

**Clatsop County Towns
Reject PUD Proposal**

ASTORIA, May 7.—(AP)—Rural Clatsop county favored a

people's utility district, but all towns voted themselves out, in a close election last night. Complete unofficial returns from 37 to 39 precincts showed 2643 votes for and 2947 against.

The areas outside of incorporated cities, however, approved the project by 161 votes. Astoria rejected the proposal, 1756 to 1573, as did Seaside, Hammond, Warrenton and Gearhart. The PUD could be organized in rural areas only, if the state hydroelectric commission pronounces it practical.

**"Mixer" Bill Aim
Told by Official
On Visit Here**

The state liquor commission is making an effort to utilize the "mixer" bill, passed by the last legislature, to bring the drinking of spirituous liquors out of hidden places. Robert O. Boyd, liquor commission counsel, reported here Wednesday.

The bill provides that setups may be served in hotels and restaurants holding a special type of license. An effort is being made to eliminate clubs and other places where patrons are furnished with setups for alcoholic drinks and to provide the special serving license in places where better control may be exercised, Mr. Boyd said.

He reported that Roseburg is one of the most cooperative cities in Oregon in the control of drinking and complimented the local license holders on their efforts to control problems.

Mr. Boyd is accompanied on a tour of the state by Clyde A. Warren, supervisor of law enforcement for the state commission.

Food Prices and Profits

A Statement of Safeway Policy

THE forces of market disturbance, fear, and speculation, are at work. Prices for some basic commodities have already gone up. Increases in Safeway's retail prices on these items reflect the rise in wholesale cost, over which Safeway has no control.

It is a fundamental Safeway policy to earn only a small profit on each sale. Safeway pledges that during the period of war emergency it will not change this policy; and that in the future, as heretofore, it will make every effort through improved methods to reduce distribution cost—the difference between what the farmer gets and the consumer pays. You will always be able to buy from Safeway at the lowest prices available anywhere.

Consumers may assist materially in preventing unwarranted price increases by continuing their purchases on a normal scale. There are adequate supplies of food stuffs for every American. Hysterical buying which strips retail and wholesale stocks creates artificial scarcity, which pushes prices to abnormal levels.

Machinery exists within the government to control production, storage and release of commodities, imports, exports, quotas and prices—if it should become necessary to employ these methods to protect the economic welfare of the country.

Safeway further pledges complete cooperation with the governmental agencies and with farmer producers in all efforts to stabilize prices; discourage profiteering; and maintain orderly facilities for food distribution.
