

GOVERNMENT COSTS CONTINUE TO RISE

WASHINGTON, May 31.—(AP)—Despite a season-long economy drive, the cost of the federal government for the year starting July 1—exclusive of relief—was shaping up today to be almost \$1,000,000,000 bigger than for the current fiscal year.

The 11 regular appropriation bills, already passed by the house, carry a total of \$1,000,000,000 more than for the present year. Several supplemental estimates, including \$229,002,500 more for the army, still are pending.

Some of the increase, however, may be offset when congress votes relief from the next year. President Roosevelt has requested \$1,762,400,000 for this purpose, in contrast to the \$1,250,000,000 appropriated during the current year.

National defense, parity payments to farmers and flood control account for sizable chunks of the increase. A \$20,000,000 boost was charged up against the forthcoming decennial census, which must be taken in 1940.

Five of the appropriation bills have been signed by the president. The others are pending before the senate or joint senate-house committees.

Although the house held all but two of the measures below the budget estimates, the senate increased the totals on several, notably when it added \$225,000,000 for parity payments to farmers and disposal of surplus commodities. This appropriation has not yet received final congressional approval.

The house exceeded budget estimates in voting funds for flood control and river and harbor improvements. It added \$50,000,000 to the war department (non-military functions) appropriation bill.

A senate appropriations subcommittee, however, has eliminated the \$20,000,000 fund and a house bloc may try to allocate some of the new relief money for that purpose.
