 * The Home Economics club conducted a refreshment and sewing booth, and also sold a quilt which was won by Mrs. Blanche Wright of Dixonville.

Best Wishes to the Grangers

FOR
**New Standard
 of Winter Comfort**
 SELECT A
**SUN FLAME
 Oil Burning
 HEATER**

It's years ahead in appearance, construction and economy.

Among the many household appliances of today which bring comfort and convenience at the same time they save work, none is of greater importance than the oil burning heater. No longer is it necessary to put up with an old wood or coal stove with its dirty fuel, its smoke, dust and ashes. A Sun Flame Oil Burning Heater requires practically no attention. It provides absolute freedom from smoke and soot, and eliminates entirely hauling of ashes. Best of all, it gives steady, even, dependable and healthful heat.

Established Leadership

The American Sun Flame Heater has universally been accorded first place among all oil burning heaters. It was the first heater to come out in modern design—the first to use crystalline enamel and polished chromium trim—the first to offer the advantages of giant heating surfaces, greater air circulation and unsurpassed fuel economy—the first to offer the beauty and convenience of large mica doors. Although many imitations have been placed on the market, none of them has equalled the Sun Flame Oil Burning Heater in appearance, design, construction or in ability to give unsurpassed service.
