

CORVALLIS TO PLAY FRANKLIN IN FINAL

Hoop Superiority of Prep Schools to Be Decided in Game Tonight.

SALEM, Ore., March 21.—(AP)—Corvallis and Franklin high of Portland will clash tonight for the prep school basketball championship of Oregon. The two teams swept through the semi-final round last night, leaving Bellfountain and Milton-Freewater in their wake to battle for subordinate positions in the state tournament.

Corvallis, which has made one of the most impressive records in years, did not extend itself greatly to win 34 to 25 from Bellfountain, state "B" league champion. The Corvallis five led 19 to 0 at the end of the first quarter and 18 to 8 at half-time but the last half found Bellfountain more than holding its own.

Franklin high had plenty of trouble with Milton-Freewater. The score was knotted 9-all at the first quarter and 18-all at half time. Hansen, Franklin forward, piled up 16 points and aided materially in the last-half drive which netted the victory. The score was 26 to 23.

Bellfountain and Milton-Freewater will meet at 7:30 p. m. for third place. The loser will rank sixth. The Corvallis-Franklin championship tilt will begin an hour later.

Consolation winners in the two semi-final rounds of that bracket were Benson of Portland, Salem, Tillamook and Astoria.

Myrtle Creek Beaten.

Astoria turned in the second largest tournament score on record in defeating Myrtle Creek 60 to 26. Eugene in 1922 scored 45 points against Joseph. Ted Sarpola, flashy Astoria forward, piled up 27 points to tie the individual tournament record set by Wardlow Howell of Ashland in the Ashland-The Dalles game of 1921.

Tillamook defeated Oregon City 55 to 18, Benson won from Mill City 27 to 25 and Salem beat Bend 38 to 30.

SNOW INCREASES FLOOD AREA'S WOE

(Continued from page 1)

After raging for two days, the river at Hartford apparently had reached its crest, with a record high level of 27.5 feet at mid-morning.

The weather bureau said the river was leveling off.

The cities of Hartford and Middletown were without electric power after a night of terror. Water fell in sheets today. In Hartford alone, more than 2,000 were homeless. The rains dashed whatever hopes had been held for quick recession of the river.

The dam on the Quinnebaug, near Danielson, Conn., was threatened by the new rain.

To the thousands of refugees, huddled in relief shelters in western Pennsylvania and down the Ohio to Wheeling—a panorama of destitution and misery from three days of rampaging waters—the snow storm brought a new danger—pneumonia.

Water shortages in many communities already had threatened pestilence.

Health Service Busy

To prevent epidemics, the United States public health service kept its most skillful experts laboring in all the stricken communities.

Every sanitary engineer from the Washington headquarters was sent to Pennsylvania and West Virginia to see that emergency sanitation systems. From other units, engineers were rushed to flood swept communities elsewhere in the east.

The snow hampered clean-up and reclamation work in the Pittsburgh-Johnstown area.

Some 25,000 WPA workers were mobilized in Pittsburgh and 4,000 in Johnstown to give all aid. There was no heat in Johnstown and many of the 6,000 destitute there were ill.

Likewise in Wheeling, between 8,000 and 10,000 homeless shivered throughout the day in temporary quarters.

Pittsburgh Situation Eased

In Pittsburgh, there was a gradual return of facilities. More electric power was brought in, gas was returned to several buildings in the "Golden Triangle," wealthy downtown area which was covered two days ago with 18 feet of water.

Above Pittsburgh, the Allegheny, while near normal, was cutting a new channel around a giant water-way lock. Engineers strove with stone and bags of cement to keep the river in its course.

Aside from the Connecticut and the southern Ohio, rivers generally throughout the east were either receding steadily or were back in their banks.

Distress Widespread

But the recession only brought the rest of the world the plight of many communities during the worst hours of the flood devastation.

Williamsport, on the Susquehanna in Pennsylvania, was typical of the most severely stricken towns. Little had been heard from it for many hours. Communication was cut off and meager radio reports had told of fires. Some revised estimates of the damage in this industrial town ran as high as \$3,000,000. Four thousand were homeless. The need for clothing was acute.

