

### IMPROVEMENT OF CAMPSITES WILL BE UNDERTAKEN

#### Chamber Commerce Plans to Interest Clubs in Development of the North Umpqua.

Service Organizations Will Be Asked to Provide Facilities at One or More Camps.

An effort to improve camp sites along the North Umpqua river will be undertaken by the Roseburg Chamber of Commerce, plans for the project having been advanced at the meeting of the board of directors last night.

There are a score or more of good camps between Rock Creek and Steamboat, the forest service having recently completed a recreational survey, which shows the sites to be used for public camp purposes. At the present time the forest service provides patrol and fire protection in that area, but nothing has been done in the way of improvement. There are no facilities for the campers; no stoves, no garbage cans or pits, toilets, etc.

The camps are used constantly during the summer months a survey shows that twenty-five or thirty camps will be found daily along the North Umpqua road. As a result the camps are becoming more and more unsanitary. As each camper tries for a clean place he moves his fire until the camps are becoming dirty and spotted with ashes and charcoal. Undergrowth for yards around the camping places is becoming more and more polluted.

Inasmuch as Roseburg is particularly interested in making the North Umpqua of more general use for recreational purposes, it is felt that something should be done to provide clean and sanitary camping spots.

It is proposed by the Chamber of Commerce that this project be placed before the service clubs of the city. The Kiwanis, Rotary, Lions clubs, American Legion, Chamber of Commerce and other such organizations, it is felt, could each take over one or more of the sites. Each camp should be furnished with sheet-iron stoves or concrete furnaces with iron garbage cans or pits, toilets, and possibly tables. This could be done at very little expense.

Work could be donated in cleaning out underbrush, rolling away logs, leveling of spots for tents, and otherwise cleaning up the sites. Each camp could be posted with a sign showing that it was furnished through the courtesy of the club in charge, thereby spreading a feeling of hospitality to the visitors from out of the state who would be accommodated.

It is believed that the cost in each organization could be very small, and the advertising that would result would be extremely profitable and would serve in a very large way to bring additional campers to the North Umpqua.

### MILL FIRE WILL DELAY PROGRESS OF LOCAL PLANT

Installation of the North Roseburg mill may be delayed several weeks due to the fact that C. H. Ford, the owner, lost one of his mills at Cheshire by fire this week. The machinery which was planned to move to Roseburg has been shipped to Cheshire to replace the mill destroyed by fire. It is felt that the mill was engaged in cutting a large order, which must be filled immediately. All new equipment is being ordered for the Roseburg mill and it may be several weeks before than has been expected before the machinery is received.

### TEXT BOOKS LOANED TO MYRTLE CREEK MAY BE RECLAIMED

Several hundred school books which were loaned to the Myrtle Creek district at the time the building there was destroyed by fire, have been returned to the News-Review office and are now ready to be returned to the owners. The books were used by the Myrtle Creek pupils to replace the ones destroyed in the fire, and were treated with extra care that they have not been damaged aside from the usual wear. Owners may obtain them by calling at the News-Review office.

### Genius of the Present and Future

Here is a study in pictures, the genius of the present and the possible genius of the future. Thomas A. Edison congratulates Wilber H. Huston, of Seattle, Wash., who has proven to be a "wizard" after his own heart. Young Huston, son of a Seattle minister, is the pride of his home town since he won the scholarship prize in the contest which the veteran inventor conducted to find a possible successor for himself.

### COLUMBIA RECLAMATION IDEA ECLIPSES BOULDER DAM PLAN

#### Navigable River to Canadian Boundary and Creation of New Agricultural Area of 2,000,000 Acres Aims of Project to Be Urged Upon Congress—Cost Would Be Defrayed by Sale of Power.

SEATTLE, Wash., Aug. 20.—(A. P.)—With the Boulder dam project out of the way, congress will be asked next December to undertake an even greater task—the development of the mighty Columbia river.

