News of Progress

DID you notice the main headlines of this newspaper yesterday? The big heading was: "SENATE PASSES BILL FOR VETERANS' HOME" and a smaller heading stated: "Egg packery assured for Roseburg."

A little over a year ago the idea of obtaining the establishment of a national soldiers' home was conceived by W. C. Harding, secretary of the chamber of commerce, and he began work at once to see what could be done.

Reporting the agitation for such a convention, the political editor of the Oregonian asserts that "such a convention would be close to the grass roots in representing the party sentiment," arguing that inasmuch as the precinct committeemen are elected by the voters of each precinct they most closely represent the political ideas of the rank and file in the party.

Such, however, is not the case under the primary nominating system in vogue in Oregon, where the office of precinct committeemen is ranked in importance along with dog-catcher except in such a situation as has grown out of the untimely death of the party's nominee for governor.

As evidence of the indifference exhibited toward the office of precinct committeemen it will be recalled that in a recent election less than 15 precincts in the 80 in Marion county had more than one candidate seeking the job of committeeman; in two precincts there was no election of committeemen by the republicans for want of candidates, and in 16 precincts the elected committeemen received less than 16 votes each.

The facts leading up to the establishment of an egg packing plant here are equally interesting. With the rapid growth in the past few years of the poultry industry in Douglas county there has been felt an increasing need for packing facilities here.

While we are talking about good news in headlines we have to give consideration also to some bad news in the paper yesterday. The local cannery and the Sutherland cannery have been placed in the hands of a receiver.

Theodore Hatwater has been designated deputy state forester. Hatwater will probably be of considerable value when the forest fire season sets in.—Astorian.

the same resulting in a tremendous loss.
Taken all in all, conditions here in the Umpqua valley are fairly good and judging from the news in yesterday's paper, they are going to be much better.

Oregon Editors' Opinions

Close to the "Grass Roots" (Capital Journal)

CERTAIN interests in Portland, alarmed by the fact that Multnomah county with approximately one-third of the voters of the state will have but a single vote in the selection of a candidate for governor by the republican state central committee, are proposing that the actual selection be delegated to a convention composed of all republican precinct committeemen in the state, and that the state committee simply ratify that choice.

Reporting the agitation for such a convention, the political editor of the Oregonian asserts that "such a convention would be close to the grass roots in representing the party sentiment," arguing that inasmuch as the precinct committeemen are elected by the voters of each precinct they most closely represent the political ideas of the rank and file in the party.

Such, however, is not the case under the primary nominating system in vogue in Oregon, where the office of precinct committeemen is ranked in importance along with dog-catcher except in such a situation as has grown out of the untimely death of the party's nominee for governor.

Maybe I'm Wrong

By J. P. MEBURRY

A GUNMAN went back to his apartment the other evening and shot his wife. He said he was doing his home work.

Conjugal Courtesies—A wife is entitled to one day off a week the same as any other servant.

Pitiful Cases—Blowing your finger off with a fire-cracker just after you've spent seventy-five cents for a manicure.

Take It or Leave It—The modern girl never sees many surprises. She goes to bed a little too early.

Today's Tightwad—The tourist who went all the way to Oberammergau to see the Passion Play and then wanted his money back because it wasn't the original cast.

You're Right—You don't have to be an evolutionist to look under the dresser for the missing link.

Justifiable Homicide—When you catch an egoist standing in front of a mirror pinching himself because he thinks he's too good to be true.

Excuse It Please—The month and year of a girl's birth doesn't seem to have any bearing on her age.

Wonders of Nature—Telegraph companies are now hiring men with palsy. They make wonderful operators.

Our Own Vaudeville—Reporter: Did you give the bride away? Father: No, I just loaned her to him.

Advice to Girls

By NANCY LEE

DEAR NANCY LEE: I am a girl in my early teens and have been going with a boy the same age as I. About two months ago he stopped coming to see me.

PUZZLED: I am afraid I cannot give you the advice you ask. But I do ask you to have a talk with your friend and find out just what has occurred to disrupt your friendship.

DEAR NANCY LEE: I am a girl who will be 17 shortly. If a boy friend gives me a present in a car, should I open it then when he is there or wait till he goes?

METHODISTS WILL APPOINT TOMORROW Whether or not the wishes of the Methodist Episcopal church congregation here will be complied with and Dr. Charles Edwards returned to the pastorate here for another year at increased salary will be decided at the state conference now in session at Astoria.

LANDSLIDE BURIES TRAIN IN JAPAN; FIFTEEN DIE TOKYO, June 28.—Fifteen persons were believed to have perished when a landslide buried two coaches of a railway train 50 miles northeast of Shimomoseki today.

NEWS BRIEFS LONDON, June 27.—The British board of trade today issued an order prohibiting entry of low grade American apples between July 7 and November 15 of each year.

DETROIT, June 27.—Discovery of a dye which makes the kidneys opaque to the X-ray when injected into the veins has been disclosed at a meeting of the radiology section of the American Medical association convention.

RENO, Nev., June 27.—John Worden Elwood, vice-president of the National Broadcasting com-

pany, who is said to have neglected his wife, Virginia Carson Elwood, daughter of a wealthy Eau Claire, Wis., lumberman, after he had buried her, was visited from "Amos 'n' Andy" and other comedians and she suffered from what she termed the "bum" jokes, has been divorced by Mrs. Elwood.

STATE-FEDERAL UNITY ON DRY ACT

AIM OF MITCHELL

Field and Office Workers Rearranged and Funds Split Between Two Departments.

(Associated Press Leased Wire) WASHINGTON, June 27.—Attorney General Mitchell is making plans for closer cooperation between state and federal authorities in the enforcement of prohibition laws.

