IN BANKRUPTCY

In the District Court of the United States for the District of Oregon. In the matter of Joseph Elmer Schalles, bankrupt.

To the creditors of Joseph Elmer Schalles of Roseburg, in the County of Douglas and district aforesaid, a bankrupt:

Notice is hereby given that on the 22nd day of October, 1936, the said Joseph Elmer Schalles was duly adjudicated bankrupt; and that the first meeting of his creditors will be held at the office of the undersigned in Roseburg, Oregon, on the 22nd day of October, 1936, at 10 o'clock in the forenoon, at which time the said creditors may attend, prove their claims, appoint a trustee, examine the bankrupt and transact such other business as may properly come before said meeting.

Dated October 10th, 1936.
C. L. HAMILTON,
Referee in Bankruptcy.

EARLY AMERICANS
INDICATED BY SOIL

LINCOLN, Neb., Oct. 12 —(AP)—Black layers of soil in Nebraska's badlands, Dr. Erwin H. Barbour, professor of paleontology at the University of Nebraska, says have yielded evidence pointing toward the existence of American civilizations 15,000 to 30,000 years ago.

From holes dug in cuts and canyons, a museum field party brought forth examples of handicraft of an ancient civilization and the remains of 40 different kinds of animals.

These finds and the soil strata in which they were uncovered led Dr. Barbour to express the opinion that western Nebraska may be "the cradle of ancient civilizations in North America."

The field party's diggings, made under the direction of C. Hertrand Schultz, near Crawford, Harlan and Broadwater, revealed at least five and probably six cultural horizons providing evidence of animal and human life. Dr. Barbour said. They strengthened the conclusion, he added, that the Crawford and Harlan finds are "among the most scientifically valuable sites anywhere in the country."

From a stratum which often dipped 25 feet below the surface, the field party took finely fashioned pieces of flint, technically known as "Yuma points." Conservative scientists, Dr. Barbour said, "agree that Yuma men lived at least 13,000 years ago, while others maintain their existence dates back considerably farther."

Since Josephine Wright won first place in meat canning last year she was not permitted to enter in that division again so she placed first in the special corn and pig contest which brings his hog prize money to \$29.00. Then he sold his four pigs which weighed 900 pounds at \$10.50 per hundred. The cost of production was 6.77c per pound and the rate of gain per day averaged 5.19 pounds. These four hogs gained 772 pounds in 116 days.
