A THREE DAYS' COUGH IS YOUR DANGER SIGNAL

Coughs from colds may lead to serious trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a medical discovery with two-fold action; it soothes and heals the inflamed membranes and inhibits germ growth.

Of all known drugs creosote is recognized by high medical authorities as one of the greatest healing agencies for coughs from colds and bronchial irritations. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the inflamed membranes and stop the irritation, while the creosote goes on to the stomach, is absorbed into the blood, attacks the seat of the trouble and checks the growth of the germs.

Creomulsion is guaranteed satisfactory in the treatment of coughs from colds, bronchitis and minor forms of bronchial irritations, and is excellent for building up the system after colds or flu. Money refunded if not relieved after taking according to directions. Ask your druggist. (adv.)

Oregon registers 92% increase in EIGHTS

As proof of the tremendous growth in public preference for eight-cylinder cars, registration figures in this state for the first seven months of 1929 tell their own story. Eights above \$1000 showed an increase of 92 per cent while Sixes in the same price field decreased 11 per cent.

The tendency is the same the nation over. In 43 states, * Eights above \$1000 increased 94 per cent. Sixes declined 18 per cent. Nobody can doubt the evidence. We are passing into an eight-cylinder era!

Studebaker today leads the world in the manufacture of Eights—Eights that are champions—holders of 11 world records for speed and endurance and more American stock car records than all other makes combined—Eights which are remarkably economical—smooth, flexible, brilliant.

Drive a smart new Studebaker Eight—President, Commander or Dictator—each backed by Studebaker's 77 years of manufacturing integrity. Your new car will be worth more a year from now—if it's an Eight!

* 5 states do not compile registrations by engine types.
