POWER PURCHASE "LOW" IS REMOVED

Federal Board Will Permit Single Kilowatt Buying of Bonneville 'Juice.'

PORTLAND, June 14.—(AP)—Small industries as well as large may locate near Bonneville dam and obtain the benefits of cheap power, a study of the federal power commission's action on Administrator J. D. Ross' proposed rate schedule showed today.

A minimum purchase provision was removed, allowing the purchase of power in quantities as low as one kilowatt year within a radius of 15 miles of the dam.

Ross previously proposed an industry contracting rate for at-site power of not less than 200 kilowatts of prime power at \$14.50 a kilowatt year. He suggested limitation of secondary power at \$9.50 a kilowatt year to not more than the prime purchase.

The change would allow large and small industries to take small amounts of power in their first year, gradually increasing purchases as plants expanded and markets developed.

A 100 kilowatt minimum proposed by Ross for sale of energy of the transmission system, at rates of \$17.50 for prime power and \$11.50 for secondary power kilowatt year also was removed. Small cooperative associations, municipalities and power districts will be encouraged to start buying Bonneville power as soon as it is available.

Additional inducements to small districts were offered by the commission with an optional rate of five miles per kilowatt hour for less than 100 kilowatts during a two-year building period, after which the rate would be the same as to larger users.

Speaking at the First Baptist church in Roseburg, Mike Billester, the Russian, missionary leader, taking as his text Romans 8:28, "All things work together for good to them that love God," told of hearing Lancharsky, then commissar of education, and Zinovieff, commissar of propaganda, speak in 1924. The latter, he said, boasted, "We have destroyed capitalism on earth, now we shall destroy the stars of heaven."

"Where are those men today?" the speaker asked. "Both of them were executed by the Russian government, the victims of the very mob that they organized, but God is still in his heaven."

"Zinovieff, who boasted as blasphemously and courageously, showed himself a coward; for when sentenced by the court to be shot, he fainted, and remained in such a state of collapse that he had to be tied unconscious to the wall in order that he might be shot."

"Four hundred and eighty-seven of the leaders of Russia have been executed, among them many of the ambassadors; in fact, all the ambassadors of Russia have been recalled and executed, or exiled to Siberia or prison camps, except those to the United States and France. The execution of so many of the former heroes of sovietism has resulted in a complete upheaval in the educational system, and the holding-up of education, as all the former text books which presented these men as the saviors of their country, have had to be recalled and destroyed."
