For Your Inspection The merchant and manufacturer who advertise, actually are placing their merchandise before you for inspection. They invite your most critical attention and an uncompromising comparison. And their advertisements, so to speak, say to their products: "We have introduced you to the public—now stand on your own merits." If the manufacturer and merchant did not have confidence in their wares, they would hesitate to call attention to them. For advertising rigidly tests the maker, the seller and the merchandise. Business so tested, and found not wanting, is prosperous. In the long run, you can depend on the man who advertises, as well as on his product. That is one reason why people have found that it pays to read advertisements. It is through advertising that the excellent things of the world are brought to the attention of those who are seeking for the best and most economical way to spend their money. Read the advertisements. They are news.
