

GERMAN DOCTOR AND WOMAN TEST RAW FOOD THEORY

Man Has Teeth Pulled and Discards Inheritance; Pair Stranded on Lonely Isle.

(Associated Press Special Wire)
BERLIN, Jan. 30.—When the Macdonald scientific expedition in the Galapagos islands recently came upon Dr. Charles Ritter and a woman companion stranded there for the past five months, the Chicago scientists stumbled upon a raw food, back-to-nature experiment that has interested Germany greatly.

Dr. Ritter, whose home is in Berlin, was given a year's supplies by the Macdonald expedition and the chance of the chance meeting was revealed in the United States Tuesday.

Dr. Ritter is a proponent of raw food therapy. The German press today published details gleaned from friends and relatives, indicating that, estranged from his wife, disgusted with European civilization and anxious to try his theories on food and the simple life, he left Hamburg in July, 1929, for Ecuador with a woman companion of his theories, Frau Koerwin, from Guayaquil the couple proceeded to Charles Island of the Galapagos group in a hired sailboat.

A dispute in the island led to reports that he had been receiving letters with more or less regularity indicating that Dr. Ritter was still interested in his experiment and had no intention of returning to civilization. So intent was the doctor on the experiment, said the relatives, that he even had his teeth pulled and false ones made so as to avoid any possibility of having to come home because of a toothache.

Relatives declared that Dr. Ritter's wife had given full approval to the voyage of her husband and Frau Koerwin, who is a sister of Ritter's, was a former patient of the doctor. Frau Koerwin was so enthusiastic over the doctor's raw food theory that she volunteered to accompany him as an assistant and to try out the diet to determine its effect on a woman.

Dr. Ritter was said to have sacrificed all his possessions, to finance his present trip, even liquidating an inheritance before it was paid out to him.

A Kiss for Corinna

By MAY CHRISTIE

WHAT HAS GONE BEFORE

Denise Van Wyck, bored with the life of a debutante, and Corinna Duman, beauty parlor operator, are both in love with Malvey Craig, a clerk in the employ of Denise's uncle, Mr. Crisswell. However, only the lack of money prevents Malvey from asking Corinna to marry him. And although Corinna knows that he is in love with her she cannot help being jealous of Denise, who is pursuing Malvey. They meet her one night at the Charity Ball, where she cruelly snubs Corinna and promptly annexes Malvey. Denise has enlisted the aid of her friend, the Countess de Santalvos, in her pursuit of Malvey. The Countess expects Gamberetti, a famous singer, at her home one evening, and Denise has invited Malvey to go with her to hear him. Malvey arrives early at the Countess's home, and the Countess, attracted by him, sets out to fascinate him herself.

NOW GO ON WITH THE STORY CHAPTER 23.

"Women," said the Countess de Santalvos, leaning back on the rustic bench beside the fountain in her little New York patio, "even when they're surrounded by people, often are extremely lonely. They crave a kindred soul—someone who MEANS something to them."

The young man was sympathetic. He said: "Your husband died—?"

She parried that. The romantic aura might be shattered were she to let him know—at this point—that she was divorced.

"He's gone," she murmured. (Which was true in some ways.) She added, pathetically: "That sort of thing leaves one so AWFULLY alone."

"But you must have a great many friends!" suggested Malvey, "and with all this about you"—he turned toward the lighted studio, which seemed big and warm and beautiful and friendly, "don't you think you're a great deal luckier than most?"

She sighed. She dropped her voice to a mellifluous whisper: "It's so artificial. Something is missing. Isn't there a quotation somewhere about something that 'gives a sublime rhythm to a woman's life'?"

This was pure Greek to him. He felt embarrassed. "I'm afraid I'm no great shakes at literature."

She took another deep draft of the cocktail. It was her third drink, but she needed inspiration. Before Denise arrived she must get in the good work.

"The 'sublime rhythm' means love," she volunteered, fixing her small and rather beady eyes upon him.

Malvey, who had imagined the "sublime rhythm" must mean jazz, was silent and awkward.

She wanted to impress him with her delicacy of feeling. Her emotions, she explained, had all the fragility of a butterfly's wings. "Life does such things to one!" she sighed, moving a little nearer him, "and it's so hard to keep one's illusions."

Now Malvey was a simple young American and he never dabbled at all in feminine psychology. Corinna was much too young and busy to be neurotic. He felt at a loss.

It was quite true that life had done a good many queer things to the Countess de Santalvos—and a lot of those things wouldn't bear investigation.

She summoned Vago with more cocktails. She wanted to give her emotions yet more freedom and hoped that the drinks would have a similar effect on this somewhat bashful young fellow.

She had been studying Madame Tilly of late, but had forgotten her instructions that the surest way to talk about himself is to let him talk about himself.

