Maybe You Can't Raise Prices

BUT YOU CAN LOWER COSTS.

Did you see the fuel demonstration Monday?

If you didn't, you missed something. You would have seen dry ground plowed seven to eight inches deep at the rate of less than thirty cents an acre for fuel. You would have seen a tractor costing less than \$1200.00 walking right along in high gear with three 14-inch plows at the above depth, and burning a fuel so low grade the State of Oregon doesn't class it as a motor fuel. Anyway they haven't put a tax on it yet.

If you have to sell at low prices you must produce at low costs.

A John Deere Tractor is the answer.
