

SEVEN DOUGLAS STUDENTS TO GRADUATE THIS YEAR AT OREGON STATE AGRICULTURAL COLLEGE

Graduates Will Receive Degrees From Six of the Ten Different Degree Granting Schools of the Institution—All Local Students Have Been Active on the Campus.

OREGON STATE COLLEGE, Corvallis, May 31.—Roseburg and nearby communities are represented by seven of the 534 graduates of the class of 1929 completing work for degrees at the sixteenth annual commencement June 3. Of the total number being graduated, 439 will receive the bachelor of science degree, 22 the master of science degree, and 23 the degree of pharmaceutical chemist.

Men outnumber women in the graduating class 336 to 198, though the latter are scattered among seven of the 19 degree granting schools of the college. To get the bachelor of science degree, here students must not only complete four years of studies but must maintain an average grade of 80 or above. The result is that those in the graduating class are only those who have survived a four year "weeding out" process that has eliminated the less determined students.

Adolf A. Young is receiving a degree of Ph. D. in pharmacy from one of the strongest schools in this field in the west. The school includes a model drug store, the first of its kind established in the United States, which serves as a laboratory for actual drug store problems. Every one of the 19 graduates this year had to take the state pharmacy examination as part of his final training, and success in it is a prerequisite for any of 44 states without further tests. Many of the graduates of this school go on into the medical profession, become commercial chemists or become drug inspectors or analysts or enter related fields.

Clair Fields Taylor chose the electrical engineering course when he enrolled, and he is now one of the 116 graduates in his class. This school trains men in civil, electrical and mechanical engineering and industrial arts. His training has led directly to the various fields of public work involved in the future development of the country, especially the Pacific northwest. The curriculum he followed was developed according to the standards of the national engineering societies, the first two years of which are devoted to basic courses and the last two to more specialized applications. Many graduates this year were selected for advanced work and training with some of the leading corporations of the east.

Home economics is the one school in which no man majors, hence the 56 graduates this year of which Bertha Kohlhaugen is one, are all co-eds. Two main curricula are open to students in this school, one leading to commercial pursuits or teaching, and the other to home-making and general citizenship. Miss Kohlhaugen has been working in home-level administration, foods, nutrition, home economics education, clothing and textiles, and institutional economics in addition to the liberal studies afforded in other schools of the college. At 75 per cent of the young women of the United States are married before they are 30, considerable emphasis is placed on training for home-making career.

In addition to the regular class work Miss Kohlhaugen has also been active in campus affairs, having been a member of the Omicron Nu, national honorary fraternity in

home economics, greater Oregon State committee, Women's Athletics association, Minor "O," and basketball, baseball, archery and hockey teams.

John A. Irving is one of 44 graduates this year in agriculture, one of the 16 degree granting schools of the college. Many agricultural graduates continue in advanced work and later enter research work, become extension specialists, marketing specialists, enter 4-H club work or agricultural teaching. Reduction of agricultural registration all over the country following the farm depression of the last decade has left the supply of trained agricultural students below the demand in this broad field.

Irving has also been active in campus affairs, having been president of the 4-H club, and a member of Cosmopolitan, Agricultural and Withycombe clubs. John was lieutenant in the reserve officers training corps and also a member of the stock judging team.

The school of vocational education, in which Thelma E. Smith and Marie Lane and 67 others are receiving degrees this year, is what its name implies—a place for training teachers for positions in high schools, normal schools and colleges, with special emphasis on the specialized fields of commerce, home economics, industrial arts, manual training, agricultural and the like. The work of such departments as art, sciences, mathematics and physical education is so correlated that graduates in vocational education are prepared to handle combinations of technical and related subjects. Misses Smith and Lane have had opportunity to receive training also in vocational guidance, a field in which Oregon State is now the recognized leader in the west.

Miss Smith, in addition to her college work, has been in various activities while in college. She was a member of the Phi Kappa Phi, national scholastic fraternity for

Douglas County Graduates from Oregon State Agricultural College: Upper row, left to right, Marie Lane, Bertha Kohlhaugen, Thelma Smith. Lower row, John Sinniger, Adelbert Young, John Irving, Clair Taylor.

men and women, Omicron Nu, national honorary fraternity in home economics, and Y. W. C. A. cabinet. She was also on the educational exposition and Mother's week and committees.

