A. C. Marsters For Governor

THE time has come in state politics to cut a new deal. If any conclusion at all can be reached so soon, it is that the new nominee who must carry the republican banner to victory this fall should not be chosen from the ranks of former candidates.

The man chosen must be clean, aggressive and a fighter. Who would better answer these qualifications than our own A. C. Marsters?

Mr. Marsters has devoted many years to public service and at the present time is president of the state fair board. As a result of his success in this position he is known all over Oregon as a capable executive and a man of exceptional ability where public matters are concerned.

Republican leaders of Douglas County seem to have concentrated upon this thought of securing the nomination for Mr. Marsters.

It is assumed now that Dr. E. B. Stewart, central committee man from this district, will carry the instructions of the county committee to propose and vote for Mr. Marsters.

Other state committee men are being contacted by the Douglas county men and the suggestion of running Mr. Marsters has reached the proportions of a boom.

Mr. Marsters would make an excellent governor.

Oregon Editors' Opinions

No Primary Candidate Should Be Named (Medford Mail-Tribune)

HEAVY responsibility rests upon the members of the republican state central committee, in the selection of a candidate to take the place of Senator George Joseph.

The Mail-Tribune, in the recent primary, supported Senator Corbett because in our opinion, he was the man best qualified by character and attainments, to successfully conduct the affairs of this state.

In our opinion, to work for any candidate who was as badly beaten in the party primary would be a grave mistake, both politically and from the standpoint of the state's best interests.

The selection of the republican committee should be a man behind whom the members of the party can unite, and with whom the animosities of the campaign can be forgotten.

To select any candidate, who appealed to the recent primary and was defeated, would be to saddle the republican party with the burden that primary imposed.

The supporters of Harry Corbett should join with the supporters of Governor Norblad, and the supporters of all the other republican candidates, in uncompromisingly opposing any such action.

Assurance was given Astoria by combined interests at the time that finances would be available for the project upon completion being obtained. Now that the way is clear to go ahead Astoria is wondering if the backers will come forth and make good.

His essential worth as a citizen of this state, and his abilities to discharge the duties of chief executive, with credit to himself, his party, and his commonwealth.

view bridge has been opened to the public, and its rumored unsatisfactory tolls are not encouraging to those who might be inclined to finance more toll bridges across the Columbia.

Astoria is looking forward to the completion of the coast highway, when the bridge will be justified as a link in that artery of travel along the coast line.

Probably it is the fact that Salem schools are so well managed that taxpayers neglect the financial meetings, thus showing their confidence in the board.

Automobiles have increased the sale of trousers and cut the sale of shoes is a trade announcement.

A scientist says that most men use only a portion of their brains. Ain't science wonderful? We thought they didn't use that much.

Knickers were invented so that men in their second childhood could get back into rompers.

You're Right—Many an old maid now longs for the good old days when she used to be insulted on the street.

Ode to an Artist's Model—There's a nary a slip 'twixt the neck and the hip.

Justifiable Homicide—When a suspicious wife goes down to her husband's office at eleven-thirty in the evening and discovers that he's really working.

Financial Note—The man who says he gets no dough to speak of is probably receiving hush money.

Moribund Moments—When a crystal gazer stares into his girl's glass eye.

Your Own Vaudeville—Occulist: You say your husband is near-sighted? Wife: Yes, the poor fellow has insomnia and has to count elephants instead of sheep.

From Garden Valley—Mr. and Mrs. F. G. Ewens were in from Garden Valley Thursday, transacting business and visiting friends and relatives.

WE are just beginning to realize the full importance of early training. Education must begin at birth and be most intensive during the first five or six years of a child's life.

The parents must see that a child is properly fed and clothed. He must be trained to right habits of living. It is the period of character formation, and the spiritual values must not be overlooked.

The mind of a new-born baby is like an unexpunged film. Beginning with the very first days of a child's life, the mind records impressions received through the five senses.

Child psychology has taught us many things. The understanding of a child, his mental development, his moral and spiritual training, his behavior, his health and tray are all matters better understood today than they ever were before.

Your baby's health is of paramount importance. Methods of bringing up babies have narrowed in the past generation. The child who does not thrive well should receive individual care and training.

Every mother should give her child the benefit of the wider knowledge on child care which is accessible now as never before.

