Too Good To Miss

AT least three hundred persons in the city of Roseburg are missing an opportunity of making themselves some additional money, and at the same time of benefiting their home community. That many, or more, peo-ple engaged in retail and service business who meet tourists and strangers, should be attending the Tourist Information School series of weekly classes. These meetings, sponsored jointly by the Roseburg chamber of commerce and the state department of vocational education are furnishing a vast amount of valuable information and it costs almost nothing.

The reason we say so flatly that so many people are missing an opportunity for personal profit is simply this-proper greet-ing plus the ability to provide wanted information about our area will result in tourists spending more time here. That means additional community income. When more business comes in, we will all benefit-directly or indirectly.

There is plenty of room at

these information class meetings for those who should be there but are not. Four more class nights are scheduled.

May 20 the topic will be the recreational possibilities and attractions of the Umpqua National Forest together with a forest This portion of the program will be under the direction of V. V. Harpham, forest supervisor. He will be followed by a talk on what, where and how of fishing. The class will conclude with picture records of county scenes

May 27, the state game super visor, Frank Wire, and three other authorities on fish and game resources will speak. The meeting, as is true with all of them, will be opened to questions from the class members.

June 3, Ray Treasher, field geologist and mineral and mining expert, will discuss mining and mineral resources and development possibilities of this county. That same evening the class will hear the story of the lower Umpqua, a sidelight discussion of the experiences of a specimen collector and the inside story of one of the largest quicksilver mines in the world.

of state will present diplomas following a presentation of Douglas history illustrated with colored photo slides,

That is a rich and valuable menu of information and instruction. It is not too late, they say, for enrollment in the course.

When Philosophers Rule

A PLAINTIVE little letter to the editor the other day showed pitilessly the futility of a certain type of mind which still. in these hard and realistic days, lives in an ivory-towered Never-Never land. Bewailing everything in general, this gentle, wellmeaning soul pleads. "I have often thought it would be better if the world's governments were headed by philosophers rather

than by log-rolling politicians." ple have had the same thought, including Plato, 2300 years ago.

But governments aren't head ed by philosophers as a general thing. It's like disarmament, it's great if they all do it at once.

Audience Here Taken on Verbal World Journey

'Amazing America' Film Also Shown by Scott; Ellsworth

Speaks on Industrial Growth

A capacity audience at the Roseburg armory last night heard Commander A. W. Scott give a most interesting lecture on the unreal realities of foreign lands and then tell of western hemis-phere sights which equal or surpass anything to be found in other parts of the world. The world traveler, author and radio star urged his audience to "See Amer ca First," after he had taken his listeners on a verbal trip around the world.

The brief lecture was followed by the presentation of a colored sound picture, "This Amazing America." The lecture and picture were sponsored by the Grey-hound Stage lines.

Following the public program, Commander Scott spoke to the group attending the weekly classes of the chamber of com-merce Tourist Information school. He pointed out that few people

residing in a community are fully informed regarding the points which would be of interest to tourists. He urged that people of Roseburg become so thoroughly acquainted with the Umpqua valley that they can intelligently answer questions of tourists. He also urged that a greater interest be taken in greeting people pass-ing through the community and that they be told of some of the interesting things to be seen. Industrial Growth Foreseen

The members of the class heard Harris Ellsworth, chairman of the industries committee of the Roschurg chamber of commerce predict great industrial expansion in the Umpqua valley during the next few years. He particularly emphasized the lumber situation, pointing out that Douglas county has one-sixth of all the standing Douglas fir timber in the United
