

Indians, Gobblers Win at Softball

By EVERETT CROUCH

Hub's Indians, decked out in their new uniforms, dropped Boncock's Butchers from out of the undefeated ranks when they edged the opening game last night, 10 to 7, in the City Softball League. In the nightcap, the Oakland Gobblers swarmed over the Soldiers, 11 to 6, for an easy win.

The first game was anybody's contest right up to the final inning. The Indians staged a seventh-inning uprising good for four runs and the contest. The Butchers led going into the sixth, 7 to 4, but the Indians pushed across two markers and paved the way for their big blast. Bart's home run contributed to the victory.

Oakland's big third-inning rally, good for seven runs, was enough to clinch the game for the victors, who added four more markers in later innings to make certain of the win. Despite the defeat, the Guardians played better ball than they have in past games.

Tonight's games feature the Tied Business Men against the topflight Dunham nine in the opener and Sutherland vs. Hancock in the second contest.

Scores:

R-H-E

Hub's 031 002 4-10 10 4

Boncock's 124 000 0-7 9 6

cobs, Reeves and Roberts.

American Flag Sales Beginning to Increase

PHILADELPHIA, June 14.—(AP)—Increased sales of American flags during the past month were announced by manufacturers today as the nation observed the 163rd anniversary of the making here of the first "Stars and Stripes."

There is a "renewed patriotic spirit" said one manufacturer.

"People are becoming more flag conscious," commented another. "Our sales to individuals have increased considerably since President Roosevelt's national defense speech."

"Many of our sales are to newly naturalized citizens and persons of German descent who want to show their patriotism."

ODDITIES

(By the Associated Press)

Surprise

SALT LAKE CITY—Howard H. Bush found a baby in a basket on his doorstep. He called police.

Then he walked G. F. Bush of Grand Island, Neb., to make brother Howard a surprise visit.

G. F. said he had placed his seven-week-old son on the doorstep, then hid nearby just to observe his brother's consternation.

Nostalgic Council

LINCOLN, Neb.—What has happened to the barefoot boy of yesterday?

The city council has offered \$5 to the catcher of a 12-pound catfish in a lake here. A councilman explained "we must do everything we can for the kids. This will encourage them."

Here From Medford—George W. Hunt of Hunt Theaters, Inc., and Mrs. Hunt, of Medford, have arrived here for a three-day stay to attend to business and visit friends.

Nazis March Into Paris, Attack Maginot Forts

(Continued from page 1)

"complete collapse" of the French all along the 200-mile western front.

France's high command, however, insisted the French retreat was being carried out "in the greatest order."

Adolf Hitler ordered all Germany beflagged for three days and all church bells throughout the reich to ring for 15 minutes today in celebration of the victory.

France Pleads for Aid

Meantime, sorely pressed France turned to the United States and democracies the world over with pleas for material support and "clouds of warplanes" to match the aerial spearheads of the deep Nazi drives on Paris.

Premier Paul Reynaud in a late night speech to his people said France is "losing this battle" but suggested broadly that France's is the common battlefield of the democracies.

At the emergency capital in Tours, Reynaud spoke of the generosity of America in providing help when asked but implied that delivery of planes and materials already promised by President Roosevelt must be speeded if France is to be saved.

He told his people he had made a "new and last" appeal to President Roosevelt and added:

"It is necessary that clouds of warplanes come from across the Atlantic to crush the evil power that has descended over Europe."

To Reynaud's challenge to quicker delivery of urgently needed planes, the white house responded that "everything is being done that possibly can be done."

Reynaud asked everything in the way of war support and then challenged:

"Will they (Americans) hesitate yet to declare themselves against Nazi Germany?"

Britain Continues Help

Britain responded immediately with a pledge to "give the utmost aid in her power" and made good on word by drawing men and arms from the island's home defenses to hurl them back onto the continent from which they have been driven twice—from Norway and from Flanders.

Adolf Hitler declared the Norwegian campaign finished with the withdrawal of the last allied troops from the vicinity of wrecked Narvik in the Arctic and said German destruction of 144 enemy war vessels and transports made one of the brightest pages of German military history.

