

MINERAL YIELD OF OREGON INCREASED DURING PAST YEAR

Douglas County Production of Copper Adds Heavily to Aggregate Total for Whole State.

The total value of the gold, silver, copper and lead produced from ore sold or treated in Oregon in 1929 increased from 296,446 in 1928 to about 452,900 in 1929, according to preliminary figures prepared by Victor C. Helges of the United States bureau of mines, department of commerce.

The total gold yield of Oregon increased from 19,977 ounces in 1928, valued at \$225,968, to about 18,400 ounces in 1929, valued at about \$380,300. This increase is partly due to the resumption of dredging by the Superior Leasing Co., in Baker county, making three dredges that worked in the state in 1929. These, together with one hydraulic operation and three gold lode mines, the Buffalo Monitor (Grant county) Robert E. (Curry county), and the Robertson or Progressive (Josephine county), accounted largely for the gold recovered in 1929.

No Silver Mines The silver yield of Oregon increased from 30,924 ounces in 1928 to about 37,700 ounces in 1929 and the value from \$18,091 to about \$20,000. No silver mines were in operation and the output of the metal came chiefly from gold ore mined in Grant county, which carried high values also in silver. Other than the silver won by the dredges the rest of the output came mostly from miscellaneous operations.

Copper From Douglas The output of copper in Oregon increased from 358,463 pounds in 1928 to about 710,000 pounds in 1929 and the value from \$51,819 to about \$127,000. Copper ores mined in Douglas and Josephine counties were the chief source of the copper yield of the state. A 50-ton mill was under construction at the Bandfield property in Douglas county, from which copper ore and concentrates were to be shipped the latter part of the year. Increased production by the Silver Peak M. & M. Co., was reported from its Idle property. At the Queen of Bronze and Cow Boy property in Josephine county a new tonnage of copper-gold ore of considerable extent was developed and much construction work was also carried on.

HIGH COURT REFUSES TO PASS ON LIQUOR PERMITS

WASHINGTON, Jan. 20.—Firms using intoxicating liquor in the manufacture of medicinal preparations failed today in their effort to have the supreme court pass on the authority of the prohibition commissioner in terminating permits granted under the prohibition laws.

"Rough Stuff"

A Kiss for Corinna

By MAY CHRISTIE

WHAT HAS GONE BEFORE Denise Van Wyck, bored with the life of a debutante, and Corinna Dugan, beauty parlor operator, are both in love with Malvey Craig, a clerk in the employ of Denise's uncle, Mr. Crisswell. Malvey protests to Corinna that he is not at all interested in Denise, but Corinna discovers them having lunch together. That evening Malvey calls on Corinna to explain about his luncheon appointment and tells her that she is the "only girl" for him. But even though she is convinced that he really loves her, the name of Denise Van Wyck continually comes up to mar Corinna's happiness.

NOW GO ON WITH THE STORY CHAPTER 20

Malvey and Corinna walked down Broadway. It was nine o'clock at night. The theatres and movie-palaces were packed. Immense crowds—a superfluity of pleasure-seekers—jostled them on the sidewalk.

It was as bright as day—nay, brighter! Enormous signs in jumping electricity flared against the incredibly tall buildings. Under the evening sky there rose a blazing medley—a kaleidroscope of color. As if all the factories in the world, each with her own rainbow tint, were forming a unit in a mad dance pattern.

Corinna had never got over her first wonderment and thrill at the Great White Way. Here was the pulse of life. Here one was jostled by every nationality.

The pleasure-seekers for the most part looked as prosperous. The girls were vivid, eager, making a brave show in their Spring finery. Under the white lights, the heavy make-up on their faces gave them a brilliant hard aspect, so that in this setting, even a babyish face looked worldly-wise, and older.

But to Corinna there was a tremendous fascination in this thoroughfare. Let it be called the wickedest street in the world. She never wearied of the endless show—the rush and thrill of it. And with Malvey at her side, pi-

ent from any girl I've ever known."

"How so?" Those Irish eyes of hers looked up at him inquiringly. They were fathomless, fern-fringed pools. Not even the bright lights of Broadway could get to the bottom of them.

"You work so hard and go with a lot of things that other girls are forever grabbing after. Yet I've never known you grabby. And you get such intense pleasure from the mere act of living. Little things please you so—"

She laughed gaily, although she wasn't quite certain of his meaning. Maybe he thought he foolish, childish and trivial? "Anyhow, give me credit for not being too expensive!"

"If I'd the money, you know I'd give you the whole earth!" Her thoughts mounted. He wouldn't surely say such things as that unless he loved her. The morning that had begun so badly was ending gloriously.

"To prove how I enjoy spending money on you, even if it's only 75 cents, I'm going to take you into the movies, here and now."