The project would include the development of at least 2,250,000 horsepower of hydro-electric power, the reclamation of 2,000,000 acres in the Columbia basin of central Washington, and the construction of locks that would make possible the navigation of the Columbia river from the Pacific ocean to the Canadian border, a distance of 746 miles.

**First Unit Plans**  
As the first step, the Columbia River Development league, representing many Washington cities and towns, will ask for the construction of a power dam at Grand Coulee in central Washington and the gradual reclamation of the Columbia basin project.

A dam 220 feet high would produce 1,250,000 horsepower for sale and 1,000,000 horsepower for pumping water for irrigation. A dam 350 feet high would enable production of 2,000,000 horsepower for sale and 1,500,000 horsepower for pumping purposes.

The size of the dam would depend on the report of the United States army engineers under Maj. John S. Butler, who have been planning for the development of the river. Those plans call for a series of power dams and locks which would open the river for navigation to the border.

**To Pay By Power Sale**  
From the international line to the sea the river drops 1,250 feet. Estimates place the total electric energy possible for development at 10,000,000 horsepower. The sale of this power would be expected to pay for the entire improvement program.

The league will ask congress to

### ASKS HOOVER'S AID TO HALT POACHERS OF ROGUE RIVER

GRANTS PASS, Ore., Aug. 19.—Appreciating the fondness of President Hoover for fishing, anglers here have laid the matter of "wood-legged" steelhead trout, near the mouth of the Rogue river by commercial fishermen, to the chief executive.

Reports of wholesale slaughter of steelhead down the river have continued within the past ten days at such an extent that Frederick Burdick, retired business man and sportsman, yesterday sent a telegram to the president appealing for aid to stop it.

### Germans Warn Cities of Chemical Warfare

#### One Hundred Different Kinds of Poisons Exist for Using in Attacks From the Air.

MUNICH, Aug. 20.—That chemical warfare on a large scale is certainly coming, and the nations of the world had better make up their minds to face facts squarely, was the gist of a resolution passed by the German Society for Protection Against Air Attacks when it met here.

Dr. Kern of the Carinthian Anti-Air Attack association said that there existed about 100 different kinds of war poisons, but only about ten of them were known to the general public; the blistering, the corrosive, the nerve-paralyzing and the tear gases. To all of these, he said, there exist antidotes, but the necessity remains to know them all and to be prepared for all.

Major Grosskreutz, air expert of the former imperial army, said that it was a flight of fancy to imagine enemy bombers coming over "like clouds of locusts". Only a fraction of a country's air force, he argued, could be used effectively at the front. He gave an instance of an industrial area during the world war. Three hundred aces were made, but only seven times did the German flyers come into contact with the enemy, and only eight enemy planes were brought down—one hit in 37 tries.

Equally exaggerated in his views were the effects of attacks with explosive bombs, experience having shown that to destroy a built-on area of six square miles, 10,000 tons of bombs would be needed, which would require the services of 200 day machines or 100 night machines making 100 attacks each, assuming that each machine was capable of making 100 attacks.

The incendiary bomb, in his opinion, was most to be feared by the unhappy citizens of centers open to air attacks.

### JOURNALISTIC INSTRUCTOR VISITOR IN ROSELBURG

Edwin H. Ford, professor in the school of journalism at the University of Oregon during the past year, was a visitor in Roseburg yesterday. Prof. Ford took the place of Ralph Casey while the latter was in the East, where he just completed his master's degree. Mr. Casey was on a year's leave of absence and is returning to Eugene this year. Prof. Ford accepted a position as instructor in the school of journalism at the University of Minnesota. With his home in the middle west, he is a graduate of Stanford, and has

### BLACK FIGS DISPLAYED

San Pedro black figs, grown on the Cobb ranch near Kellogg, were brought to the News-Review office yesterday by W. L. Cobb. The figs are of unusual size and flavor. This variety is one of the most choice and commands a high price on the market.

