Senior High P. T. A. Holds Interesting Meeting on Tuesday

The January meeting of the senior high Parent-Teachers' association was held in the study hall of the senior high school building on Tuesday evening, with Mr. Oliver Johnson, president, in charge. After a very interesting business meeting, a delightful program was presented, each number being given by a parent of the school. The most important item of the business meeting was the report of the ways and means committee in bringing up for discussion the sponsoring of a benefit program to aid the student body in their financial project for the year, which is the building of tennis courts for the senior high school. Mr. J. E. Dent, chairman of the committee, reported that he had had a conference with the Roseburg band and they were willing to aid the P. T. A. by putting on a benefit band concert. This seemed a feasible proposition and was accepted by the P. T. A. if satisfactory arrangements can be made with the band, and an early date in February will probably be set aside for this event. It is hoped that everyone in Roseburg will assist the P. T. A. in the Roseburg band in putting this over financially. Mr. J. E. Dent has donated the sum of \$10 to be applied on the building of these courts.

Mr. Victor Mielich, captain of the O. N. G., and Mr. H. A. Canaday, spoke on the advantages gained in manual work, and asked that the senior high parents become interested in this organization work by getting behind the guard in their activities. Mr. C. H. Arundel gave two delightful piano numbers prefaced with a little history of each number. Mr. Jones gave a most interesting reading, followed by two whistling numbers by Mrs. Lou's Kohlhaug. The program was closed by Dr. B. R. Shoemaker, who spoke on "The Common Cold and Diphtheria Immunity."

Glad Rags Reflect Revival of Romance

By BARBARA BEAUFORT Fashion Editor Associated Press Feature Service PARIS.—Romantic clothes are back in fashion. Psychologists of the haute couture explain it by the theory that post-war depression, which made women want to appear as inconspicuous as possible, is finally ended. Now, they say, things are going to swing the other way and every woman wants to dramatize herself in her clothes and intensify her personality to the utmost. Paris, always obliging, provides plumage for some high powered personalities in its latest offerings. There are wags, waltzes, little velvet jackets bordered with fur, to wear with long veiled princess frocks having fur hems. The same type of ensemble, also fur bordered, is made in chiffon and georgette crepe. The designer responsible for these romantic clothes, reminds one of the days when there was such a thing as "carriage trade," says that he hopes such words as seductive, enchanting and stunning will be revived in smartly dressed women's vocabularies. He wants to see women revive good dressing to a full time occupation.

GARDENS--and Other Things

By CHARLES A. BRAND The old geography said that the climate of Western Oregon was "mild and salubrious". In spite of the weather of the last few days, it is true, and especially true in the Umpqua valley. Someone said last night, "Why is it that the papers in their weather dispatches are always citing Grants Pass and Eugene and Pendleton and Hood River but never Roseburg?" And he felt slighted. When you think of it it is true, we are not mentioned as far as the weather is concerned in winter. An extraordinary testimonial to our "mild and salubrious" climate it is, it is extremes of temperature that get onto the front pages of the newspapers and we never have extremes either of heat or cold. That is the whole story, but think what it means in the comfort of living as well as to business.

To the gardener our even climate means a long growing season with quite a list of flowers that are annuals in other states living through the winter and developing into perennials. To the poultryman it furnishes as perfect conditions for egg production as can be found anywhere in the United States. In the industries this climate without extremes either of heat or cold gives a larger number of days per year when workers can be at their best, their highest efficiency, than any other section, with possibly one or two doubtful exceptions. If the people of the country knew these facts, how long would it take for the population of Douglas county to double? It is time to tell them, and one of the best ways is in personal letters to friends in the east. The chamber of commerce has leaflets that give information on almost any phase of life and work in the Umpqua valley.

Speaking of climate again, one of the reasons why we should keep complete files of our old garden magazines is that most of them are written for eastern conditions. The material in them that is timely and appropriate for New England or the middle west in January does not fit us here. We are about two jumps ahead of them in our garden work. So in January I turn back to the old March magazines and find them full of timely suggestions for January.

A California concern advertises the Mexican shell lily or Tigrida by saying that it multiplies rapidly and that surplus bulbs may be eaten, that they are delicious and that mice will leave toasted cheese to feast on them. That is all right. We prefer the toasted cheese, anyway.

Better Flowers, the garden club magazine, has an article this month on the Los Angeles school gardens. There are 173 of them and six so-called garden centers in which 25,000 children are given instruction each week. It is an article of especial interest to members of school boards and parent-teacher associations. Clayton F. Palmer, who is at the head of the work, states its purpose in the following words: "To lay an intelligent love of garden and plant life deep in the heart of the school child, enrich his own life so that in later years he will make a more attractive home for himself and support legislation looking toward better standards of living." No one can estimate the change that these gardening lessons will make in the face of the earth in another generation.

The Oregonian quotes an exchange as saying that Colonel Lindbergh "wing his way across the stormy Atlantic". Almost any day you can hear expressions fully as original on our own streets. For instance, "I and Hilda knocked it down and drag it out." And here is a queer one: "What would you rather do as a governor?" And the horse and buggy and meaning a tendency to shy and look sideways and dodge around any roadside proposition that didn't look familiar. So most of our gardens have lacked the peculiar beauty and fragrance that the lilies could and should have given them. Black mud and poor drainage have scared us out.

But there is hope. Robert McKay, who has a lily bulb farm with some 75,000 plants at Brockway, says there is, and Robert knows his onions—I mean lilies. All bulbs look like onions to me. Mr. McKay has been asked to tell the story of some one lily that he is familiar with each week, where it came from, what it is like, when and how to plant it. This will probably appear in the paper each Wednesday and should be of real value, especially to the skittish.

When the selection of a special Garden Club flower was being discussed of course the rose was mentioned first but there were those who thought the lily was the most beautiful flower that grew and should have the honor. The discussion showed that some of the best gardeners were rather skittish when it came to lilies—skittish being an almost obsolete word, familiar in the age of the horse and buggy and meaning a tendency to shy and look sideways and dodge around any roadside proposition that didn't look familiar. So most of our gardens have lacked the peculiar beauty and fragrance that the lilies could and should have given them. Black mud and poor drainage have scared us out.
