Freak Turkey at Show Has Two Breast Bones

A peculiar malformation which gave a turkey a double breast received much comment when the freak bird was displayed in the

Veteran Turkey Grower

News-Review Photo and Engraving
"I started about 20 years ago raising turkeys when they were 'just turkeys,'" related W. H. Brown of Dixonville, pictured above with some of his entries in the Northwestern Turkey show. "I used to raise White Hollands because they were easier to find in the brush." Mr. Brown now raises bronze turkeys and has six birds on exhibit at Oakland. He produces about 300 turkeys each year.

Strong's Win Breeder's Display

News-Review Photo and Engraving
The handsome cup which Queen Joyce is shown presenting to Mr. and Mrs. Earl F. Strong of Oakland was the first prize for their display of six Narragansett turkeys, which won the Master Breeder's display, one of the most coveted honors of the Northwestern Turkey show.

News-Review Photo and Engraving
Earl F. Strong, Oakland, pictured above, has served as president of the Northwestern Turkey Breeders association for the past nine years and was elected last week to his tenth term as head of the organization which sponsors the annual show.

No Wonder He's Always Alone...

Such wrinkled, soiled clothes! Even the crows stay away. Yet many men present no better appearance—and wonder why they don't get ahead in social and business contacts! Don't take the risk of looking careless as a scarecrow—send your clothes to us for FREQUENT cleaning. Telephone 472.

Grand Champ Of Dressed Turkeys Labeled 'Perfect'

The grand champion turkey of the dressed show division at the Northwestern Turkey show was one of the most highly praised birds ever seen at Oakland, where the finest turkeys to be found in the world are shown each year.

"Undoubtedly there has never been a turkey exhibited to the public that was such a perfect specimen as this bird shown by George Bonebrake of Dixonville," M. H. Shook of Roseburg, principal judge in the dressed division, declared.

"This young tom," Mr. Shook said, "was perfectly proportioned. The fat was evenly distributed instead of being found in spots as is so often the case with toms. The bird was unusually broad of breast and back, and was well fleshed throughout."

"There is no question in my mind," he said, "that it was the finest bird ever shown anywhere and anytime."

"Actually, the hams of that bird were so big," asserted E. B. McNaughton, Portland banker, speaking at the turkey show banquet, and with only slight exaggeration, that you could have cut round steaks for a whole family out of only one of them."
