

KIWANIS OFFERS PRIZES FOR FAIR OF 4-H MEMBERS

Prizes amounting in value to nearly \$100 will be distributed by the Kiwanis club to 4-H club members participating in the county fair to be held in this city October 22. Each member of the club has contributed one or more prizes, which will go to the winners in the various departments.

Over \$50 in cash will be paid, new currency having been secured for these awards. Fountain pens, flashlights, ballpens, meal tickets and many other prizes are included. All are on display at the local telephone office, J. R. Farrington, manager, being the secretary of the club.

The Kiwanis club is sponsoring the fair, which it is hoped to make an annual event. All of the winners in the various community fairs are being urged to exhibit their articles in the county fair, which is to be held at the Hudson Essex garage and on the vacant lot adjoining that building.

The Kiwanians will be hosts to the club members at a free luncheon in the Knights of Pythias hall at noon, and will also provide the attire tickets for a special afternoon machine at the Auditorium theatre.

The fair is expected to be one of the best ever held in the county and everyone is urged to attend the displays and see the excellent work being done by the boys and girls of Douglas county.

GLENDAL CHAMBER VOTES TO SUPPORT COURTHOUSE FETE

(Continued from page 1)

ber of commerce be hereby accepted;

AND BE IT RESOLVED that all citizens of Glendale and vicinity be urged and requested to attend this dedicatory celebration at Roseburg;

AND BE IT FURTHER RE-

SOLVED that the Glendale chamber of commerce especially give its hearty and earnest co-operation and support to this dedicatory celebration with the purpose and in the endeavor to help make October 15th at Roseburg a "COUNTY-WIDE DAY OF PRIDE."

(Signed)
GLENDAL CHAMBER OF COMMERCE

A. G. CLARKE,
I. H. SMITH,
H. LYSTIL,
Committee.

Rev. J. K. Howard was appointed official representative of the Glendale chamber of commerce at the courthouse dedication by R. M. Eberle, president.

A committee was appointed and empowered to secure suitable ribbons or badges to be given or worn by everyone from Glendale and Cow Creek valley attending the celebration. This committee hopes to have these badges ready for distribution by Tuesday and anyone that intends going to Roseburg next Saturday is invited to call at Belotti's clothing store and ask for a Glendale badge.

A committee consisting of George A. Jackson, I. A. Zook and E. M. Belotti was appointed to canvass this locality for the purpose of enlisting interest and securing as large a turnout as possible from this vicinity to go to Roseburg Saturday.

Another special meeting will be held Tuesday evening, October 15, at which time committee reports will be received and final plans made as to participation in the celebration at Roseburg.

The regular annual meeting of the Glendale chamber of commerce will be held at the city hall, Monday, October 21, at which time every member is urged to be present, as a number of interesting subjects and matters of importance are to come before the chamber for discussion at that time.

FABRIKOID COVERS

Yes, we have a big line. Don't buy from agents and pay double. We have table covers in several sizes and colors or the material by the yard in colors or white. See this wonder material at Carr's.—Adv.

Bone meal used around flowers and bulbs now will fertilize them early in the spring. Bone meal and other fertilizers are sold at Wharton Bros.—Adv.

PRUNE GROWERS AND PACKERS TO SEEK STANDARD

(Continued from page 1)

compared with the output of former years.

"There is no question of fruit classed as 'redheads' and 'plumbers' for the growers realize that these cannot be accepted and are trying to keep their fruit as free from these objectionable types as possible, but because of the great speed at which they have been working have allowed a greater number to slip by than usual.

Opposite Claims

"Many of the growers, with years of experience in drying, say that the fruit this year is too dry, while the packers claim that they have had heavy rejections by the inspectors at the docks because of excessive moisture. This situation points clearly to the necessity of a set standard for moisture content, and consequently it is the desire of the association that some standard be adopted.

