NEW STEEL FOR JAIL FRONT IS BEING INSTALLED

New steel for the county jail front arrived today and is being installed under the direction of Wm. Bartlett, representing the Southern Prison company. The steel used in the original installation proved to be too soft and was rejected following the test ordered by the prison company. The new steel, however, is as much harder than the sample as the sample was harder than the original steel. The company submitted, in making their bid, a section of steel bar with the agreement that the bars should be of equal hardness. The steel, however, for some reason failed to meet the test, and so is being replaced by bars that are considerably above the specifications.

The same mechanics who sawed their way out of the original cage, made their tests on four of the new bars, selected at random, and succeeded only in wrecking a set of their most expensive hacksaw blades without doing more than scratch the surface of the bars.

The jail company, in addition to sending bars for the jail front sent also new steel for the grating above the front, and ordered that these grates be tested and replaced if found below specifications. The test was made, but it was found that the steel in the grates was better than specified and, therefore, no replacement is necessary.

The work of replacing the front is already well underway and will be completed this week, it is expected, so that the concrete floor can be poured the first of next week. The windows are being put in and the heating unit completed, so that the jail will be ready for use within the next 10 days or two weeks, according to the present outlook.

"I use Associated Ethyl"

says H. D. INNIS, *of Bend*—"because it makes my motor run very smoothly"

This motorist of Bend, Oregon, states that regular gasolines he had used developed a carbon knock in the motor of his Chrysler "72." He has put 14,000 miles on his car and for the past year has used Associated Ethyl Gasoline.

"The motor is in excellent shape today," he jubilantly writes; "and I have never had any valve trouble whatsoever, and in fact I have never had any work done on the motor. I expect to use Associated Ethyl Gasoline as long as it is available."

Associated Ethyl Gasoline increases power by putting carbon to work. It gives stronger, smoother engine action, less shifting, quicker pick-up and knock-less performance. This super-fuel reduces operating costs and lengthens your motor's life.

Drive in at any red, green and cream station and fill up with Associated Ethyl Gasoline.
