GROWING REVOLT PERILS SPANISH THRONE

Editorials on the Day's News

By FRANK JENKINS TWO leaders of the revolt in Spain die before a blank wall, at the hands of a firing squad.

It is the old, old idea that government must protect itself. If you start out to tear down government, and FAIL, you must be destroyed in order to prevent your doing it again.

THE newer, more modern, idea is that governments should be so good that the governed will not WANT to tear them down by force.

MRS. KEITH-MILLER, noted Australian aviatrix, cracks up her plane in attempting to take off at Jacksonville, in Florida, for a flight to Washington.

The great need of the airplane is MORE SAFETY. Give it that, and it will make tremendous strides.

MRS. EUGENIA POWELL, of Denver, shoots her daughter, who was to have been married a few hours later, and then takes her own life.

Why? Because she couldn't bear the thought of giving up the daughter who had been so much a part of her life ever since birth?

Probably not. A more reasonable answer is that Mrs. Powell's mind was not as good as it should have been. Weak minds cause a lot of grief and trouble in this world.

GILBERT H. BEESEMYER plunders the Guaranty Building & Loan association of Los Angeles of nearly eight million dollars, and when he is caught confesses contritely that he is a "dirty crook."

He is, but the matter shouldn't end there. The fact that it is possible to plunder a building and loan association of so tremendous a sum indicates that state inspection of such institutions in California isn't what it should be.

California owes it to her small investors to MAKE inspection what it should be.

GRAHAM McNAMEE, radio announcer, earns \$2,000 a week, and we are told by an official of the National Broadcasting company.

Why? Here is the plain answer: Because he is GOOD—so good that big broadcasters would rather pay him \$2,000 a week than to pay somebody else, NOT so good, \$50 a week.

If you want to earn BIG MONEY, be good at your job.

ANOTHER way to make money is to be DIFFERENT.

C. D. Gibson, of Yakima county, in Washington, raises buffaloes. Their meat, when slaughtered, brings him from \$225 to \$250 per animal.

The total, you see, runs up to quite a lot.

BUFFALO meat is worth no more than steer meat. But it is a novelty, and it is a soundly established principle in business that people are willing to PAY for novelties that strike their fancy.

D. R. EDWARD LYMAN CORNELL, of Northwestern university, tells girls that they should look for these things in picking a husband:

LOCAL CHARITY WORK PUT ON UNITY BASIS

Various Organizations of Roseburg Will Act on System to Avoid Duplication.

Definite arrangements for securing immediate relief work through the Umqua Relief association, were completed at the meeting held last night at the Indian room of the Umqua hotel.

In addition to these organizations, several other organizations are conducting their own relief work, but are cooperating with the local group by reporting their activities to avoid duplication.

To Avoid Duplication The fact was definitely stressed at last night's meeting that the association is not endeavoring to encroach upon the activities of the lodges, churches or clubs.

community, because of a bank suspension of considerable proportion. Even though the institution in question had long been regarded with uneasiness, nevertheless many people have asked themselves whether its fall is at all symptomatic of the New York banking community.

are not. You know as well as I that are not. You know as well as I that the leading banking institutions of this city are sound, strong and a bulwark to the community.

EIGHTEENTH AMENDMENT HELD INVALID

New Jersey Federal Judge Rules Ratification by Legislatures Was Wrong Method.

NEWARK, N. J., Dec. 16.—Federal Judge William Clark today ruled the adoption of the eighteenth amendment to have been invalid.

His decision was based on the broad principle that such an amendment could be ratified only by constitutional conventions and not by the state legislatures.

The immediate effect of the decision, Judge Clark explained, would be in New Jersey, where any arrests made for the retail of intoxicants would have to be made under the state enforcement act pending appeal of his decision.

The probability was that an appeal would be taken by Federal District Attorney Philip Forman directly to the United States supreme court.

Indictment Quashed. The amendment was attacked after a study of two years by a group of the New York County Lawyers' association, who represented William Sprague, an obscure New Jersey township official, indicted for transporting beer.

Judge Clark, eminent scholar of the constitution, although he is the youngest member of the federal judiciary, devoted fifteen thousand words and called upon almost a hundred authorities in his decision.

Her plane, which she recently purchased, crashed from an altitude of about 50 feet when its engine stalled and went into a dive as she was taking off for Los Angeles. She had participated in a Nevada airport dedication last Sunday.
