## Spanish Minister Cites Friendship With Germany

MADRID, March 12.—(AP)—Foreign Minister Sener said today no one should doubt "the unshakable firmness" of Spain's "friendship with Germany." The two countries, he declared, are struggling for a single cause—a new Europe.

Serrano Sener spoke at the opening of a German press exposition.

The struggle of Germany and Spain is for a common goal of a "more just Europe," he said, one which would achieve "a geographical and moral fullness."

The countries of Europe, he continued, "closed ranks of friendship and hostility" when the Spanish civil war was fought. Since then, he said, there has been no doubt where Spain stands and no doubt which countries are her friends.

# Eight Balls of Fire

and how they can travel!

If you like fireworks, and who doesn't, it's really too bad you can't see what goes on inside that sparkling big Buick FIREBALL eight that romps you so easily down the broad highway.

There you'd see eight busy cylinders, with pistons flashing up and down...

You'd see each fuel charge packed tightly into a tiny bundle shaped like a flattened ball...

You'd see the spark leap, the flame spread, the piston thrust down with extra force as each furious fireball lets go its pent-up wallop.

You'd see all this happening as fast as thirty times a second in each of those eight cylinders—and we think you'd understand then just why there's such a special and exciting satisfaction in the way a Buick travels.

Gasoline gives up more of its power when it's packed as tightly as it is here.

So when you've got these eight balls of fire working busily under the bonnet, you really travel!

That special, flattened-ball shape of the compressed fuel charge means smoother, better burning, full focus of the power on the piston head, where it counts.

You travel farther on every gallon and you travel more pleasurably.

You travel—but, shucks! Why listen to talk when there's a Buick dealer nearby waiting to show you how you travel behind a FIREBALL?