"They all seem so happy. It's so beautiful seeing people enjoying so intensely just being with each other!" "You little sentimental!" he laughed. "I believe you make up stories about all of them—romantic histories that are entirely opposed to the lives they lead in reality. Your feet simply aren't on this earth. In what enchanted dream-world are you wandering?"

"Perhaps I'm 'fey,'" she murmured happily, snuggling a little closer to him as she walked. "You know I'm partly Irish, and can't help being romantic. But if you like, I'll try to make a stern change in my character!"

"You darling thing!" He gave her hand a quick, warm pressure. "I love you exactly as you are." "God! WHY hadn't he got more money, he asked of himself, so that he could propose to her without waiting any longer? How wonderful it would be if he could have her with him just like this, for always."

She was like some delicate sweet instrument, vibrating to an inner harmony HE could not hear. As though she had a sixth sense... a spiritual force to draw upon. "Corinna, you're entirely differ-

ACCIDENTS KILL 2,229 IN OREGON PAST 15 YEARS

SALEM, Jan. 20.—During the fifteen and one half years since the state industrial accident commission was created and began to keep a check on accidental injuries or death suffered by men engaged in Oregon industries, enough men have been killed in this state to fill a large cemetery and the number injured totals more than the population of the city of Portland.

In actual figures the number of workers killed during that period totals 2,229, an average of more than 146 a year and the number injured aggregates 375,959, an average of more than 23,497 annually. The number injured includes the fatalities.

The trend of these industrial casualties is on the increase. For the year from July 1, 1928, to June 30, 1929, the number of fatalities was 200. For the six months period from July 1, 1929, to December 30, 1929, the number was 199, indicating that the record for industrial deaths for the year to close June 30 next will beat all records.

The above figures do not take in consideration the hundreds of persons injured each year while engaged in industries that do not operate under the provision of the workmen's compensation act which

NORRIS ANSWERS ATTEMPT TO OUST HIM FROM PRIMARY

WASHINGTON, Jan. 21.—Commenting on an announcement from Lincoln that Willard Clapp had filed a protest against his certification as a candidate in the Nebraska senatorial primary, Senator Norris, republican, Neb., yesterday issued the following statement: "I am not finding fault with Mr. Clapp for filing a protest. It's perfectly proper and I am anxious to have it decided if officials of the state are going to decide that a man can't select his own political party then it's time I found out. I've assumed I have a right to decide that question for myself."

"If I haven't the right, the quicker I know it the better. If my record in official life is such that on account of it I must be expelled from the republican party, then not only I but millions of other people want to know it."

Have you seen the new Oakland 8 1930 model now on display? This car has a motor in it same type motor as Cadillac and Lincoln but sells for \$1295 fully equipped. 2-door sedan.—Adv.

Here's the Beauty about Avon Spray Emulsion

THERE'S a wide margin of safety where severe scale infestation calls for an over-dosage of Avon Spray Emulsion. Here is an added feature of this fine oil spray, refined by Associated from selected crudes. It gives more assurance to growers whose trees are more heavily infested than average. It's as near positive as a pest control can be. The use of Avon Spray Emulsion is increasing in every section of the West—gallage increased 383.7 per cent for 1929 over 1928. More than 30,000 acres in choice deciduous orchards are already under the control of Avon Spray Emulsion. Get "Finer Fruit and More of It" with AVON SPRAY EMULSION. Call at the nearest Associated plant, or better yet, ask our Associated Spray Advisor to drive out to your orchard. No obligation.

Who Makes Your Fire Insurance Rate? Trained experts compute it; but property owners—individually and collectively—create the conditions which determine the cost of their fire insurance. Several major factors enter into the determination of fire insurance rates, such as structure, occupancy, the quality of private and public fire protection, exposure from other property and general loss experience. Surveys Available The agent who writes your insurance—or your broker—or you, yourself—can obtain an itemized explanation of how your insurance rate is computed. There is nothing secret about it. The Stock Fire Insurance companies solicit your interest, and offer free of charge the advice of rate-making bureaus to assist in eliminating hazards or correcting defects which may result in lowering your rate. Seek Counsel Do not attempt unsound fire prevention measures, but seek the counsel of the accredited experts of rating bureaus who are anxious to tell you the proper way to make improvements. Insurance companies generally prefer risks eligible to a low rate to those which carry higher ones. A low rate indicates better conditions, better maintenance and less chance of fire. While the National Board of Fire Underwriters has nothing to do with rates or rate-making, as a bureau of standards it does publish information which rate-makers use to measure the comparative strength and usefulness of materials and devices. Fire Insurance Rates in Oregon are computed by the Oregon Insurance Rating Bureau, established by law in the interest of uniformity. The Bureau has offices in Portland.
