Using the navy to guard war shipments to Britain, the former president said, would lead to a "dictatorship of our own, inevitable in total war" and to "post-war bankruptcy."

In this sentence he summed up his convictions: "That there be no misunderstanding, let me state at the outset that I support provision of the maximum tools of war to Britain; that I am convinced we can give this maximum during her next critical months only if we keep out of this war; that putting our navy into action is joining this war; that the whole European war situation is in transformation; that America is yet unprepared even for adequate defense; that our people are not united."

The walkout involves defense contract estimated by the workers at \$500,000,000. Green said it violated a union-management agreement prohibiting either strikes or walkouts. The strikers want \$1.15 an hour instead of \$1.12 plus continuance of double pay for overtime. Union leaders

**Out of petroleum — CHICKENS**

VITAMIN E is being added to commercial poultry feeds to make hens lay better and increase the "hatchability" of eggs.

Scientists at the "University of Petroleum," Shell's \$3,500,000 research laboratories, observed some peculiar crystals in a new product they had made from petroleum... crystals that proved valuable in the artificial creation of Vitamin E—essential to animal fertility!

Also in petroleum, Shell scientists have found a key to synthetic rubber—glycerine—fertilizers—plastics—scores of needed things. These are by-products of their main assignment: finer Shell Gasoline.
