

Sunday at the Churches

Glendale Presbyterian Church. J. K. Howard, pastor. The Sunday school begins on making records in attendance. Where will it stop? Life and enthusiasm characterize the organization. Come join a class, it is worth your while. The subject of the sermon for Sunday morning will be "Stewardship." At night it will be "From Religion to Life." There are two sides, but which is the right side? A distinguished clergyman has said recently that the greatest need of the church today is for the church to go to church. Do you believe him? Our singers, including both choirs, are at work on an Easter cantata to be given on Easter eve, April 29. Mr. Lash is director and all have entered into the work with a real zeal. Evidently a musical treat is in store for the community. The Ladies Aid society is to have its regular meeting on Friday afternoon at the residence of Mrs. Roy Cunningham. All the ladies are invited to attend.

Beginning next week the pastor expects to be back in his study every forenoon, except when church business may call him out. Sickening has delayed the pastor's plans, but hope to go forward now without interruption. Any who are without a church home call 454 and the pastor will gladly call on you. "The Son of Man came not

Vol. 1 Roseburg, Oregon, Friday, Mar. 14, 1930 No. 15

We are so busy this week shining up the farm machinery for the big show tomorrow and getting the hot dog sandwiches ready that we had no time to write poetry, jokes, etc., for this column. Don't miss seeing the farm equipment display.

"200 More Miles"

in this super oily oil for high compression cars.
Buy it at Union Oil Company stations or where
you see the Motorite sign.

200 EXTRA MILES WITH MOTORITE

The OILYMER (left) is a remarkable instrument. It measures the slipperiness of oil. The plate portion of the Oilymer has a polish comparable to that given optical lenses and as such is accurate to the 1/2 wave length of light.

When submitted to the Oilymer test, MOTORITE proves itself to be one of the oiliest of the oils. This is important to you because super oiliness assures an ever-present, slippery, lubricating film in the 1000 space between the piston rings and cylinder walls of your high compression motor when the engine is hot.

Another advantage is that MOTORITE resists dilution by "giving up" stray gasoline, quickly, in the form of vapor—without sacrificing the lubricating efficiency, or "life" of the oil.

Also, MOTORITE has a great capacity for giving up and carrying away heat. This feature assures cool bearings, and is noticed particularly when traveling long distances at sustained high speeds.

The small amount of carbon deposited by MOTORITE is soft and fluffy, much unlike the hard, gritty carbon common to a great many oils. This means no clogged or sticky valves due to carbon—less wear on your high compression motor.

And So It Lasts Longer!

Tests in the standard makes of automobiles prove that you can easily get 200 extra miles out of a crank case full of MOTORITE. Now, with MOTORITE you can drive at 200 miles farther than you have been in the habit of doing.

25c a Quart

Make a note on your dashboard sticker NOW to refill with MOTORITE. It's available at any Union Oil Service Station or wherever you see the MOTORITE sign. Remember the name... MOTORITE... unexcelled in quality yet only 25c a quart.
