the case, said he has removed them from the private hospital where they were admitted a week ago. Excitement caused by sensational publicity he said, had made them and their parents very nervous and while they will be kept under observation there will be no operation until all publicity has ceased. Laboratory tests will continue to ascertain the functions of their organs.

A local tabloid newspaper had been publishing articles signed by the twins purporting to give their reactions to the impending operation. Confidential hospital reports also were published which the hospital authorities said were spurious from the institution without their knowledge.

Dr. Weston did not reveal where the twins were taken. Their home is in Holyoke, Mass.
