Mexico Gets U. S. Aid to Boost Army
MEXICO CITY, June 20.—(AP)—A high source declared today President Lazaro Cardenas had approved a program which would more than quadruple Mexico's armed forces with the aid of the United States.
This source asserted that within a few weeks a credit of more than \$10,000,000 from the United States would be made available to the Mexican government to carry out this expansion under 60 technical experts from the United States army and navy.
Additional millions would be allocated later by the Mexican finance ministry, it was reported.
(The United States government was said to be determined that Mexico should not be used as an avenue of invasion by any aggressor power, and it was understood the American credits would be made available on generous terms.
The American determination was said to have been communicated to President Cardenas before Tuesday's cabinet session, at which universal military training and "other defense measures" were approved for submission next month to an extraordinary session of congress.
This defense program was reported on high authority to include: Increase of the standing army to more than 300,000. The Mexican army now counts 112,000 men, including those on reserve lists. Increase of the officer corps by approximately 10,000, of whom 1,000 would be sent to American army centers for special training. Acquisition of six destroyers from the United States to strengthen the Mexican navy. Establishment of air bases at strategic points around Puerto Mexico, Acapulco, Tampico, Salina Cruz, Vera Cruz, and Quintana Roo. Improvement of port facilities at Vera Cruz, Puerto Mexico and Salina Cruz—including deepening of channels, new wharves and repair and supply facilities.
The emerald is the most precious of all stones. They may be even more valuable than diamonds, but they must be flawless to attain such value, and only a few emeralds can be classed as such.
