ROSEBURG, OREGON, TUESDAY, JULY 30, 1929.

ANOTHER indication of the tremendous extent to which the aviation industry is expected to develop in the near future can be seen in action taken at the recent convention of the airport section of the Aeronautical Chamber of Commerce.

This organization recommended that all cities of 100,000 persons or more must build their airports so as to be able to handle a traffic of at least 100 planes a day. In addition, it was estimated that at least \$500,000,000 will be spent on airports in the United States this year.

Figures such as these show how aviation is progressing. At present only Chicago reaches the 100-planes-per-day figure.

Do not apologize for the hot weather here. Sunday was the warmest day thus far with a maximum temperature of 94 degrees. This was but one degree warmer than the maximum in Portland the same day of '93. To even things up with Portland, however, Monday's temperature here reached a maximum of 90 while Portland thermometers climbed to 91.

St. Louis backed airplanes seem to have a faculty of getting what they go out after. People with good memories will recall that the flight of Chas. A. Lindbergh was backed by St. Louis and that his plane was christened the "Spirit of St. Louis."

An Austrian is coming over to New York and is going to open up an "idea shop." The notion counter will probably be on the second aisle to the right.

Why do men wear ten pounds of clothes while women feel neatly dressed wearing but little more than ten ounces?

BRINGING UP FATHER

By Geo. McManus

The OFFICE CAT

The Real Man A real man never talks about what the world owes him, the happiness he deserves, and the chances he ought by right to have, and all that. A real man is just as anxious in the dark in his own room as he is in public.

When the action of the United States was called in question in the French Chamber of Deputies recently, the eloquent Briand came to our defense. The report of his speech says: "M. Briand denied that the United States was a 'Shylock'; 'I had,' he shouted dramatically, 'the formidable honor of being head of the government when the Americans entered the war. I know whereof I speak.'"

True gratitude, a noble grace, Can all forgetfulness efface; It is supreme 'mong human arts— The attribute of gracious hearts.

Americans can ne'er forget Our debt to France through Lafayette! We paid it back with open hands, And sent our boys in million bands.

Our legends twine our love with France, Keep green for us a bright romance, And at these words of thanks so sweet Our breaths with true emotion beat.

Brave Briand was the first to act— His dream awoke the Kellogg pact; His vision saw the time had come To silence every warlike drum.

Maybe I'm Wrong By J. P. MEDBURY A rap rap doesn't necessarily mean that opportunity is knocking at your door; maybe it's only the prohibition officers.

Pitiful Cases The indolent wife who has been married to the same man for thirty years, she's too late to shoot him.

Take It Or Leave It There's not much difference between a trap shooter and a chair pianist; they both roll the house.

FEW PEOPLE FREE OF CATARRHAL SYMPTOMS

Sinus Troubles and Clogged Nasal Passages Are, to a Great Extent, Due to Our Climate, Says Dr. Copeland, Suggesting Treatment.

By ROYAL S. COPELAND, M. D. United States Senator from New York. Former Commissioner of Health, New York City.

NASAL catarrh is almost as common an existence itself. Hardly an individual in our American climate escapes attack. In one form or another it attacks practically every citizen.

A perfectly normal nose should have exactly the amount of secretion necessary for its lubrication. To require the use of a handkerchief, or at least the frequent use of the handkerchief, is an evidence of abnormality. The amount of the nasal secretion should be like the salivary secretion—there should be just enough to exercise its function.

There are other cases where one or both sides of the nose may be completely blocked. On examination it will be found, perhaps, that the nasal passage is filled with a translucent, pearly, round and smooth mass. This is a nasal polyp.

Sometimes, when the trouble comes on in early life the contour of the face may be changed by the growth of the polypus. This gives a peculiar flat or "frog-faced" appearance. Fortunately, nasal polypus rarely appears in children. It is more common in adults and particularly in men who are exposed to dirt and dust.

In many cases there are many growths. Instead of one simple polypus, there may be a mass, varying in size from a kernel of corn to an English walnut. I have seen many a polypus the size of a small oyster. It is sufficient to snare off this surplus tissue. After removal it is essential to treat the underlying difficulty. Otherwise, the polypus quickly reforms, and in a few weeks after its removal there is found a mass as big as before.