He wanted to tell her about Corinna. But he was vaguely conscious that she was making it difficult for him to do so. He was vaguely conscious that she was making it difficult for him to do so.

He was vaguely conscious that she was making it difficult for him to do so. He was vaguely conscious that she was making it difficult for him to do so.

He was vaguely conscious that she was making it difficult for him to do so. He was vaguely conscious that she was making it difficult for him to do so.

ELIMINATION OF UNNECESSARY COST, AIM OF GRANGERS

Plan Launched for Bigger Profits to Producers and Less Expense to Consumers.

A plan coordinating with the "follow your product to market" project, now being discussed by producers of the state, has been put into operation by Fred Goff, chairman of the state grange agricultural committee. Granges in other states where Oregon's major projects are marketed are being asked to cooperate with the Oregon grange in checking the markets to secure an effective system and elimination of intervening costs.

Producers have been growing greatly interested during the past year, particularly since the increased interest in cooperative marketing, in tracing their goods through to the market. An effective example of this policy was seen this year when Herbert Beyers, local manager of the Douglas Cooperative Turkey Growers, accompanied shipments to San Francisco and Los Angeles where he worked with the wholesalers and retailers in handling the birds and making a first hand study of the market situation, bringing back many valuable ideas that will aid the association in handling its turkeys effectively in the future.

Frank Norton, local canneryman, has also been using the system in recent years and is now in the eastern states meeting with his brokers and checking up the market end of the business.

Poster Butner, local broccoli grower, is another who has made similar studies.

It is plainly not possible for each producer to follow his product through to the market, so an effort is being made by Mr. Goff to arrange for cooperative work between the granges. He is writing letters to masters of state granges in other states asking that committees be appointed to visit the markets where Oregon products are sold and report back to the Oregon state grange.

These committees are asked to report on the quality of the commodity on the market, the retail price, display methods, value of advertising brands, adverse or favorable criticism heard from consumers and any other such information or suggestions as may aid the local producers in providing a more attractive and marketable product.

The study will also include the matter of competition. An effort will be made to learn where two or more Oregon counties are competing against each other in certain lines.

est girl in the world, and her name is Corinna."

"And you're in love with her?" But of course, she laughed out a steadily. "You must bring her to see me. She's lucky!"

There was one comfort in it anyhow, thought she. It would be a setback for Denise to know about this girl Corinna!

Amusing how Denise had made her invite the young man here so that she could start an affair with him!

She said: "It's wonderful to meet anybody in love. I've often thought I was, but the love never lasted."

From behind, there came a high, shrill laugh. Radiantly pretty, Denise Van Wyck stood in the lighted windows.

"Mooning away by the fountain!" she exclaimed as she advanced swiftly toward them. "Poor Malvey is so romantic. With her, love is like measles—all the worse when it comes late in life! And she does get it so badly!"

Wharton's Weekly

Vol. 1 Roseburg, Oregon, Friday, Jan. 31 No. 9

Editorial
Sunday is Ground Hog Day. Doesn't it seem to you that this year's winter has been a little longer than last year's? Let us hope it doesn't see his shadow because we don't want six weeks more winter like the past three or four have been.

"The ladies that just passed were Mrs. John Doe and her niece. Her niece is rather good-looking."

"Don't say 'niece' if you mean 'niece'."

The Vaughan garden tractor will plow, cultivate, dig and harrow. It will also pull a wagon or sled. See the new one on our floor.

Things we sell for the garden:
Garden seeds in bulk or packages.
Bermuda on 100 plants.
Onion sets.
Fertilizers—5 kinds.
Peat moss.

Hot-kaps:
Snail poison.
Gopher poison.
Mole traps.
Poison pills for attacking plants.
Aphid spray.
Spray.
Dust.
Tree labels.
Pot labels.
Trowels.
Hand weeder.
Shading forks.
Rakes and hoes.
Seeders.
Hand cultivators.
Seed inoculation.
Lawn seed.
Pruning shears.
Fencing to keep the chickens out.

In fact we sell everything to make the finest vegetable or flower garden in the world except the will power and the elbow grease.

We have quite a complete stock of garden seeds in bulk or packages. See us your orders.

Diner—Say, I never saw such corn. Take it back. It isn't fit for a jackass to eat.

Waitress—Very well, sir; I'll get you some that is.

Myra's power spray pumps run in oil. Every working part is enclosed from the spray. We will completely outfit or a separate pump to put on your old sprayer.

The McCormick Deering 14-hp. includes full-powered engines with removable cylinders, enclosed crankcases, magneto ignition, efficient fuel mixer, etc.

Judge—What is your name?
Prisoner—Joshua, your honor.
Judge—Oh, Joshua! Ate you the Joshua who made the sun stand still?
Prisoner—No, your honor—I'm the Joshua who made the moon shine.