"Prof. Weigand's work is apparently the farthest advanced of any experiments made, and it will be the effort of the association to secure cooperation in further tests, which will result in the setting up of specifications regarding moisture content that can be set forth in the contracts with the buyers and thereby secure a uniform rule for drying prunes.

"At the present time some moisture tests have been made and prunes containing 22 per cent moisture have been classified by growers as too soft, and it was also shown that tests showing 12 to 18 per cent moisture have been rejected by packers as being too soft. If the grower dries his fruit out to a low moisture content he reduces the weight of his fruit, and if the packer subsequently shoots water into the prunes in the processing he increases the weight and thereby increases his profit at the expense of the grower. Definite standards, therefore, for dried and packed prunes would eliminate the disparity that is known to have existed in some cases.

Standard Lacking

"The growers feel that they have a just complaint this year for they signed the contracts in good faith, expecting that the

fruit would be received as in former years. The question of dryness has never been established excepting by the feel of the fruit, and because of conditions this year, where the fruit softened on the trees before packing, such test is not believed to be a fair one. The members feel that they know the moisture content of the fruit that has been delivered, and know that it is even below that of former years, and feel that fruit rejected for high moisture content at the docks is not the fault of the grower, so will not be satisfied until they know that the packed product is going on the market with a moisture content comparative with that demanded from the grower. If the grower is required to dry his fruit out from 6 to 8 per cent lower than Prof. Weigand has specified, then the packed product should be on the same basis and not watered to the profit of the packer and the loss of the grower.

"The association feels that if the requirements set forth by Prof. Weigand are too high, they should be lowered, but believe that something should be done to determine the actual standards that should be followed and are willing to cooperate with the packers in this regard, as they feel that the packers have carried on a great deal of experimental work along this line which would be of great benefit to the growers.

"The association is very anxious to put out a high quality product and is working towards that end, believing that the future of the Oregon prune depends upon its reputation for quality. In order to secure this result, however, with fairness to both the grower and the packer, it is believed that steps should be taken to secure data upon which to standardize prunes the same as required for other products.

Conference Held

A meeting of the directors of the association was held last week with the representatives of the packing associations in an effort to adjust the difficulties surrounding the drying and acceptance of the prune crop, and it is possible that by another year the plans of the association to secure suitable tests will have been carried out, eliminating possibility of such difficulties as have arisen this year.

There is no doubt, Mr. Marsh believes, that there is a relation between the sugar content and the water content that must be determined to secure best drying results, and this factor will have to be worked out through experimentation by chemical experts before definite standards can be set, but it is his hope that the association can secure cooperation from the college or the experts of the department of agriculture along this line, so that the problem may be definitely worked out for future years. It is believed to be an important step for the prune industry and will result, if successfully carried out in a uniform dried product, with dried prunes to determine accurately the moisture content of the dried fruit, while at the same time there will be a possibility of securing a check on the processed fruit to see that it is kept within the standards for high quality packed prunes.

Conditions Unusual

The growers of the Umpqua valley have been faced with one of the most difficult seasons in the history of the industry. Mr. Marsh says. Not only was the maturing season very unusual, but the harvesting has been crowded into a period two weeks shorter than usual. The crop was the largest ever known, while drier space was limited. Then to top off the troubles a heavy rain was encountered to ruin the fruit on the ground, resulting in losses variously estimated at probably being in the neighborhood of from 20 to 25 per cent. Growers who had drier space available had little loss, but some who were unable to secure driers lost heavily.

**Andrew T. Poole
PASSES IN NEVADA**

Word was received here yesterday of the death at Reno, Nevada, of Andrew T. Poole, a former well known resident of the Tillamook district. He was about 60 years of age and lived practically his entire life in the district along the southern border of the county. He was a ranger in the Crater national forest for a number of years, but went to the Fremont forest two years ago as a scaler. A brother was with him at Reno at the time of his death. The body is to be shipped to Medford for interment.