In a statement published today, he made this known and outlined other plans for administration of the prohibition bureau now in the treasury department.

"The moral obligation to take measures to enforce the eighteenth amendment," he said, "rests alike on federal and state governments. The power is concurrent and therefore the duty is concurrent. For these reasons it was necessary to understand that state governments and the federal government would each take a part in the enforcement. In those states which have repealed enforcement statutes and whose authorities do not perform a proper share of the work, there have been and will continue to be grave deficiencies in enforcement."

"I should be respected and obeyed," he said, "to bring this about, the cabinet officer added, 'the department will put forth a special effort to confer with authorities of each state, or at least those who have enforcement statutes of their own relative to the part the states may play in performance of this difficult task.'"

Employees Rearranged A widespread rearrangement of present enforcement agencies is planned to take place with transfer of the prohibition bureau.

The present 27 administrative districts, Mitchell said, will be reduced to twelve to conform with the judicial circuits, and enforcement districts, 87 in number, will be left unchanged to correspond with the judicial districts.

A prohibition administrator will be in charge of each of the administrative districts and a deputy will be placed at the head of each enforcement district.

All will be under the supervision of Amos W. W. Woodcock of Baltimore, who has been named director of prohibition, and of Howard T. Jones, assistant director.

The transfer will take about 2,700 employees from the treasury to the justice department. Approximately 1,700 of these are prohibition agents.

In addition 2,500 under cover agents who have been operating under the treasury will continue in a similar capacity under the justice department.

COME INTO THE KITCHEN

By ELLA LEHR

Good morning, Homemakers! Do you cook by mathematics or do you still follow the aged method of cooking by calisthenics?

Time and temperature cookery is now the mode in the culinary realm. Our grandmothers and those before them must have had a seventh sense for finding out when an oven was moderate, quick and otherwise—probably suffering from scorched fingers and parboiled cheeks as a result of their methods of testing. It is rumored that in the old days the heat of the oven was discovered by some poor servant putting his head into the oven, often with a scorching interior, and the length of time for baking was measured by the time in which you would repeat the "Misereere" slowly or the time of saying an "Ave Maria" or the "Pater Noster" with a prayer of acquaintance with formal prayer than exists today!

For those of you who cook by mathematics—as I call it—referring to the use of the oven temperature control on the modern cooking appliances perhaps this will help you:

Slow oven—used for fruit cakes, puddings and breads steamed in the oven. 250-375 degrees.

Moderately slow oven—used for custards, baked beans, some oven dinners, slow cooking of meats, 300-325 degrees.

Moderate oven—used for cakes, quick loaf breads, some cookies, roasting of meats, after searing, 350-375 degrees.

Quick oven—muffins, cookies, baked potatoes, etc., 400-425 degrees.

Hot oven—biscuits, searing meats, pastry shells, etc., 450-500 degrees.

Lacking an oven temperature control—which is truly the "open sesame" to a woman's outside world—an oven thermometer placed toward the center front on the lower rack of your oven—enables one to get a fairly accurate check on the oven heat although it is then necessary to regulate the gas or electricity flow. The control is a

silent servant—which once set—keeps the temperature at the exact point with no watching whatsoever.

I thought you might be interested in having some of the temperatures used for our stand-bys, and perhaps a few recipes for a change in the "daily three"—incidentally—cooked by mathematics! Temperatures first—all set?

Breads Biscuits, 500 degrees, 8 to 10 minutes. Raised biscuits, 425 degrees, 20 minutes. Yeast bread, 375 degrees, 45 to 60 minutes. Corn bread, 450 degrees, 20 minutes. Nut bread, 350 degrees, 45 to 60 minutes. Muffins, 400 degrees, 20 minutes.

Cakes Angel, 275 degrees, 45 minutes then 325 degrees 25 minutes. Sunshine, 300 degrees, 1 1/2 hours. Gingerbread, 325 degrees, 45 minutes. Loaf cake, 375 degrees, 45 to 60 minutes. Layer cake, 375 degrees, 20 to 30 minutes. Custards, 325 degrees, 40 to 75 minutes.

Meats (roasts) 500 degrees for 20 minutes then 350 degrees for 20 to 30 minutes to the point. Meat pie (for crust) 450 degrees for 30 minutes. Meat loaf, 350 degrees for 1 1/2 hours or 400 degrees, 45 minutes. Poultry, 450 to 500 degrees for 20 minutes then 350 degrees 30 minutes to the point.

Pies Pie shell, 500 degrees, 10 minutes. Two crust berry, mince, 450 degrees 30 minutes, then 350 degrees 20 minutes, pumpkin or custard, 450 degrees 15 minutes; then 325 degrees 20 minutes, mince, 300 degrees 20 minutes.

One of the best "soffo savers" we know is this one-piece meal: Ham Casserole Half fill a buttered casserole with raw potato chips or cubed. Sprinkle with 1 teaspoon chopped onion. Then place on a top a thick slice of ham, with halves of apples arranged over the top of that. In the hollow of each apple half, place a teaspoon of berries, sugar. Bake—covered at 350 degrees for 1 1/2 hours or 400 degrees for 1 hour. Garnish with parsley. Pork chops or a slice of pork steak may be used. In that instance add salt and pepper.

Cheerio—Homemakers!

NEWS BRIEFS

(Associated Press Leased Wire)

LONDON, June 27.—The British board of trade today issued an order prohibiting entry of low grade American apples between July 7 and November 15 of each year.

DETROIT, June 27.—Discovery of a dye which makes the kidneys opaque to the X-ray when injected into the veins has been disclosed at a meeting of the radiology section of the American Medical association convention.
