DAY after day of warm summer sunshine witnesses the exodus of local residents on motor and vacation trips. Many tourists are visiting in the city and enjoying the diversions offered in the vicinity of Roseburg.

Swimming parties are popular at this season and late afternoon finds scores bathing in the Umpqua. A cool swim followed by a picnic lunch under the shade trees along the river is pleasing at this time of the summer.

Mrs. Lulu King of Washington, D. C. has been the inspiration for a number of social gatherings this week. The charming matron who has been the house guest of Mr. and Mrs. Charles Heinline is leaving shortly. Luncheons and gatherings at various summer lodges have been events of this week in her honor.

The American Legion convention of the coming week to be held in Salem will be of interest to local legionnaires and their auxiliaries. Members of the Umpqua post will leave the early part of the week to attend the convention.

Local club, society and business women will enjoy a lecture this week to be given by Ethel Child Walton of Portland. The lecture will touch on matters of culture and charm and Mrs. Walton is prepared to cover the subject thoroughly.

Following the ceremony a buffet luncheon was served and immediately following the couple left for a honeymoon trip over the Rosevelt highway. They will make their home in this city.

Mrs. Vinson has lived in Roseburg for a number of years where she is prominent socially. Mr. Vinson is a retired rancher of this vicinity and well known throughout the county.

### Culture and Charm to Be Lecture Subject

A lecture lesson on "Culture and Charm" will be given to the women of this city within the next week by Ethel Child Walton of Portland.

"Culture is like the binding of a book," said Mrs. Walton. "Just as the binding protects the valuable pages that are within, so does culture reveal the breeding of an individual, and protect one from the disrespect, ridicule and snobbishness of the world."

"The rewards of culture are numerous" to recount. Culture

gives one dignity. It makes one's actions and speech refined, polished, and impressive and it enables a person to become a participant instead of an onlooker. Culture attracts but most of all it gives one respect for oneself which is more important than riches and fame, for without self-respect there is no happiness.

Tickets for the lecture will be on sale at one dollar each at Story's confectionery. The date and place of meeting will be announced on Monday.

Members who have signed up for the guild will be Mrs. Walton's guests at the lecture.

Mr. and Mrs. Claire Green and their son and daughter of Spokane were guests at the home of Mrs. Allene Wood of this city during the week. They are returning north after a tour of California.

## There Is a Short Jacket Suit For Every Type of Woman

### THE BLUE SILK SUIT LEADS IN POPULARITY

By HENRI BENDEL  
NEW YORK, Aug. 2.—With first indications that this was to be a suit-spring, couturiers turned their attention to individualizing the suit mode.

The results have been more than gratifying to the woman who demands styles suitable to her and perhaps to her alone. There is real diversity in suits today. One can have a whole wardrobe of suits and no two will be alike, either in fabric, cut or feel.

Three special divisions of the spring suit have been developed, all featuring the short jacket which always is so youthful looking.

**Blouses Tuck-in**  
First, and newest, is the short jacket suit with separate blouse of the tuck-in variety. This type of suit makes most of the big yoke and belts of the skirts and the blouse is more apt to be off-white satin or plain colored silk, batiste or organdie than to be figured.

Second, there is the jacket suit that makes its coat with feminine touches such as scarf effects and belts and uses overblouses the same pattern as the coat's lining. This is really the ensemble of last year zone youthful, with a short jacket instead of a long coat.

Third, and this type is having increasing importance in warm weather, there is the jacket dress, the little suit composed of a frock and contrasting jacket to top it.

**Blue and Blue**  
The navy blue tailored suit with tuck-in blouse leads in popularity this year. Navy blue always has had a popularity envied by all other colors for serviceability. Whether of flat crepe, crepe de chine, faille, satin or roughish silk, the navy blue silk tailored suit stands a chance of being the favored summer costume for travel, everyday wear and for informal afternoon things.

One navy blue faille suit made has a powder blue flat crepe blouse with a novel little double jabot effect, flaring on either side of a fitted neckpiece of the suit's faille. The suit's skirt fits smartly around the hips, by means of a double box pleats flare after hip length. A belt of the faille buttons with a bone button on one side of the front.

With this, I advise a navy blue ballbant hat, of the long-in-the-back cut, which has powder blue grosgrain ribbon laced through its sides to face one side of the brim and to band the crown of the hat on the other side.

