### Chic Jackets Are Fashioned From Gown's Fabric

By HENRI HENDEL

NEW YORK, July 5.—Costumes this summer owe a genuine debt to the exquisite fabrics on the market for much of their appropriateness and beauty.

It is quite possible to find materials that are an admirable media for whatever type of costume one wishes. Some fabrics contribute crisp freshness to morning or daytime attire; others, appearing fragrant to gowns for more formal occasions.

This is especially true of the diaphanous stuffs that lend their loveliness to evening settings. What, for instance, better could catch the magic of summer softness than chiffons and lace? This season, especially, they seem ideal.

**Lace is a Chic Choice**  
Lace is the best all around choice for summer evenings that one could make. Tailored, a lace gown has dignity and beauty, made with the dressmaker touches that give softness, a lace gown is utterly feminine and alluring.

Black lace is ever distinguished. Beige lace is an answer to more party problems than any other single fabric. Some of the new, frail and expensive laces in cream or flesh have a gentle, sheer quality of beauty that is akin to summer softness.

Chiffon gowns are so light and airy that every woman will want to know the pleasure of dancing in them this year. Colors are as varied as hues.

The thing this summer is to have a little evening jacket fashioned of one's gown's fabric. Perhaps no one will want everything to be ensembles. But at least one of perhaps two of the evening

(Left to right) Colorful and summery is an evening gown of flowered chiffon with swaying fullness and a low back. Exquisitely diaphanous is a sweet Chantilly lace frock with cape back and full skirt. An evening ensemble of beige "model" lace introduces the long-in-the-back bolero over princess lines that dip in the rear; the little evening jacket is a finger-tip length.

gowns should be complemented by a light matching wrap. Lace is the ideal material for one's first evening ensemble.

have in mind a very elegant one of a rich fern lace that the French call "model" lace. The skirt has long, drooping lines, with a tight

hipline and the skirt pointing its rear fullness into graceful length. There is a bolero over the fitted body of the gown, a theme that

spend a short time in Milan, Venice, Rome, Florence and other lovely cities of the Old World.

### Cuts and Colors of New Styles Show Variety

couturiers are bringing into play more and more as the princess dress grows popular.

Over this a little finger tip jacket of matching material completes the type of evening costume that is excellent at the country club or roof garden, a godsend to the European traveler who must look her best after the lights are lit and equally good for the resort where formal attire after the sun is down.

Another lace dress, one of Chantilly lace, is beige in color. It features a little finely shirred apron front, reminiscent of the eighties, at the sides squares of the lace hang as flying panels to ankle length and a long cape effect makes the back as interesting as the front.

This frock is made over a matching beige satin slip. It completely changes its hue when worn over an apple green one or a rose colored one. This system of having several slips to each gown is one way smart women achieve variety in dress with little exertion.

**Two Styles Popular**  
Plain colored chiffons divide popularity with figured chiffons this year. Colorful prints on dark backgrounds are a bit more distinguished right now than the other way around.

An especially lovely dance frock is one from Louiseboulanger which has a black background and bright summer flowers in red, yellow, green and beige against it in a printed pattern.

It is severely tailored, with the frock's fabric giving it beauty. It has a very long back, with convenient pleating to give it fullness.

## FLOWERS and Gardens

At the meeting of the Garden club last Monday evening several invitations were received which will lead to Garden club excursions. These excursions to outside gardens and beauty spots are one of the best features of garden club work. One cannot take things too seriously in the summer.

A committee has been appointed to cooperate in the City Beautification campaign now seeing in Douglas county and the motto of which is, "Clean up, paint up, plant up, keep it up and whoop it up." The last being the function of the beautification club. Members of the committee are Mrs. S. D. Evans, Mrs. Fred Chaman, Mrs. G. V. Wimberly.

If flower gardening is a disease, as some have been unkind enough to suggest, a great many people must have been exposed this summer. The garden club membership is increasing. It costs only a dollar a year and includes husband and wife, if any. Also a year's subscription to "Better Flowers" magazine, the price of which is one dollar a year, a chance to exchange plants with other members of the club, and other valuable considerations. The meetings on the first Monday of each month are full of practical information for the beginner as well as for the hardened old gardener.

The County Agent's office can give information on how to fight carteritis if they are becoming troublesome. Phone 323.

This is the month for pulling weeds and using a lot of water. If the water bill seems high be thankful that this isn't California and that it will rain again soon.

One can save a good deal of the moisture he has bought if he uses clipper from the lawn as a mulch around newly planted trees and shrubs.

Delphiniums are about through blossoming but you can have a second crop of blooms by cutting them down at once and fertilizing and watering oil.

Canterbury bells will blossom most of the summer if each flower is cut off as soon as it withers. It is work, but the funny thing is that inveterate gardeners seem to like work and the more of it the better. Some of the best gardeners in the club, who appear entirely normal when on the street or at social functions, at home and in their own gardens go around on their hands and knees most of the time, and like it.

It is time to be planting petunias for the next year's garden and rock garden now. If one's garden is of any size it takes too much money to buy rooted plants in the spring.

One E. J. Wich, undoubtedly a very discerning resident of New Jersey, has suggested gardening as a substitute for that other violent disease, golf, which he calls "hobbyism." He says that you walk all day and have nothing to show for it. There is merit in the suggestion.

## RUBBER!

No, That's Not What You Are Supposed to Do; We Mean the Coat.

A rubber coat, in any color and different size stripes, is the latest thing on Pacific coast beaches. Here is one being worn here by Lorna Whitman of Portland, Oregon, after a dip in the ocean. It is well rather distinctive at that.