### SPOKANE CHIEF OF POLICE REMOVED

SPOKANE, Wash., Aug. 19.—Wesley H. Turner was removed today as chief of police by Leroy Lambert, commissioner of public safety. Personal differences between the two were given as the reason. Turner, who had served as chief under several city commissioners, will return to his former position as head of the identification bureau. The new chief will be named within a few days.

### NEWS BRIEFS

#### SEATTLE, Wash., Aug. 19.—

Four prisoners saved through cell bars and escaped from the King county jail here after slugging jailer H. I. Rice into unconsciousness with a sack of iron scraps.

#### SEATTLE, Wash., Aug. 19.—

A stolen train ride ended in death for Alfred White, 16, of Tacoma. The youth lost both legs when he slipped between cars near Green River canyon. He died a few hours later.

#### SAN JOSE, Calif., Aug. 19.—

Fire which burned over 50 acres in the Mountain View city dump was extinguished within a few yards of a building housing 5,000 pounds of dynamite and powder.

#### VIENNA, Aug. 19.—

One person was killed and 62 were wounded, 12 seriously, in fighting last night and early today between members of the socialist Schutzbund and the anti-socialist Keimwehr at Saint Lorenzen.

#### NEW YORK, Aug. 19.—

John B. Daniel, 29, announcer for the National Broadcasting company since 1925, died today. Daniel was credited with introducing the president to radio audiences more times than any other announcer.

#### SANTA ROSA, Calif., Aug. 19.—

Charles Bidwell and Charles Coker, of Houlaburg, set out to catch a fish but their quarry almost caught them. A huge sea lion became entangled in their net and dragged them into the water. Unable to swim, they were nearly drowned when other fishermen rescued them.

### MOOSE LODGE AIDS IN CHILD WELFARE

DETROIT, Aug. 12.—Representatives of Moose lodges from all parts of the United States and Great Britain were here today for the 41st annual convention of the supreme lodge of the world. Plans to construct a child city in Wales, near Cardiff, similar to one maintained by the order at Mooseheart, Ill., were announced last night at a banquet given in honor of the British delegates.

Pledges of \$225,000 were received toward the establishment of a boys' village at Mooseheart.

McCormick-Deering tractors are made in three sizes. They all come with removable cylinders, guaranteed ball bearing crankshaft and other late improvements. See one at Wharton Bros.

### Does Your Car "Wander"

Perhaps it "Shimmies"—is hard to hold in road—making driving hazardous, annoying, expensive.

### Front Axle Lining Will Remedy These Defects.

We have apparatus for correcting any of this sort of trouble to meet factory specifications and positively preventing "shimmying" or "wandering" of the car.

### VESTA BATTERIES ARE BEST

Patented 4 plate-locking insulators in each cell group Give long life and added service to battery.

## Estate GAS HEATROLA

# ... at the plate it's SWAT!

# ... in a cigarette it's TASTE!

ACTIONS SPEAK LOUDER than words; what you want to know about a cigarette is how it tastes. And words can't tell you much about Chesterfield's taste. Tobacco quality, mild fragrance, character—these are only words, until you've tried Chesterfield; after that, three words say it all:

"TASTE above everything"

MILD...and yet THEY SATISFY

# Chesterfield

FINE TURKISH and DOMESTIC tobaccos, not only BLENDED but CROSS-BLENDED

Light and fluffy as the biscuits it makes

You won't wonder any more why some biscuits are so especially light and feathery when you see what they were shortened with.

Snowdrift! See how creamy it is, how airily it ruffles up on your spoon—so snow-white and fresh. See how lightly and easily it cuts into the flour!

It blends with sugar just as quickly. Just a few stirs and it's all mixed—you don't have to cream it first at all. We cream it for you before we pack it in the airtight can. Snowdrift saves your time and it makes all the things you bake light and fluffy as Snowdrift itself.

Everything about Snowdrift is inviting and easy to use. The new cans, with their curly white design on a background of deep blue, are nearly as wide as they are tall, and so you can get your spoon in and out without rubbing your fingers on the sides. The new large buckets—three pound and six pound—are at your grocer's now.

## Snowdrift
