

ELECTRIC PLAN IN DOUGLAS STUDIED

Application to REA for Loan Brings Advice on Necessary Steps.

The rural electrification administration reports that it has given preliminary consideration to an application for a loan to build rural lines in the Douglas county valley section near Tumble-Camas. This district recently organized and made application to the REA in advance of proposed formation of a county-wide power district. The action is taken in an effort to speed up power for that district, which, under the procedure planned, may buy power from any available source, thereby not being precluded from joining the county-wide unit if any when formed.

Steps Outlined
The REA reports it has outlined the steps which must be completed before an allotment of funds can be made.

It will be necessary for the project sponsors to obtain and submit applications for membership in the cooperative as well as applications for electrical service from it; also obtain signed easements for the right-of-way for the power lines, and prepare and send to REA a detailed map of the proposed project, showing the area most feasible to be served with the allotment when and if it is made available.

It will be necessary for the sponsors to select an attorney and incorporate under the laws of Oregon. They have been requested to notify the REA legal division of their choice as attorney so that he can be promptly approved and sent suggested forms to be used for incorporation and for easements.

Tentative Rate Advised
Although no retail rate for selling electricity can be established until all cost factors have been determined, a rate has been tentatively suggested, under which a minimum bill of \$2.25 a month would pay for 100 kwh. This amount of electricity will not adequately light the average size home, but it will operate several appliances such as a washing machine, iron, radio and water pump, and \$6.85 would pay for 100 kwh. enough for all these uses, and one major appliance, such as a refrigerator.

Speed in development of the project depends very largely on prompt compliance by local leaders and the community with the REA requests for information and action. If this information is satisfactory and the local organization adequate, REA expects to be able to allot money to meet the entire construction costs. No money will be lent to pay for rights-of-way.

WAKE UP YOUR LIVER BILE

Without Calomel—And You'll Jump Out of Bed in the Morning!
The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Your whole system is poisoned and you feel sour, sunk and the world looks pink.
A mere bowel movement doesn't get at the cause. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Harmless, gentle, yet amazing in making bile flow freely. Ask for Carter's Little Liver Pills by name. 25 cents. Stubbornly refuse anything else.