Our American Birds

Popular Home Lessons in Natural History
THE BIRD OF THE WEEK
(By Louis Albert Banks)
(Cut out this block each week and you will soon have an interesting bird book of your own.)

THE KINGLET

There are two of these beautiful little fairy-like birds—the ruby-crowned kinglet and the golden-crowned kinglet. They are close kin in all their customs and manner of life to the chickadees and the nuthatches but smaller than either. They are only four and a quarter inches long. The upperparts are grayish olive-green, brighter nearer the tail, wings and tail dusky, edged with yellowish olive; two whitish wing bars; breast and underneath light yellowish gray. The ruby-crowned male has a vermilion spot on his ash-gray crown. The golden-crowned kinglet is very similar except that he has a touch of orange color, bordered by yellow and outlined by black for his adornment; with this difference you could hardly tell them apart and the ladies dress the same as the male, except the crown. When they are in love in the spring they are beautiful singers. They like to nest well up in a great green fir tree. They are supposed to go south of the United States to winter, but are often seen in the southern states and in southern Oregon and California. They have a short call note you can interpret "chit-it, chit-it." They are great acrobats in their bug hunting up and down and around trees. They have four to eight white eggs spotted with brown or lilac.

The Midget King
O little, shining, midget bird,
You're not a phrase, you're just a word.

You make of life a merry dance;
You never fail to take a chance;
You chase the bugs from tree to tree;

Of all the kinglets you're most free,
Who'd ever take you for a king,
That saw you skipping on the wing?

Full many kings have played the clown,
And none have died to dodge their frown,
But you're the spryest acrobat
That ever played aristocrat.
You stand upon your head with glee,
As if you were a chickadee;
You ride a swinging branch, and catch
As well as any bright nuthatch.

You are a tiny little bit!
I like to hear "chit-it, chit-it."
And then I know, though you are high,
You're somewhere round beneath the sky,
Perhaps up in some lofty fir—
But where you are you're close to her—
A dazzling, gay, young fairy queen
Is nesting there amid the green.

O Kinglet, on your happy throne,
You're doubly blessed yourself to own
Your kingdom is your lady's heart—
To keep that love is your sweet art.
And ere the summer days are passed,
That kingdom shall increase no fast.
You, little king, will hustle bugs,
And not disdain the humble slugs.

SILK HOSE, 49c

Those wonder wearing Arrowhead hose. New no lustre rayon, real fine knit, looks like silk, 49c pair. Every pair extra long, fashioned to fit and guaranteed to give you satisfactory wear or a new pair free. You are the sole judge. See this Arrowhead hose, also complete line of men's, women's, or children's silk or cotton or hosiery numbers in new fall shades. Buy your hose at Carr's and get Arrowhead—it's guaranteed.—Adv.

MEDICINE CABINETS

White enameled wall cabinets, mirror front, shelves inside. Special at Carr's, \$1.25 each. We save you about half.—Adv.

When would oven heat penetrate the center of a

6 ft.
pot of beans?

You've have to guess. And guessing is inevitable in roasting coffee in bulk. That's why Hills Bros. roast coffee a few pounds at a time by their patented, continuous process—Controlled Roasting. This process roasts every berry evenly and insures a uniform flavor no bulk-roasted coffee has.

Blue Blood And Red

by ROBERT TERRY SHANNON

WHAT HAS GONE BEFORE

Eddie Hogan, once a member of a New York gang, has escaped and gone to Virginia, where he has friends. President Partridge, who has been in the county for some time, has been in the county for some time, and has been in the county for some time.

With Tom Freeman's car parked close outside the veranda of Marian's house, Eddie hastened, his face pale, to the door. Marian herself greeted him. Instantly she was aware of some strangeness about him.

"Eddie! What on earth is the matter?" Despite his efforts at self-control, his breathing was labored. He told her with a few words what had happened. Together they returned to the car. Marian was excited, but little perturbation showed through the sudden grin she developed.

"We'll get him into a bed," she said.

