Mobil

A Message to Mobiloil Dealers

FOR seventy years Mobiloil has been the leader in the field of lubrication throughout the world.

No other motor oil has ever approached it in popularity and universal acceptance.

Mobiloil is developed and constantly is being improved by the greatest group of Petroleum Engineers in the world.

These men are not content merely to change the formula of Mobiloil to meet existing conditions and needs.

They anticipate these changes. They provide for them in advance—often years ahead.

Thus, two years ago the famous Clearsol Double-Solvent Process was created to meet today's requirements of the new type high compression motors of hair-breadth precision.

As a matter of fact, Socony-Vacuum en-

gineers constantly are cooperating with automobile manufacturers in the solution of lubrication problems, to make possible desired advances in engineering.

Before any new automobile reaches the dealer's showroom, the proven-in-advance Mobiloil best suited to that car's needs is ready and on the market.

Under all conditions and for every type of car, Mobiloil presents the greatest motor oil value in the world.

There is no substitute for the superlative quality that has earned for Mobiloil a worldwide leadership.

Mobiloil, as in the past 70 years, will continue to anticipate any and all improvements in motor car development.

Mobiloil—away out front—yesterday, today, tomorrow.
