HEAVY RAINS AID GRAIN IN OREGON; SOME FRUIT HURT

PORTLAND, Ore., June 6.—West of the Cascade mountains and in the principal wheat growing counties in the northeastern portion the rainfall was sufficiently heavy to be of material benefit to vegetation, the United States department of agriculture's weekly report said today.

The crop report detail follows:

Cereals: All small grains in the northeastern counties and west of the Cascade mountains were benefited by the rain of the week. Winter wheat is heading well and is generally promising, but there is local complaint of thin stands, excessive weediness, and slight frost damage. The weather has been much too cool for corn.

Fruit: Ripening of strawberries has been delayed by cool weather, but berries are large and mostly of good quality. Cane fruits show much winter killing in localities, but have been helped by frequent rains. A few early cherries are in market. Codling moth control has been hampered by unusual temperature conditions. Thinning is in progress.

Meadows, pastures, and ranges: The weather has been too cool for rapid growth of alfalfa and clover, and haying has been retarded by rain, but for the most part hay crops are good. Vetch is in bloom in the Willamette valley. In southern counties most of the first crop of alfalfa is in the stack. Conditions have been unusually favorable for pastures and ranges.

Livestock: Cool weather continues to delay shearing, and has caused some suffering of newly sheared sheep. Otherwise stock is doing well.

Miscellaneous: Tomatoes, melons, and beans need warmer weather. Potatoes are doing well. Wet soil makes cultivation difficult. Some flax remains to be sown.

TODAY'S MARKETS

PORTLAND, June 5.—Butter prices displayed a considerably firmer undertone today, but no changes were announced in quotations. Supplies were less than previously and demand for storage appeared brisker. Premiums were reported paid by some for 92 score product.

Because of low prices, there has been a good demand for eggs, but not sufficient to absorb all the supplies. Prices continue irregular.

Reviewing the fruit and vegetable situation, the Portland bureau of the U. S. department of agriculture says:

"The summer fruits and vegetables—melons, berries, cucumbers, etc., are meeting with rather slow demand this week; meanwhile, the cool weather standbys, as apples and potatoes, continue in good demand. Rain has delayed strawberry ripening again, and receipts are light. Production will increase again with warm weather, though.

"The potato market shows fair activity, and new California stock shows a stronger undertone, with a few sales at higher prices. In California, northwestern Netted Gems are selling higher than new potatoes. At Portland however the new potatoes are still a trifle higher.

"The first carlot shipment of mixed vegetables this season was loaded fro mPortland yesterday. A car of peas were loaded today, and Oregon's first cherries were forwarded yesterday, with two carlot shipments.

"Hothouse tomatoes are suffering from the present liberal supply of southern outdoor stock. Hothouse prices have lowered, to meet this competition."

in a cigarette it's Taste

KNOWING WHAT TO DO—and *doing* it—that's what carries a man up . . . and a cigarette, too.

PUTTING FIRST THINGS FIRST—good taste, uniform quality, aroma, flavor — Chesterfield's popularity is built on knowing what smokers want . . . and giving it unfailingly.

TASTE—THAT'S THE ANSWER and that's what smokers get in Chesterfield in fullest measure—the flavor and aroma of mellow tobaccos, exactly blended and cross-blended, all to a single, satisfying end . . . "TASTE above everything".

We state it as our honest belief that the tobaccos used in Chesterfield cigarettes are of finer quality and hence of better taste than in any other cigarette at the price.
