

EXPERTS EXPLAIN
ALFALFA GROWINGMeetings Held on Yoncalla
and Elkton Farms, With
Others to Follow.

The first of a series of alfalfa growing conferences was held Wednesday morning at the Roy Booth farm at Yoncalla. The conferences are conducted by the state college extension service, in cooperation with the county agent's office. E. R. Jackman, extension agronomist, of Corvallis, and J. Roland Parker, assistant county agent, were the speakers. A similar meeting, but with small attendance, was held in the afternoon at the Orval Reckley farm at Elkton.

Mr. Jackman discussed in a practical way the proven methods of successful production of alfalfa, stressing the importance of the proper preparation of the soil. The ground should be plowed early and packed, he stated, leaving not more than an inch or an inch and a half of mulch. Land plaster should be used at the rate of about 100 pounds to the acre two or three weeks before planting. Seed should be planted against the packed soil. He urged the use of Grimm or some other hardy variety of seed in preference to the common variety. Seed should be freshly inoculated immediately prior to planting, he stated.

Cultivation for weed control in the spring is not satisfactory, but is valuable after the second or third cutting, Mr. Jackman says.

Mr. Booth's practice in growing alfalfa was demonstrated as a very successful method. He tried growing alfalfa about 10 years ago and failure resulted. For the past three years, however, he has been having fine success on the same land, as a result of proper soil preparation and seed selection. His ground is prepared early in the year and is then left until several weeks later, when it is disced and leveled. His seed is planted about 10 pounds to the acre with a drill, using the special alfalfa attachment, along in the early part of May. He plans to increase his production from 15 to 40 acres this year. He allows the sheep to feed on the old stands until after the wet season, assuring good drying conditions for the first cutting.

A similar conference was held today at 9:30 a. m. at the L. E. Thompson place at Umpqua and at 2:30 p. m. on the R. R. Clarke farm at Oakland.

COMPENSATION ACT
BARS SKIN DISEASES

SALEM, April 9.—Skin diseases resulting in industries involving fruit, vegetables, dye, grease, dust, hemlock, spruce and any similar material, are not compensable under the terms of the industrial accident act, the commissioners announced today. Any occupational dermatitis is not due to injury through violent and external means and therefore does not come under the act, the commission held.

The commission also ruled out infected blisters and callous or any condition that develops over a period of time due to the nature of work in which the workman is engaged or that might be due to physical infirmity of the claimant.

Stomach Troubles
Headache and
Dizziness

If your stomach is sick, you are sick all over. If you can't digest your food, you lose strength, get nervous and feel as tired when you get up as when you went to bed.

For 10 years Tanlac has restored to health and activity many thousands who suffered just as you do. Mr. Daniel Vinciguerra, of 6200 Stiles St., Philadelphia, Pa., says: "I have not had a dizzy spell or a headache since taking Tanlac. My appetite has increased, my nerves are in better shape and I can enjoy a good night's sleep."

Let Tanlac do for you what it did for this sufferer. It corrects the most obstinate digestive troubles—relieves gas, pains in the stomach and bowels. It restores appetite, vigor and sound sleep.

Tanlac is made of roots, barks and herbs. The cost is less than 2c a dose. Get a bottle from your druggist today. Your money back if it doesn't help you.

Sees Mother for First Time

Earl Muselman born blind twenty-two years ago, is, after an operation at Philadelphia, now learning to use his eyes for the first time to see the wonders of the world. The greatest thrill in his new life of light was when he saw his mother for the first time (both above).

FLOOD OF LOANS TO
VETERANS GOES ON

PORTLAND, April 9.—With loans averaging \$392 to the applicant, the veterans' bureau here had at the close of business yesterday, mailed out more than \$4,600,000 to 11,982 World war veterans as loans upon their adjusted compensation certificates. Most of the money was sent to veterans in Oregon and Washington.

Checks are being mailed at the rate of 425 a day, the bureau said today. About 4,000 applications were still on file this morning, and these are being taken care of at the rate of 100 a day. The bureau expects to catch up with the work in two weeks.

STATE DRY BUREAU
HAS BUSY MONTH

SALEM, April 9.—Thirteen stills and 10 automobiles were confiscated by the prohibition department last month, George Alexander, commissioner, announced today. During March 137 arrests were made and fines totaled \$11,475. The sentences resulted in 875 days in jail.

Liquor seized and destroyed by the department totaled 2480 gallons, while 5040 gallons of mash were also seized.

ROCKNE'S WIDOW
GETS ENTIRE ESTATE

SOUTH BEND, Ind., April 8.—The will of Knute Rockne, Notre Dame football coach, filed for probate here today, leaves the entire estate to the widow.

