REPUBLICANS TO SUBMIT PROGRAM

Three Topics Listed Thus Far by House Minority Leader Martin.

WASHINGTON, Aug. 8.—(AP)—House republicans aimed today to have a definite program on at least three major topics—housing, agriculture and reciprocal trade agreements—to present at the 1940 session of congress as alternatives to administration measures.

Minority Leader Martin (R., Mass.), probably will appoint special committees in the near future to study each of the subjects and to draft legislation. He declined to discuss the matter before leaving for home, except to say it was under consideration.

The housing question was among those selected for study, it was understood, because most members regard it as certain to be revived by the administration next year. Some senators expressed the opinion, however, its companion bill—the lending measure which the house killed—would not be reoffered if business improves.

The reciprocal trade agreements subject was on the republican list, it was said, because Martin included it in his 12-point "recovery program" announced last April. At that time, he called for creation of a special congressional committee to investigate the effect of the trade program on industry and agriculture.

Some republicans were not optimistic about the chances of any party committee working out a solution to the farm problem. One member commented:

"It's not much trouble to get a plan, but getting one that will work and on which the various farm groups will agree is something else again."

Rayburn Disputes Martin

Rep. Rayburn of Texas, the democratic floor leader in the house, took issue in a radio speech last night with a statement by Martin that the republicans had accomplished 14 points during the session just ended.

"The republicans have offered no substitute program," Rayburn said, "except to advocate a return to the old economic order of giving special privileges to the favored few at the expense of the under-privileged many.

"They have not sought to repeal the permanent and monumental acts by which the Roosevelt administration will be judged in time to come."