Miss Lane has also been on various committees and clubs during her four years at college. She was treasurer of the Women's Athletic association, on the Barometer staff and a member of the basketball, track, baseball, archery and hockey teams.

John Sinniger of Roseburg has obtained his degree in chemical engineering. He is one of 29 to complete the course this year. A larger percentage of graduates from this school than any other on the campus go on in graduate study, many former graduates now being in Yale, Harvard, Illinois and other famous graduate schools. Chemistry is the source of some of the biggest industrial revolutions as well as industrial romances of the modern age and still hold untapped possibilities, according to scientists. Upwards of 75 billion dollars are invested in business undertakings more or less dependent upon chemical products, making opportunities large for service in this field.

EX-BOOTBLACK RISES TO MILLIONAIRE CLASS

VALLIANCE, Neb., May 31.—Leon Warren, 18, who shined shoes to help pay his way through high school, is to be given a university education at the expense of his 16-year-old sister, Lucille, who from an orphan's home was adopted by the late S. D. Strother, Oklahoma oil man, and inherited his millions.

ATHLETES OF SIX SCHOOLS VYING FOR NORTHWEST HONOR

Washington University Is Favored to Win First Place at Contest in Eugene.

Stars of National Renown Numbered Among Ninety Entrants—Records May Be Smashed.

BY FRANK G. GORRIE (Associated Press Sports Writer) EUGENE, Ore., May 31.—The greatest collection of athletes ever brought together in the Pacific Northwest, gathered here from six universities and colleges to seek honors in the annual northern division Pacific coast conference track and field meet today and tomorrow. The tracksters were representing the Universities of Washington, Oregon, Montana and Idaho and Washington and Oregon State colleges.

Some ninety athletes—the best the Pacific Northwest had to offer—were ready to test every conceivable record beginning with the qualifying heats this afternoon. Preliminaries were scheduled in the 100 and 220 yard dashes, 120 high hurdles, 220 low hurdles and the 440 yard run.

Washington Favored Tomorrow the finals will be held in all fifteen events with the University of Washington an overwhelming favorite to win the conference championship based on the best individual performances to date this season.

Oregon was rated second, Washington state third, Oregon state fourth, Idaho fifth and Montana last. The powerful Washington combination which has conquered all Northwest competition this season was figured to possibly take

every track event and the shot put in the field battles.

A world's champion, an Olympic ace, a national title holder and several other nationally known stars were vying for honors in the classic.

Outstanding Entrant Ed Moeller, a brunette giant of Oregon, has a discus mark to his credit of 160 feet, 7-10 inch which is better than the recognized world's record of 158 feet, 14 inches made by Bud Houser of Southern California in 1928.

Steve Anderson, Washington's Olympic star, will make an effort to cap both the high and low hurdles for his alma mater in the finals tomorrow. Anderson tied the world's record of 14.4 seconds in the high sticks at the conference meet in Missoula, Mont.

Washington also is represented by a national champion in Rufus Klier, who won the one mile event in 4 minutes, 17.2 seconds at the national collegiate track and field meet at Chicago last year.

Two other conference records that were likely to fall by the wayside were the quarter mile and two mile runs.

The 440-yard mark of 49 seconds flat was made by Miller of Stanford in 1926 and tie by Ed Poltre of Washington a year later but has been bettered this year by Talbot Hartley of Washington. Hartley's fastest time for the quarter was 48.8.

TAXI DID JOB WELL

ROCHESTER, N. Y.—As the result of injuries suffered in a taxi cab crash, Howard Williams was awarded \$364 in supreme court here. Leaving a party, at which he was hit on the ear with an axe, Williams boarded the cab and in the crash suffered contusions of the ears, nose, chin, shoulders, elbows, chest, arms, legs. In addition he received two fractures of the jaw.

LOST BY A SHAVE

LONDON—There are two reasons why the Kenilworth Parish church called for the resignation of its pastor, Rev. E. T. Bradley, according to him. Because he did not shave enough, and because in asking for prayers for King George

he said "King George V." Instead of "King George the Fifth," they asked him to abandon his curacy, he says.

CONGRATULATIONS

To all teachers and scholars in the Roseburg schools upon the completion of another fine year's work.

THE BAPTIST CHURCH.
