rie company, owners of the property. "Prepare to meet thy God." Adv.

Ninety-two people were killed in Great Britain in one year by falling out of bed, according to results of an investigation by the National Safety First association. Fatal accidents cause 18,000 deaths in Britain every year, 7,000 being on the road, 2,000 in industry and 9,000 in the home or in every-day pursuits.

STEPPING ON THE STARTER puts over 100 metal parts inside your motor into immediate action. This means serious wear—unless your oil flows instantly!

SPEED requires a "TOUGH" oil for high heat. Either "tough" or fast-flowing oils are easy to make. The problem is to combine both qualities in the same oil.

# 3 Miles a Minute can cause Less wear than starting your engine just once!

Here's a new fast-flowing oil that reduces engine repair bills up to 50%...

TERRIFIC motor heat at 180 miles an hour... is hard enough on an engine!

But starting your engine just once can be a lot more damaging.

When you step on your starter, over 100 moving parts are rubbing together. That calls for plenty of oil on every part. If it isn't fast-flowing, some parts are uniled for a few moments. No wonder 3/4ths of engine wear is caused by starting!

To cut this excessive wear, Shell, at a cost of \$3,000,000, has perfected a new type of oil.

Golden Shell is FAST-FLOWING and yet TOUGH. Engineers and oil technicians call the process behind it the biggest advance in oil refining in the last 25 years.

Drive into your neighborhood Shell station today and learn how Golden Shell can cut your engine repair costs 50%.
