S. P. TO INSTALL INTER-CAR PHONE SYSTEM ON TRAIN (News-Review Douglas County Special)  
 The first inter-car telephone system on a railroad train is about to be added to the conveniences of modern rail transportation. Developed and perfected by experimentation with special equipment, the innovation will make its appearance on the Cascade, Southern Pacific's fast passenger train running between San Francisco and Portland.

This announcement of great significance in connection with railroading was made today by F. S. McGinnis, passenger traffic manager for the company.

A telephone instrument will be placed in each Pullman car in the train. Connections will run to the diner, club and observation cars. With the inter-car communication lines in operation it will be possible for passengers to send and receive messages from any part of the train. And as a practical travel asset, the traveling telephone will save many steps.

For instance, passengers may use the telephone to order meals from the diner, or inquire if seats are available at the time they wish to have their meals.

Or they may have refreshments sent to them from the club car; see if the barber is busy; call the maid; summon train attendants and officials—obtain all available ser-

vice without the inconvenience of walking through the train or sending the porter on an errand.

Mr. and Mrs. Tom Schuppel visited here yesterday from their home at Klamath Falls.
