LOWER RATES ON LIVESTOCK URGED IN WESTERN AREA

(Associated Press Local Wire)
WASHINGTON, May 17.—A revision of railroad freight rates on livestock in western territory which would involve some general but slight increases was recommended today to the Interstate Commerce commission by agents who have completed an investigation into existing schedules.
C. E. Stiles and A. S. Parker, commission examiners, after a preliminary study, suggested a series of mileage scales in western territory to govern the making of new rates, and indicated the scales would increase railroad earnings. The commission assigned the report for oral argument here July 10.
"Livestock in much of the western district is not at present bearing its fair share of the transportation burden of its new scales," the report said. "Under the rate levels herein recommended it will do no more than meet these minimum requirements. Taken as rate levels, we believe the scales recommended will be fair both to shippers and carriers."
Under the distance scale suggested by the report, shipments of cattle and hogs in double deck cars would be charged for at the rate of 11 cents per hundred pounds for distances of 10 miles; 42 cents per hundred pounds for distances of 200 miles; 62 cents for distances of 1,000 miles; \$1.02 for distances of 2,000 miles; and \$1.22 for distances of 2,500 miles; single deck shipments of calves and hogs would be charged 12 1/2 cents per hundred pounds for distances of 10 miles; 18 1/2 cents for 500 miles; 7 1/2 cents for 1,000 miles; 9 1/2 cents for 1,500 miles; and \$1.04 for 2,500 miles.
Proportionate amounts were recommended for intervening distances in all of the scales, and, in addition, additional scales of arbitrary differentials to be added were laid down. For application in mountain and Pacific territory a slightly higher schedule of cattle rates was suggested than the mileage scale given.