Italy Claims Successes

Italy, meanwhile, reported its first land action, a successful defense against a French attack on Calabria hill, 35 miles northwest of Turin on the Alpine frontier, and claimed to have scored hits on two enemy submarines in the Mediterranean.

The fascist high command also claimed the capture of a number of English officers in repelling an attack in Italian North Africa; defeat of a tank-supported allied attack on the Egyptian-Libyan frontier; and successful aerial operations over southeastern France, Tunisia and on the Red sea.

Madrid announced that Spanish troops have occupied the international zone of Tangier in the name of the sultan of Morocco "to safeguard the independence and neutrality of the city" which lies opposite the British stronghold of Gibraltar, guardian rock of the Mediterranean.

It was not immediately apparent whether this action heralded the entrance of Spain into the fast-

widening European conflict.

LONDON, June 14.—(AP)—The air ministry announced tonight that the royal air force lost five planes in attacking German bridgeheads of the Seine and that another plane was lost in heavy night bombing attacks on German communication lines from Rouen to the Maginot line.

NEW POTATOES—California whites 50c; 120c; 100c; \$2.15-2.25.

POTATOES—Yakima Gems: Deschutes \$2.25; Klamath Falls \$2.25 cwt; local whites 90c box; do sacks: central; Main \$2.25 cwt; southern yams, \$2.40-2.50 cwt.

Hay, wool, mohair, hides, casaca, hops unchanged.

WOOL

BOSTON, June 14.—(AP)—The Commercial Bulletin will say of the wool market tomorrow:

"There has been a considerable volume of wool sold here and an even larger one in the west this week, in consequence of the announcement last week of the government program of buying military fabrics. It is estimated that about 25 per cent of this business in the west has been due to actual orders in hand or in sight and the balance for business expected to follow for military and civilian uses."

The piecegoods market has been more responsive to the situation this week, especially in women's wear lines, although not so much in men's wear, where the volume comes.

"Medium wools in the bright wool states have been very strong and are now selling readily at 34-35 cents to the grower for good Ohio, Michigan and Missouri types with the lighter shrinking Kentucky and Virginia wools two cents higher. The finer wools in the far west also are selling mostly in the range of 80 to 85 cents for average to good fine and half-blood clips and occasionally 2 to 3 cents more for choice wools."

"Foreign wools are not very active."

"Mohair is very dull but hardly changed in price."

Handicaps On Seed

Turned to Profits

Seeds and tourists are two crops that reside well to Oregon's cool summers, said E. R. Jackman, extension agronomist at O.S.C., in discussing the growth of the seed industry in this state.

"The cool days and cooler nights in Oregon, while not good for some crops, are ideal for seed production," said Jackman. "They make the seed crop slowly and give it a plumpness and weight unknown in the middle west."

"The dry summers, also a disadvantage in some respects, are just right for seed crops as rain at harvest time is the greatest single danger to seed so far as appearance is concerned. Sunny harvest weather here gives our seed the brightness and luster so prized by buyers. Boys are still marrying the girls that look good to them and people buy seed the same way."

Jackman added that Oregon farmers, who now devote well over a quarter million acres to seed production, have turned several handicaps to advantages in the seed business. Added to the two climatic factors mentioned is the great distance from market the Oregon growers must face. Seed is perhaps the best farm crop when it comes to being able to withstand high freight rates.

Oregon's highly varied climate has also been put to use as a means of producing a wide range of seed. Nearly every kind of seed likes a little different growing conditions, and all can be satisfied in Oregon, from coast conditions for bent grass to the Columbia basin for crooked wheat and other dry land grasses.

"With the help of experiment stations, by trial and error and their own willingness to gamble, Oregon farmers have learned how to grow and harvest these many seed crops," said Jackman. "Dealers have aided by installing thousands of dollars worth of cleaning machinery, and the entire industry has advertised their superior products to build markets."

Hitler's Record Cited by Roosevelt in Talk

(Continued from page 1)

their assistance against the German foe.