The presence of nasal polypus indicates, in most instances, disease of one or more of the cavities opening into the nose and known as the nasal sinuses. There must be treatment of the fundamental cause. The condition is not serious, but it is disagreeable and demands attention from a specialist in nose diseases.

Answers to Health Queries A. L. Q.—What do you advise for varicose veins? A.—If the trouble is slight, bandaging or wearing an elastic stocking is often effective, but in many cases surgical procedure is necessary.

HOT WEATHER ADVICE FOR MOTHERS OF BABIES HOT weather is usually bad for the baby. By this I mean excessively hot weather and its effect upon babies who do not receive the best of care.

The first important habit is to have regularity in the feeding time. No food must be eaten between the regular feedings. The baby must be taken into the open air at a regular time every day. Unless the weather is extremely bad, this rule must not be overlooked.

The baby must have a regular time for sleep and rest. The young baby will sleep twenty or even twenty-two hours out of the twenty-four. The infant should be encouraged to have this amount of sleep.

The mother must give attention to the bowel movements of her child. The feedings must be so regulated that there is regularity in the call of Nature.

The Maid Should Be Remembered DEAR MRS. BECKMAN: My husband, two children and I spent the weekend at my brother's house at the seashore. They have a maid. Should I have given her a fee when we left? I thought that I should have done this, but my sister maintained that it was not necessary for so short a stay.

Good Manners By MRS. CORNELIUS BECKMAN Wedding Presents DEAR MRS. BECKMAN: I have received an invitation to a church wedding. Is it customary to give a present? To whom should a wedding gift be sent when the groom-to-be is a relative?

A READER SINCE the fact that we receive an invitation to the wedding means that we are a good friend of the bride or groom, or both, it is natural that we would wish to send a present to show our interest in the new home.

No. Often there are several married women among the bridesmaids. But the chief attendant, if married, is called the matron of honor.

Period of Wearing Mourning. DEAR MRS. BECKMAN: Will you please tell me how long one should wear mourning clothes. I am undecided about this question, so I thought I would write and ask you.

I WISH I could tell you definitely, but now all rules and regulations about mourning clothes have changed, so that there are no longer any rules and regulations. Many people do not wear mourning clothes at all; many wear only black and white, never wearing the all-black; some wear black for only a month or two, and then wear black and white or dark clothes; and most people no longer wear, even for a mother or husband, the old-fashioned long and heavy crepe veil.

Mrs. Beckman will be glad to answer questions on etiquette submitted by readers. Copyright, 1929, International Feature Service, Inc.

EDITORIALS ON THE DAY'S NEWS

(Continued from page 1) immensely more efficient than others. The task of the scientist is to tell us just what kind of pollenizers to use, and just how to use them.

AFTER that comes the problem of pest control, because cherries affected by the fruit fly maggot are not salable.

Fruit farming is certainly not a rule of thumb business. If it is to succeed, it must have the benefit of constant and intelligent scientific research.

Anything that promises to decrease the cost and increase the efficiency of pest control is of immense interest and importance in the fruit growing districts.

A McCormick-Deering tractor and a P. & O. heavy disc plow will do a fine job of dry plowing. See this outfit at Wharton Bros.

TRESPASS NOTICE All persons warned against trespassing on premises of Elks Island in the Unappu river below Oak street bridge. A guard is being maintained day and night. Violators will be prosecuted.

WHAT HAS GONE BEFORE. Phillip Edison is host at a night club party to his just recently divorced wife and Oliver Sewell, sportsman and Don Juan. Edison presumes that Sewell and the divorcee are to be married. When the party breaks up, Edison goes to Sewell's home and, while he is waiting his return, is informed Sewell has been found dead.

He heard a scream. Before him stood Mary Pennell. Her face was white, and her eyes wide with fright. She started at him and could not speak.

"Well," said Marx, and he was fully as dumfounded as the girl. The girl did not reply.

"Silt down!" invited Marx, pointing to a chair. "I don't know I was to have a visitor."

"I—," stammered the girl. "I didn't know myself."

"What are you doing here?" "I— don't know."

"Just looking around?" The girl swallowed.

"You," she said hastily. "Like the furniture?"

"Want to buy it?" "Yes—yes."

"Well, I can't sell it to you, you know." "No. No."

"You weren't going to steal it, were you?" "Oh, no!" she protested. "I wouldn't steal it."