While snow and rain fell over widespread upstate New York areas, rehabilitation work continued at a steady pace. Thousands of persons in the Binghamton area, most severely isolated and stricken city in the state, were returned to their homes, but new dangers threatened the city. The escape of gas began from a fuel gas

Camera Depicts Scenes in Flooded Districts

Only a few miles above the nation's capital these summer cottages along the Potomac River are partly submerged as crest of flood moved down the valley to Washington, where frantic efforts are being made to protect \$100,000,000 in government buildings. (International Illustrated News)

A pitiful example of the rising flood which threatens Washington, D. C., is this family huddled near their fire after rising Potomac River drove them from their home. (International Illustrated News)

Faced with the danger of epidemics from contaminated water supplies, thousands of homeless and destitute flood victims are being aided by Red Cross and Federal funds. These mercy lorries are working in the flooded Wilkes-Barre, Pa. area. (International Illustrated News)

Dirt dikes and sand bag barricades were rushed up around all government buildings and property in Washington, D. C., in effort to forestall flood damage from rising waters of the Potomac river. These workers are shown in Potomac Park with the Washington monument in the background.

tank. WPA and CCC workers hurriedly went to work to repair the leak.

In New England, as elsewhere over the east, the task of feeding the thousands of homeless and refugees created a serious situation.

Temperatures were only slightly above freezing, adding to the misery of the homeless and hampering the work of "mopping up."

Many upstate communities, however, were still without light or power.

Industry was at a standstill

MYRTLE CREEK AND OAKLAND SPLIT TWO

The Oakland grade school girls defeated Myrtle Creek 23 to 26 in a volleyball game at Oakland Tuesday night, while the Myrtle Creek boys won at basketball 19 to 1.

The volleyball game was well played and was quite close until the last few minutes of play. Myrtle Creek led the scoring in the early part of the contest.

In the basketball game the Oakland team was completely outclassed by the large and fast Myrtle Creek five. Yocum, Myrtle Creek forward, scored 14 of his team's 19 points. Minter succeeded in tossing one foul shot, which saved Oakland from a complete whitewash.

The lineups:

Oakland (23) (9) Myrtle Creek Worthen (6) (2) Starbuck Copeland (2) (4) Ady Bainbridge (1) (3) Valentine Baird (4) (3) Dyer McCurdy (4) (3) Allen Abbot Allis (6) (3) Allen English (6) (2) Short Todd (3) (2) Short McHughill (6) Crawford Campbell

Basketball lineup:

Oakland (1) (19) Myrtle Creek Stearns F (14) Yocum Todd F Marvum Thornton C (3) Dyer Manning G (2) McDeugal Minter (1) G McLain Shircliff B. Goff Shircliff

Referees, Garrison and Yant; timekeeper, Carlson; scorekeeper, Morris.

SOIL CONSERVATION PROGRAM LAUNCHED

(Continued from page 1)

The rate of this payment will be based on the recommendation of state committees, but will not be more than \$1 an acre. (An exception is made for small producers who may qualify for payments up to \$10.)

The soil conserving payments is to be made at a specified rate for shifting from soil depleting to soil conserving or soil building crops for 1936.

Subsidy Bases Fixed

If a farmer is to receive a subsidy, his acreage of soil conserving or building crops must be equal to 60 per cent of the farm's soil depleting base, or equal to the maximum limit set for diversion.

For all crops except cotton, tobacco, peanuts, sugar beets, sugar cane, flax and rice, the diversion payment will average \$10 an acre, based on productivity of individual farmers. The maximum diversion for which payments will be made is 15 per cent of the base acreage.

Sugar cane and beet producers, flax and rice farmers will be paid on the actual production of those crops, but they must meet minimum requirements for planting soil conserving crops.

Under way today is the organization of county producer associa-

tion. The rate of this payment will be based on the recommendation of state committees, but will not be more than \$1 an acre. (An exception is made for small producers who may qualify for payments up to \$10.)