Vitus E. Jones, attorney for the estate, said the estate, outside of the insurance, "is very modest." He declined to give the amount of insurance, which has been estimated at between \$100,000 and \$125,000.

CITES TWO WAYS TO
REGAIN PROSPERITY

(Associated Press Leased Wire)
NEW YORK, April 9.—Robert P. Scripps, president of Scripps-Howard newspapers, had two alternatives today for the return of prosperity.

They were:
Break up the machines, put the scientists in jail, and generally try to make our clocks run in reverse, or:

Increase per capita spending or leisure, or a combination of both to balance increased potential per capita production.

"The potential per capita production of the individual workers is increasing much more rapidly than is population," he told the New York board of trade. "This has been brought about by application of science to industry—scientific organization as well as new mechanical inventions."

"In America, since at least 1910, although lack of statistics make it impossible to fix any date accurately the pace of science has been an accelerating one, while the rate of population growth has decelerated, until now it tends toward absolute stability."

"Increased spending can be achieved, in one or both of two ways. The simplest plan might be just greatly increased, and continually increasing, hourly wages for labor, but no great stride along this line can be taken if all industry and business does not move as a unit."

"It seems to me that clear implication is that if democracy cannot be made to work efficiently toward the end of complete and thorough exploitation of science and machinery, in the interests of all, not just a few of our people, then such exploitation will take place anyway—in other words it will be the temper of our people to try something different from democracy."

"It would be folly to underestimate the voting strength of the millions whose lives are seriously disrupted by depressions like the present one, and of the other millions whose sympathies are enlisted by their suffering, or who feel, perhaps, that they may be the unlucky ones next time."

HOSPITAL RECEIVER
NAMED AT EUGENE

EUGENE, Ore., April 8.—A receivership today was ordered for the Pacific Christian hospital in this city. Dr. A. Orville Waller, member of the hospital staff, was appointed by Circuit Judge Skipworth and it will continue to operate under his direction, it was announced. The hospital has been more or less in financial difficulties for about two years. About 30 months ago it was reorganized to sever connections with the Eugene Bible university with which it was associated.

HELENE MADISON
CUTS ANOTHER MARK

CHICAGO, April 9.—Helga Helene Madison, 17-year-old Seattle, Wash., swimmer, has lowered another record.

Resuming her campaign to gather economies is nil.

"The rural schools are weak because their pay is the smallest and they get the poorest teachers. Their boards are too apt to dictate to the teachers, when the average rural resident is far from an expert in education."

SPIDER, 139 DAYS
WITHOUT FOOD OR
DRINK, FIGHTS ON

Ed Singleton, circuit court bailiff, tells of a spider that lived for 139 days without food and water, and at the end of that time was in perfect fighting condition. While working in the potato patch at the ranch of his son, Bliss Singleton near Leona, Mr. Singleton found a big, black spider. The insect had a triangular shaped body and legs about an inch in length and appeared to have plenty of fight. He was unable to identify it, and put it in a can, planning to bring it to Roseburg in an effort to have it identified.

Mr. Singleton became ill and was taken to Portland, where he was in the hospital for several weeks. Yesterday he went back to his son's ranch and happened to pick up the can in which he had placed the spider. He lifted the lid and the insect came out with a rush and fought viciously at a stick. Upon investigation it was found that the spider had been in the can exactly 139 days and during that time had had no food or water.

er up all women's records, the Seattle star last night trimmed one and three-tenths seconds from the 75-yard free style mark of 45.1, established in 1925 by Ethel Lackie.

The accomplishment gave her possession of 14 out of 16 records, sign of violence in the apartment.

DEATH OF MODEL
PUZZLES POLICE

(Associated Press Leased Wire)

SAN FRANCISCO, April 9.—While city chemists analyzed the stomach contents of Mrs. Denise J. Allen, 30, comely department store model, whose body was found in her apartment, puzzled authorities today sought to trace her previous movements, her relatives and friends in France.

The body, clothed in night attire, was discovered yesterday by Mrs. Katherine Forbes, apartment house manager, who said she last saw Mrs. Allen, also known as Susanne Adams, last Sunday. A deputy coroner said Mrs. Allen had been dead since Sunday.

Authorities said they did not know whether Mrs. Allen ended her life or whether poisoned liquor was responsible. They said they found a can of cleaning fluid near the body. The container was marked "poison."

In her personal effects police said they found photographs and a scrap book, indicating Mrs. Allen came here from Los Angeles, where she may have been connected with the motion picture industry. Letters indicated she was lonely, police said.

Authorities said there was no sign of violence in the apartment.
