ART OF SEASONING FOODS TAKES NEW TURN

The Idea Appeals to Cooks With Imagination

The trend in present-day cooking is to emphasize the distinctive flavor of the food rather than change it. Sugar plays an important role in this new departure in cookery.

The value of sugar in heightening flavor is most apparent in cooking familiar vegetables such as string beans, carrots, peas, beets, cabbage and spinach. In addition to improving the flavor, the sugar maintains the garden-fresh color of the vegetable.

A dash of sugar to a pinch of salt is a general rule to follow. Some cooks keep a mixture of sugar and salt on hand—equal parts of each, or two parts sugar to one part salt depending upon the taste preferences of the family. For a pleasant surprise try this combination in making French dressing.

Doctors and dietitians are in favor of flavoring vegetables and fruit with sugar because it makes these essential foods with their vitamins, mineral salts and roughage more palatable and enjoyable—especially to children. Most foods are more delicious and nourishing with sugar. The Sugar Institute.