One of the negro women servants was available and she took hold of Freeman's legs, while Eddie lifted his heavy body. It was like carrying a sack of potatoes, as they struggled up the broad stairs. Marian preceded them and turned back the cover of the bed in a square, high-ceilinged room. The negro woman was peeped with curiosity, but Marian, thinking rapidly, satisfied her.

"Mr. Freeman had a fall," she exclaimed, realizing the necessity of concealing from servants' gossip the brutal truth.

"He got a shirt on!" the black woman muttered in awed astonishment.

"That's all right," Eddie put in. "I took off his shirt and threw water on him to bring him to."

Marian told the woman to go downstairs and crack a pan of ice. When they were alone she faced Eddie with serious eyes.

"How badly is he hurt?" she asked.

"I can't tell you," he told her. "His head hit a tree root when I knocked him down. It might be a slight concussion—maybe I shouldn't have brought him here—but I was excited, and I thought—"

"I'm glad you had sense enough to get him here," she said sharply. "I think I'd better call up the doctor."

"Give him five or ten minutes more, and see what happens," Eddie suggested, somberly. "Have you got any ammonia in the house?"

They propped Freeman up and held an uncorked bottle of ammonia under his nostrils. They held pieces of ice in cloths and rubbed the forehead and throat.

"We're not doing him any harm," Eddie declared. "If he doesn't show signs in a few minutes we'll get the doctor—but let's give him a chance." They were agreed, Eddie and Marian that a physician would be the last resort. No use, needlessly, to spread the story with its necessary peculiar explanation.

Almost imperceptibly the color began to creep back into Tom Freeman's face, and Eddie, his hand on the man's chest, thought he detected a firmer beating of the heart.

"What do you think—does he look better to you?" he asked Marian anxiously.

She sat down on the side of the bed and held one of Freeman's wrists. "I think he's getting better," she said.

They waited in silence and after a dragging passage of minutes, Freeman's eyes fluttered ever so slightly. A few minutes more and he looked up at both of them glassy-eyed.

"Tom—speak to me!" Marian shook his arm.

(To be continued tomorrow.)

SOVIET FLYERS REACH SEATTLE FROM HOMELAND

(Continued from page 1)

feet because of the fog and headwinds. The maximum elevation was less than a thousand feet. The plane skirted the shore, thereby increasing the distance almost twice the normal airline between their starting point and Seattle.

Work was to begin early today on the removal of the postcocks and substitution of land gear. A survey of the motors was expected to determine whether their stop here would be more than three days before the flight to San Francisco.

U. S. Agencies Aid

The aviators have received a special invitation to visit Henry Ford at Dearborn, they disclosed. Since their departure from Moscow the flyers have been in the air about 100 hours for the 10,000 odd miles.

Yesterday's flight from Waterfall was in some respects the most strenuous, the flyers agreed. Credit for their success was attributed to the cooperation they had received from various American government agencies, the navy, coast guard and weather bureau all receiving special commendation from the aviators.

Several thousand former Russians and others gave the flyers a noisy greeting as their plane flew low over the western hills into the naval air station on Lake Washington.

The Russian aviators want to talk with Henry Ford and President Hoover, they declared shortly after they landed.

"We hear a great deal in Russia about two famous American engineers—Ford and Hoover," one of the four flyers said. "We hope to be fortunate enough to meet both."

LEONA

(News-Review, Douglas, Copyright Special.)
LEONA, Oct. 14.—B. H. Lee of Rutherford, who had been visiting at the home of his son Glenn at Leona for a short time, left Saturday by stage for Medford, where he is to visit his daughter.

Mrs. W. J. Willey and daughter Lavonne motored to Cottage Grove Saturday to do some shopping and to attend to business matters.

Mrs. H. C. Edwards and little daughters Mary and Wilma have been quite sick with measles.

Mrs. Viola Booher made a business trip to Cottage Grove Saturday.
