"Of course it feels different, Dad . . . it is different!"

It took more than just good performance to win over 2,500,000 Ford V-8 fans in less than four years. It's an entirely different kind of performance that did it! It's the V-8 engine, first and foremost. The smoother flow of its 85 horsepower. Its pick-up in traffic. Its easy pull in the open and up the hills. For you can't expect any less modern engine to feel like a V-8. And you don't find another V-8 below \$1645. Then there's riding comfort. Ford springbase is 123"—almost a foot longer than wheelbase. You'll quickly feel the edge this gives a Ford on cars near its size and weight. Next, there's a type of chassis in the Ford not found anywhere else in the world today. That's why a Ford "keeps its feet" so remarkably on turns and over rough roads. Why not try these advantages today? Before you decide on any new car—get the "V-8 feel" that put the Ford first among all cars last year!
