### Today's Pattern

4397  
SLENDERIZING, ALL-DAY STYLE  
PATTERN 4397

by Anne Adams

Business-like style... slenderizing lines... and youthful buoyant touches, are all combined by Anne Adams in this perfect pattern, style, Pattern 4397. It's a shirt-waister type, with a very convenient-to-the-waist opening for quick donning. Double panels at both front and back give slim skirt lines; gathers below the yokes hold in the softness of the bodice. Let the sleeves be long, short and loose, or truly cuffed. The scalloped edges of the bodice opening and collar give this simple dress its light-hearted touch. Wouldn't contrasting collar and cuffs look refreshing? Use the Sewing Instructor for all the short-cuts.

Pattern 4397 is available in misses' and women's sizes 16, 18, 20, 24, 26, 28, 30, 32, 34 and 36. Size 36 takes 4 yards 39 inch fabric.

Send FIFTEEN CENTS (15c) in advance for this Anne Adams pattern. Write plainly SIZE, NAME, ADDRESS and STYLE NUMBER.

few more members we could have another delegate at the state convention, said Umpqua unit president, Mrs. M. R. Richards. Mrs. Richards urges a large attendance at the last meeting of the year to be held next Tuesday night at the army at eight o'clock. At this meeting officers will be elected for the ensuing year, the navy plate will be given, delegates will be elected and all the last minute business will be attended to. Mrs. Richards stated. Reports on the poppy sale have been very favorable. Mrs. Harris Ellsworth, chairman, stated, and these final reports will also be given at the Tuesday meeting. Roy Bellows has donated the use of his main street room for a rummage sale Saturday.

Roseburg Legion and auxiliary activities have been highlighted this week with the visits of National Vice Commander H. Elwyn Davis, his honor guard "Bill" Brown, the singing "boy" of Portland, Department Adjutant Carl Mosher of Salem and Department Commander Neil Allen of Grants Pass. Commander Allen accompanied Vice Commander Davis on Tuesday and returned to give the principal address at the Memorial services Thursday. Speaking for the legion and its auxiliary, the auxiliary president, Mr. Brown, department chairman of subversive activity control, stated that there is no greater danger today from this source than five years ago. Persons in high places, he emphasized, have become more cognizant but there is no reason to become alarmed. No arms, he declared, can come and take over here if the program for control outlined by the state Legion heads is adopted. Under this program local suspects would be reported to a central office. Already established agencies of government would investigate and report to the central office. All firearms would be registered, he explained. Neil Allen, in his address Thursday spoke of this same plan, which he has sponsored, but warned that we must guard against gossip and malicious slander.

National Vice Commander Davis complimented the auxiliary on its work in child welfare and remarked that while the Legion takes the credit he was not at all certain that the auxiliary was not at least as good as the Legion. "No city can be secure against any such attack ships may at any time be placed directly over it, and descending, may discharge soldiers. The same would happen to private houses and ships of the sea."

The priest prayed that "God will not suffer such an invention to take effect," but more than a century later Napoleon was putting it into effect in the French revolution. He was the first to use the

air arm in war.

"The French army in 1794 had a 'Brigade commander in charge of aerostatics.' He 'spotted' for the French artillery at the battle of Fleurus in Belgium on June 26, 1794, was a decisive factor in bringing French victory with his flag signals."

That success inspired Napoleon. He planned the first invasion of Britain by air with a huge balloon carrying at least 1000 soldiers, and ample supplies. The Germans planned the same thing at about the same time, visualizing fleets of balloons dropping white airdrops and a projectile "against which no nation would have adequate defense."

Other nations considered the air arm. The Austrians are said to have hunched voice with balloons "torpedoes" in 1849 when they couldn't get their guns up close enough. Balloons were used in Egypt at the battle of the Nile, 1798, and at bloody Solferino, 1859.

Adoration, divine, eloquence, faith, happiness, harmony, heaven, honor, hope, innocency, joy, liberty, melody, modesty, love, nobility, purity, tender, sympathy and virtue have been picked as the 29 most beautiful words in the English language.

## Aerial War Seen By Priest in 1670

By PAUL FRIGGENS

NEA Service Staff Correspondent

Just 270 years before Hitler's parachute troops struck terror to Europe, an Italian Jesuit priest in his cell at Ferrara foresaw airplanes would decide world war No. 2.

The story of military aviation goes back that far, even farther. For centuries man has planned to win wars in the air.

The priest, Francesco Lana, had a plan, too. He was first to propose the vacuum balloon, but after he conceived it, the possibilities frightened him. So, wrote the priest in 1670, grimly prophetic: "No city can be secure against any such attack ships may at any time be placed directly over it, and descending, may discharge soldiers. The same would happen to private houses and ships of the sea."

The priest prayed that "God will not suffer such an invention to take effect," but more than a century later Napoleon was putting it into effect in the French revolution. He was the first to use the

air arm in war.

## KING OF FREIGHT ENGINES

OAKLAND, Calif., (AP)—The world's most powerful freight engine has just gone through exhaustive tests under expert eyes. It pulled 84 cars through mountain passes and ran from Salt Lake City to the Pacific coast without refueling.

The monster is powered by diesel engines and has 32 driving wheels. Railroad men say it will be economical only on certain runs requiring sustained speed up to 75 miles an hour.