"That's good." Marx looked at her grimly. "Then what did you come here for?"

"I— I don't know." "I— I don't know," Marx snapped at her. "You want to go to jail?"

The girl rose, frightened. "Oh, you wouldn't do that, would you? I— haven't done anything."

"Haven't you thought? You know you're interfering with justice when you come here? What are you up to?"

"But I had to come here." "Why?"

With trembling fingers the girl extricated a piece of paper from her handbag. Marx observed that it was typewritten and it read: Dear Mrs. Pennell: If you wish to clear Mr. Edison of all suspicion in connection with the murder of Oliver Sewell, you will oblige implicitly all the directions outlined below:

Then wait for Mrs. Whistler. Your friend.

Cheap Power!

John Deere Tractors and Engines are simple, practical and powerful. COMPARE COSTS ON YOUR WORK

REFRIGERATOR AT TERMINAL MODERN IN EVERY RESPECT

The electric refrigeration system just installed at the Terminal hotel by the California Oregon Power company is declared one of the most complete and modern systems of its kind in the state.

Included in the installation, which was made by Harold Farris of the Copco electric store and Frank Hull, district supervisor for General Electric, are the following refrigerators, one C-451 G. E. commercial refrigerator, one C-55 G. E. refrigerator and one C-2 G. E. automatic water cooler. The commercial unit is one of the largest refrigerators of this type made and has a capacity of 45 cubic feet. It will be used in the kitchen of the Stage Terminal cafe and is large enough to take care of all meats and foodstuffs care of all meats and foodstuffs.

Normal seasonal precip. Sept. 1 to May, inclusive, 51.16. Forecast for interior southwest Oregon: Fair tonight and Wednesday; not much change in temperature.

Crackpot garden hose is sold at Wharton Bros. Watkins products, 120 West Lane, Phone 177.

Play at Idlewild Park.

DAILY WEATHER REPORT U. S. Weather Bureau Office, Roseburg, Oregon. Data reported by E. H. Fletcher, Meteorologist in charge.

Barometric pressure (reduced to sea level) 5 a. m., 29.91. Relative humidity 5 a. m., 30. Precip. (per cent) 30. Highest temperature yesterday 90. Lowest temperature last night 59. Average temperature for the day 74. Normal temperature for this date 69. Precip. in inches and hundredths 0.00. Precipitation for 24 hours, ending 5 a. m., 0.00. Total precip. since 1st month 31. Normal precip. for this month 32. Total precip. from Sept. 1, 1928, to date 22.50. Normal precip. from Sept. 1 to date 22.50. Total deficiency since Sept. 1, 1928 9.67. Normal seasonal precip. Sept. 1 to May, inclusive, 51.16. Forecast for interior southwest Oregon: Fair tonight and Wednesday; not much change in temperature.

cool. It seemed a silly errand. Then suddenly he stopped. It had grown quite dark, and he had not noticed the lights. Not far from him he could hear soft footsteps, coming nearer and nearer. Marx stood still, and held his breath. Still the footsteps patterned closer, and Marx could distinguish the vague, shadowy figure of a woman, suddenly he ran to the light switch, and the room was flooded, so that he blinked.

8 PERSONS DIE AS LAUNCHES COLLIDE (Associated Press Licensed Wire) ARNOLD PARK, Iowa, July 29.—Six persons are believed to have been drowned in a collision between two launches on Lake Okoboji last night. The body of Miss Esther Edson of Alta, Iowa, has been recovered.

TRUCKS CRUSH LIFE FROM TWO PERSONS (Associated Press Licensed Wire) PORTLAND, July 29.—Elmer Peterson, 36, was fatally injured today when he was dragged under the wheels of a truck upon which he had been riding. Peterson attempted to jump from the truck while it was moving. His clothes caught and he was pulled under the machine.

OREGON CITY, Ore., July 29.—Lester Fisher, 24, was killed today when he fell or jumped from a runaway truck on a steep hill near West Lynn.

With his father, Norman Fisher, the young man was heading west. The other man walked ahead and as the truck, driven by Lester, followed, the brakes failed. Fisher was caught between the front and the rocky side of the hill. The truck was fractured and his body crushed.

"I— I must have come through here," she said, pointing to the mirror.
