

Ambulance Corps Drive Given Good Douglas Response

The Douglas county committee of "bundles for Britain" has received widespread response and support in their appeal to obtain funds to supply American ambulances fully equipped to the British people, to help in the relief work in the stricken bomb areas. May Moore, secretary, reports today.

At the committee meeting held Tuesday evening a check was forwarded to the Portland branch of the British American ambulance corps, for \$100, the amount of funds so far collected.

The work has been encouraging and will continue with the added support of local organizations throughout the county. Some of the granges wish to convey their thanks to all supporters and especially wish to thank the Riversdale grange for donations and for the proceeds of the card party given to benefit the B. A. C., the secretary states.

Those wishing to contact the committee may get in touch with the secretary, Mrs. Mary Moore, care station KRNR, or the following on her committee: Rev. Perry Smith of the Episcopal church, Roseburg; Francis Lintott, at Parslow's Furniture store; Henry Easton at Easton's Grocery store. Others on the committee in different districts throughout the county include: F. G. Ewens and W. Commons, Garden valley; Martin Lloyd and Jack Culver at Sutherlin, Fern Moore, Glide, and Miss Margaret McGee at Drain.

The committee wishes others to represent this work in districts not mentioned.

Those interested in the "bundles for Britain" work are asked to leave donations of clothing at Easton's grocery.

Pork Demand Ups Feeding of Wheat

With hogs at their highest market level for several years and prospects of continued demand for pork, Oregon producers have an opportunity to convert low-priced wheat into high priced meat, judging from the results obtained in surplus wheat feeding experiments at the Oregon experiment station.

Wheat has been fed to hogs in direct comparison with corn and other feed grains at the station and has been found just as valuable pound for pound. In one test the average amount of feed required for 100 pounds gain was 369 pounds of corn, and 364 pounds of wheat. Furthermore, it was found that wheat-fed hogs had firmer carcasses than corn-fed hogs shipped in from the corn belt, which confirms the oft-repeated opinion of Portland meat packers that western wheat-fattened hogs excel in this respect.

The tests carried on recently bear out previous experiments to the effect that the feeding values of ground wheat and ground corn are equal so far as average gains with hogs are concerned, and that western buyers at least prefer the wheat-fattened animals, say O. S. C. livestock men.

LONDON... In the Spring... of 1941

This is the heart of London today... looking northwest from the dome of famed St. Paul's cathedral toward Old Bailey tower. Buildings that once stood in the open spaces have been demolished because, weakened by blasts of German bombs, they would menace public safety if left standing. Shells of buildings nearby are soon to be wrecked. This exclusive and historic photo has just reached the United States.

March Weather Here Showed No Fresh Extremes

Weather for the month of March was far above the normal in average daily temperature, although no new extremes in any department were recorded, according to J. C. McCallister, in charge of the local office of the U. S. weather bureau, who has compiled the summary of weather statistics for the past month.

The average daily temperature was 5.5 degrees above the normal, while the highest temperature was 76 degrees and the lowest reading was 29 degrees, as compared with record extremes of 85 and 18 degrees. Since the first of January the temperature records show daily temperatures to be 4.8 degrees above the normal mark.

March also was below normal in rainfall, total precipitation being only 1.08 inches as compared with a normal of 3.28 inches. This light rainfall, however, set no new record, as there have been several years in which the month of March brought less than an inch of rain. The least rainfall was in March, 1926, when records show only .06 of an inch of precipitation.

There were 9 clear days, 7 partly cloudy and 11 with measurable precipitation.

The rainfall deficiency of 2.20 inches for March brought the total deficiency since Sept. 1, 1940, to 3.56 inches, and the deficiency since Jan. 1, 1941, to 5.79 inches.

One unusual feature of the weather of the past month was a severe electrical storm on the 29th. It is seldom that thunderstorms occur so early in the season.

Raider Chief

In command of German surface raiders now operating in the Atlantic is Admiral H. Luetjens, according to announcement by German high command.

Chubs in Oregon Lake Eradicated With Poison

BEND, April 3.—(AP)—Tons of trash fish, principally chubs, floated to the surface Monday following the poisoning of South Twin lake, Charles A. Lockwood said today.

The 60-acre lake in the upper Deschutes basin was cleaned out with debris, root compound spread in marginal waters and scattered with depth bombs. Lockwood, game department official in charge, reported. He termed the experiment highly successful.

South Twin, which has no outlet, will remain toxic for about a week. Restocking with large trout fingerlings is planned for 1942.

The suffocating root is harmless to humans.

Chubs were introduced to the lake by bait fishermen, Lockwood said, and multiplied rapidly, soon devouring all natural foods and virtually exterminating the trout.

The experiment was watched by state and federal game officials, who said the same methods might be used in other lakes.

Movies Will Be Shown at Canyonville Bible School

CANYONVILLE, Ore., April 3.—A public showing of educational motion pictures, with sound, will be presented by the Canyonville Bible academy at 7:45 p. m., Saturday, April 5. The films, supplied by E. A. Britton, county 4-H club agent, and the Castle Film company, will include, "The Story of Aviation," "Citrus on Parade," "Weather by Carrier," "Popular Sculpture," "Views of Douglas County," and "Plows, Planes and Peas."

The program is to be open to

Stolen Marshfield Car Found Wrecked at Elkton

land, were here on business Sunday.

L. E. Newton has been suffering from a carbuncle on his ankle but is able to be about once more. Mrs. Susie Burnett and Mrs. Barbara Hopkins were dinner guests of Mr. and Mrs. Kenneth Hopkins Wednesday evening.

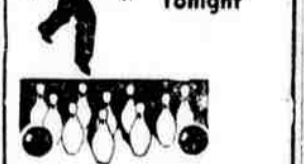

During the year 1908, 65,000 automobiles were manufactured in the United States. Today it takes manufacturers about five days to turn out that number.

It is estimated by traffic authorities that on every school day 84,000 school buses transport 3,388,645 school children to 36,266 schools in the United States.

ELKTON, Ore., April 3.—A car reportedly stolen Wednesday night of last week, from Henry L. Beckley, Marshfield, was recovered Friday when it was found abandoned near Beckley's former home in Elkton. The car had been wrecked and was abandoned in a ditch three miles west of Elkton.

Friends presumed Mr. Beckley had suffered an accident on his way to visit his mother at Elkton, and it was not until inquiries were made of her concerning the wreck that it was learned the car had been stolen. The machine was quite badly damaged.
