Continuance of Reciprocal Trade Agreements Advised by Roosevelt

WASHINGTON, Jan. 21.—(AP)—President Roosevelt urged congress today to continue the administration reciprocal trade treaty as a means of promoting "durable peace" and a "balanced economic recovery."

This appeal was made in a letter to Chairman Donahoe of the House ways and means committee, before which Secretary Hull appeared in person to ask passage of a measure extending the trade policy three years.

Mr. Roosevelt said the nation's "vigilant initiative in the field of liberalization of commercial policies has been an important factor in averting the world trend toward national economic isolation, which seemed almost irrevocable three years ago."

After reviewing conditions which he said existed when the administration originally sought power to enter into reciprocal agreements nearly three years ago, the president said that in trade treaties concluded with 15 nations, discriminations had been removed and guarantees obtained of equal treatment in the future.