Cheynd said in a speech yesterday that he needed "clouds" of airplanes from across the Atlantic.

If any such request has been forwarded, President Roosevelt asserted, it has not been received.

New Defense Moves

Mr. Roosevelt announced two additional steps to bolster the nation's defenses.

The signing of an army appropriation bill carrying about \$1,450,000,000 for expansion of army personnel and fighting equipment.

The formation of a national defense

Now-Make Bread with MACA

NEW FORM OF FAST, GRANULAR YEAST

ATREAT for the whole family—fresh, fragrant, homemade bread or rolls! And now it's more convenient than ever before because of the new and different type of yeast called MACA. It's fast, yet it is a dry granular yeast and it keeps on your pantry shelf—without refrigeration.

Just follow any favorite straight dough method and you should have successful results.

It's easy to make light, fluffy rolls and bread with MACA. You don't have to bother with setting sponge hours before baking with this yeast.

Home economists, domestic science teachers and housewives who have tried MACA are truly delighted with it. It gives them two advantages for the first time in combina-

Handicaps On Seed Turned to Profits

Seeds and tourists are two crops that reside well to Oregon's cool summers, said E. R. Jackman, extension agronomist at O.S.C., in discussing the growth of the seed industry in this state.

"The cool days and cooler nights in Oregon, while not good for some crops, are ideal for seed production," said Jackman. "They make the seed crop slowly and give it a plumpness and weight unknown in the middle west."

"Dealers have aided by installing thousands of dollars worth of cleaning machinery, and the entire industry has advertised their superior products to build markets."

Senator Adams (D., Colo.) succeeded in attaching the proposal to the relief bill already passed by the house after a brief explanation.

This automatically increased the total of the bill to \$1,123,000,000.

Under terms of the Adams provision the war relief funds must be spent in the United States to buy agricultural, medical and other supplies for refugees of war torn Europe.

War Aid Fund Boosted

The senate unanimously voted yesterday a \$50,000,000 war relief fund requested by President Roosevelt.

Senator Adams (D., Colo.) succeeded in attaching the proposal to the relief bill already passed by the house after a brief explanation.

This automatically increased the total of the bill to \$1,123,000,000.

Under terms of the Adams provision the war relief funds must be spent in the United States to buy agricultural, medical and other supplies for refugees of war torn Europe.

Britain Puts Everything in Effort to Win War

(Continued from page 1)

effort now, these British sources declared.

French Steel Plants Lost

This is partly the result of the loss of allied resources because of the widening Nazi hold on France. From 75 to 80 per cent of France's steel producing plants now are in German hands, these sources said, and the same is true of many factories producing war material.

But, they added, fortunately for the allies, most of the French factories producing ammunition are in the north.

A Reuters (British news agency) dispatch from Paris today said big French armaments factories in the suburbs of Paris were blown up before the Germans entered the French capital.

Paris was almost a deserted city, the dispatch said. The French who remained while most of the population fled stayed in their homes or sat in their shops with the shutters down.

All buildings and bridges, it said, were left intact.

Sutherland Postmaster Found Slashed to Death

(Continued from page 1)

found by members of the party at 4:30 a. m.

Overseas Veteran

Young, who was born at Dallas, Ore., Dec. 10, 1899, had lived in Sutherland for the past seven years, serving as postmaster for the last four. He was a world war veteran, serving as a private in the first

fense research committee headed by Dr. Vannevar Bush, head of the Carnegie Institution, and of the national advisory committee for aeronautics.

The board, the president said, will have seven additional members but their names are not yet ready for announcement.

Army and navy officers will be assigned to it and the organization will look into research and experimentation which might be helpful in accelerating the huge defense program.

Authority for recasting the projected fleet expansion program may be sought from congress, it was reported, because of the object lessons which have marked the naval phases of Europe's war.

President Roosevelt, a usually well-informed source disclosed, is considering requesting permission to shift legally-fixed tonnage classifications so that a larger number of smaller and lighter warships could be built than was originally contemplated.

This hint of reappraisal of navy plans gave an added fillip to steadily mounting congressional sentiment against adjourning on June 22.