Advice to Girls

By NANCY LEE

DEAR ANNIE LAURIE: I am twenty-nine and am married and have been a long time. My husband is very good to me and my boys but he drinks so I truly love him when he is sober but when he is drinking I hate the very sight of him.

Living conditions in every community are improving slowly but surely. Everyone must help in making the world better. The water supply, milk supply, housing conditions, cleanliness of the streets and atmosphere, playgrounds, park systems, industrial conditions, hospital facilities, wages of the breadwinners, availability of medical and nursing care—all these must be made safe and sure.

Answers to Health Queries: MR. D. Q.—What is leucoplakia and how can it be cured?

LAZY LADY. Q.—What would cause a tired, lazy feeling, accompanied by yellow, streaked eyes, pains around the shoulder blades, a feeling of dizziness and a queer sensation as if I were rocking from side to side. I have quite a few pimples and fever blisters on my lips every few weeks.

WOLF CREEK WILL CELEBRATE JULY 4: Plans for a Fourth of July celebration at Wolf Creek of its junction with Little river are going ahead, according to an announcement this morning by John Alexander, chairman of the committee in charge of refreshments.

DOUBLE DEFEAT DROPS SENATORS IN COAST LEAGUE: Sacramento losses took the spotlight in the Pacific Coast league yesterday as the Senators dropped two games to Seattle, by 3 to 2 and 9 to 7 scores, and Owner Moreland announced the sale of outfielder Hoag to the New York Yankees.

will increase enormously the amount of leisure time on people's hands. That will bring another problem, which is this: What will be done with this enormously increased total of leisure time?

If you have children, especially young children, you know something of this problem. They are all right while they are in school, and busy, but when they get OUT OF SCHOOL, and have leisure time on their hands, your troubles begin.

When human beings work FIVE hours a day, instead of EIGHT HOURS, they will face the same problem that is faced by children just out of school in the summer. They will have to learn USEFUL ways of occupying their new leisure time. If they don't learn USEFUL ways of occupying their leisure hours, they will GET INTO MISCHIEF.

It will be just as true then as it is now that Satan will find work for idle hands to do.

LOOKING forward to this time when your grandchildren will have enormously increased leisure, which will get them into MISCHIEF if they don't learn how to occupy it USEFULLY, don't let anybody talk to you about weakening the schools.

A liberal education helps tremendously in making CONSTRUCTIVE USE of leisure time.

AND don't let anybody tell you that the world has outgrown RELIGION. Religion and MORALS go hand in hand, and unless people's morals are kept sound this greatly increased leisure which is coming to them will RUIN them.

AND so we are brought back to the airplane, and the possibilities of cheap and swift travel which it opens up.

Travel, with its opportunities for observation and education, is one of the VERY USEFUL ways of occupying leisure time.

THE American Association for the Advancement of Science is meeting in Eugene this week. Science, you know, is organized facts. And it is organized facts, and the study of them, and application of them to the everyday affairs of life, that is making possible all of this mechanical advancement, with its increase of leisure time and its widening of the horizon of the average human being.

SCIENCE, as you probably know, was founded by Aristotle, more than 25 centuries ago.

Under the patronage of Philip of Macedon, Aristotle began the pro-

cesses of research and set about the organization of facts.

HERE is a fascinating thought: If the work of Aristotle had continued uninterrupted throughout all these 25 centuries, those marvelous fruits of progress which our great grandchildren will be enjoying might be AVAILABLE TO US NOW.

BUT Aristotle's work DIDN'T continue uninterrupted. Why? Here is the answer: BECAUSE OF WAR! It was war that intervened and quenched this spark of genius which was lit by Aristotle and his workers, and overthrew the Greek civilization and brought on a thousand years of barbarism.

Remember that it was WAR that stopped the progress that was started by Aristotle. Remember that WAR, if it should flame out again and involve the whole world, might STOP THE PROGRESS that we are making now and plunge our great-grandchildren into barbarism.

Remember that it was WAR that stopped the progress that was started by Aristotle. Remember that WAR, if it should flame out again and involve the whole world, might STOP THE PROGRESS that we are making now and plunge our great-grandchildren into barbarism.

IMPROVEMENTS AT LIBRARY DECIDED ON

An oil heating system is to replace the present steam heating plant in the Roseburg public library building, according to a decision made at a meeting of the board of directors yesterday.
