Daily Devotions

DR. CHARLES A. EDWARDS

A great scientist calls attention to the more recent theory that space is limited and that all the rays of light that proceed from any heavenly body travel outward until they are carried by the limits of space, and then, in a matter of some thousand million years, come to new focus and shine again as the renewed light of a body which has out there a billion years ago. He offers the thought as one challenging to ministers, so much of our efforts and prayers seem wasted, and we utter the defeatist cry, "what is the use?" rather than, recall the lines of Robert Browning, "There shall never be one lost good," or "Trust in the Lord with all thine heart, and He will bring it to pass," or again, "Let us not be weary in well-doing, for in due season we shall reap if we faint not. O Thou who art the light of the world, cause Thy face to shine upon us and help us so to live day by day that whatever of good we have received from Thee may in turn be passed on to others and come to new focus of character and usefulness. Amen."
