OAKLAND

OAKLAND, Nov. 23 — The advisory board of the Oakland Town and Country club met Tuesday evening at the home of Mr. and Mrs. Richard Wilkins and planned an interesting program for the next meeting. The program will consist of readings, musical numbers and two sets of old fashioned square dances with Oscar Rader calling. Refreshments will be sold at the close of this program and a general good time will be enjoyed. This will be open for the public to attend.

Mr. and Mrs. G. B. Davidson, former owners of the variety store here, sold out their business recently to Miss Helen Elsworth of Portland and have gone to Portland to reside. Miss Elsworth has added a much larger stock of goods and is now open to accommodate the public.

In the past few weeks some of Oakland's citizens have been on the move. Joe Copeland recently bought the Quant property in the eastern part of town and moved from his ranch in Old Town into this house, which was occupied by Oscar Rader and family. Mr. Rader bought the house formerly owned by Will Norris where Pro Pichette lived, and Mr. Pichette moved into the Lebo house where Shorty Farrell had lived previous to buying and moving into the house near the Christian church owned by Mrs. Lee Cheever. Mr. Pichette and family who had been living in the Lebo house for a short time, have moved to the John Maupin ranch west of Oakland.

TOMATO PRODIGY OF VEGETABLE WORLD

Other food crops must look up to the tomato, a poor American country plant that went abroad and came back to make good in a big way. Viewed with no little suspicion only a little more than a hundred years ago, uneaten and unknown by civilized folks 400 years ago, the tomato has a very brief recorded history. Prior to Columbus' discovery of America it was known only to the natives of tropical America, who doubtless had used it for a long but undetermined time. Today the tomato in its many forms is almost as widely distributed as wheat, a crop with recorded history going back thousands of years.

Introduction this year of a new variety, the Glovel, originated by scientists of the U. S. department of agriculture and developed in cooperation with the Florida experiment station, is another step upward in the rapid rise of the tomato.

Since research has proved the tomato rich in needed vitamins, the success story of the tomato is easy to understand. It is considered an excellent source of vitamin A, a fair source of vitamin B, and stands out as a source of vitamin C, all three of which are important in a balanced diet, according to the bureau of home economics.

This bureau points out the versatility of the tomato. Canned or fresh, it serves as the basis of cocktail, soup, or savory sauce. Its bright color and tart flavor enlivens many a meat and vegetable dish, and the American salad might never have been what it is without raw sliced tomatoes, tomatoes in almost innumerable forms.

Studies in preservation also have been a distinct aid in boosting consumption of the tomato. Nowadays thousands of farm housewives not only grow a supply for use fresh in season but also grow a surplus so that the canning schedule includes plenty of tomatoes for out-of-season use. Also the commercial canneries preserve tomatoes at a rate of approximately one and one-third million tons annually, so that the grocery shelves as well as country and town cellars are stocked.