EXPERT OUTLINES RODENT CONTROL IN DIXONVILLE TALK

At a fairly well attended meeting Wednesday at the O. C. Brown farm near Dixonville, J. F. Branson of the U. S. biological survey, gave interesting and instructive information concerning the control of rats.

According to Mr. Branson, barium carbonate, red squill, and thallium are the three poisons which have given best results in controlling rats.

These materials when mixed with a variety of baits, such as cereals, meats and vegetables, have been found to be very effective. Barium carbonate is mixed in the proportions of 1 part to 4 parts of the selected bait. Red squill is mixed dry—1 part by weight of powdered red squill to 10 parts of the cereal or other material used. Peanut butter makes an attractive bait.

Thallium is an especially effective poison for rats but must be used with care as it is a cumulative and powerful poison and certain in its results. It is without taste or smell and dangerous to human beings as well as to domestic animals.

"Poison baits should be distributed systematically and with care in various places where rats are known to be present," Mr. Branson advised.

A convenient and successful method of exposing baits is to wrap teaspoonful quantities in small pieces of newspaper or place them in paper sacks and close by twisting the tops.

"When a variety of baits is used wrap each kind separately and expose one of each kind in groups to give the rats a choice of material."

"Baits are best distributed in the evening so that they will be fresh when the rats are feeding. If poisoning is carefully done a high mortality may be expected, but should the poisoning operations not be wholly successful it is well to repeat the work or two until eradication of the pest is accomplished."

Detailed instructions for poisoning rats are given in Farmers' Bulletin No. 1535, entitled "Rat Control," which is available for free distribution at the office of the county agent.

Control Method Success
Nelson brothers, operators of a large poultry plant, east of Roseburg, successfully eradicated the rats from their poultry establishment under instructions received from the county agent's office.

Rats had been particularly destructive about the poultry plant, eating feed and in some years killing as many as 100 baby chickens. Poison was secured and baits spread in accordance with instructions, with the result that over 200 dead rats were found about the premises. Rats not killed by the poison decided that the Nelson brothers' poultry plant was an unhealthy place to live and the few remaining ones were frightened away, resulting in an almost complete cleanup.

**RUSSIA ORDERS
CONFISCATION OF
ALL CHURCH BELLS**

MOSCOW, Jan. 30.—Moscow's "forty times forty" churches, which for a thousand years have pealed their bells, no longer will be heard; the government today ordered them silenced forever.

An official statement explained the action as taken in response to "the mass demands" from workers that the bells be hushed because they disturbed their peace and sleep and created other nuisances. Similar ordinances are already in effect in other cities and towns and it is believed that today's action applying to the red capital forebodes ultimate scrapping of all church bells and their conversion into commercial bronze, copper and silver, so much needed by the government in its industrialization plan.

**CABINET RULE TO
BE DEBATE TOPIC
OF STATE SCHOOLS**

EUGENE, Ore., Jan. 31.—(AP)—Seventy-eight high schools throughout the state have entered the Oregon high school debating league, which is sponsored by the extension division of University of Oregon. It has been announced by Percy M. Collier, executive secretary of the league and extension lecturer.

The topic contestants are using this year is: "Resolved, that Oregon should adopt the cabinet form of government proposed in senate joint resolution No. 16 passed by the thirty-fifth legislative assembly of Oregon."

Schools in the league have been divided up into 11 districts in which schools of that district will hold a tourney to determine the sectional champion. Then the district winners will compete in the finals which are scheduled to take place in Eugene on May 30.

The debate league was started 22 years ago by E. E. DeCou, professor of mathematics, who is known as the father of the league. He and Mrs. DeCou offered a cup for the state champion. Two more cups have been offered since by Hurl Brown, Bazel, vice president of the university. One of these goes to the eastern Oregon champion, and the other to the western Oregon winner.

Hermiston high school, with a student body of 110, won the state championship in 1929.

**THREE ACCUSED OF
MAULING DRY AGENT**

(Associated Press Special Wire)
SEATTLE, Wash., Jan. 30.—While a state-wide hunt was under way for James Williams, two women and another man who were accused of aiding him in kidnapping and brutally beating Daniel Dunning, under cover prohibition agent from Spokane, came yesterday, were released under bonds today.

Mrs. Eva Williams, wife of the missing man, said her husband became infuriated when Dunning seized her coat sleeve and tore it in trying to arrest her. Mrs. Caroline Baze said she and her husband, John Baze, thought it was a holdup when Dunning stepped into Williams' car.

Bonds for Williams were set at \$10,000. Baze was released on posting \$7,500. Mrs. Baze on \$1,000 and Mrs. Williams on \$2,000. They all face federal felony charges and maximum sentences of eleven years imprisonment each.

Arrested, piano tuner. Phone 189-L.