Another suit of this kind has several noticeable points of chic in a study in black and white, with the overblouse of white crepe, modernistically designed with hand-applied geometric figures of the black and the white. The skirt has one triple box pleat, inverted in the French manner. The coat rounds its front facings and uses double rows of buttons up the sleeves. It is belted in black suede. The coat's collar is a scarf one, with white facings. Topping this is a white bouclette braid mushroom hat with a banding of black suede like the suit's belt. This banding ties itself into a cute bow far back on one side.

Three different types of suits give variety. (Left to right) The jacket frock of chartreuse, black and beige print has a black faille jacket. A blue suit with a skirt yoke has a powder blue jabot frock that tucks in. The hat is blue and black. A study in black and white is a black and white suit with overblouse of white modernistically applied in both black and white.

used a print of black, chartreuse and beige and black faille. The frock has a pleated skirt and a plain neckline, with a beige jabot on triangular cut. The little black jacket has its body composed of graduated bands of black faille, posed on crepe roma to give the appearance of horizontal stripes, yet be only one thickness. With this a scarf of the print is edged in diagonal manner in the black and the chartreuse. The hat of chartreuse felt has the new off-the-face cut.

For the jacket frock, I have

ing rose bushes scattered through them. There were 36 that had a regular planting of roses, some of them really beautiful. There were miscellaneous flowers of varying heights and degrees of dilapidation and there were vegetables, including the well-known and highly esteemed Irish potato. But why go on? This is what our visitors care. No two neighbors seem to have the same idea about what to do with the parkings, and the effect is about as pleasing as if the members of your choir should rise en masse next Sunday at church and all sing at the tops of their voices, but each a different hymn.

Fine looking, attractive residential streets do not just happen. They have to be planned. If there is no city planning commission some other authority must do it.

Two or three points on what to do with the parkings and then the writer of this eulogy will go into seclusion till public indignation against him has somewhat subsided. First, each town has its own problem. There is no correct answer for them all. Salem with its broad streets has one problem. Roseburg with its narrow streets and enclosing hills has another. It is to overcome the feeling of narrowness and disorder that her streets give. Third, any planting except plain lawn increases the impression of narrowness. Fourth, concerning roses. Unless they have constant care roses planted in the parkings are out of season most of the summer are as about as beautiful as chickens that are moulting. They are dead birds.

Above all, be sure that the parking problem cannot be solved by each property owner using his own ideas and ingenuity. That is all right inside the yard, but in the parkings, no. The street must be planned as a whole.

Tomorrow old residents of Nebraska will gather at Corvallis for the sixth annual Nebraska picnic. The picnic is to be held at the Corvallis auto park and Nebraskans from all over the state will enjoy the day and reunion.

Mrs. Foster Butner and her daughter, Miss Frances, left Thursday for Seattle to be guests of their son and brother and his family.

Left over roast meat, finely ground and mixed with a little horse radish or chopped pickles and mayonnaise, makes a good sandwich filling.

Butter icing for cup cakes. Cookies is made by creaming one-half cup of butter and adding gradually, sifted confectioners' sugar. Add 2 or 3 tablespoons of strong coffee and one-half teaspoon of vanilla for flavor a few drops at a time when creaming.

To vary eggs as a sandwich filling, add deviled ham and a little cream to chopped hard-boiled eggs. If raisins are placed in a warm oven for a few minutes to mazz them plump and dredged with flour before adding to cake or cookie batter they will be less likely to sink.

Macaroni is usually broken into pieces an inch in length and cooked without blanching—in rapidly boiling water. When tender drain and rinse in cold water, then drain again. The cold water washes away the pastry exterior that would otherwise cause the pieces to stick together. Rice is best cooked in like manner.

If milk is kept in a large shallow pan instead of a deep one, it will remain sweet much longer. The delicate flavor will be brought out in salt fish if it is soaked in sour milk before cooking.

Once more those busy days are past—The haying time out on the farms. We see the meadows clean again; The crops are hauled and in the barns.

The farmer's thoughts turn to the fields. Where heads are heavy on their stalks; While he with neighbors frequently Of methods for its reaping talks.

The combined harvester's his theme; To him it means a wondrous gain. This year 'twill gather, we are told, A thousand acres of our grain.

This reaper is in common use in other sections, it is true; But in our own locality This method so improved is new.

We welcome every modern plan into our county that will lead Efficient service, added time. And prove to be the farmers' friend.

For every aid out in our fields Means better homes and lessened strife. With needs supplied and minds content We find the deeper joys of life.
