"YOU CAN'T TELL THE PLAYERS WITHOUT A SCORECARD!"

The cry goes out to the millions in the nation's grandstands. Actually it is echoing a simple but fundamental principle of modern advertising.

Advertising is the scorecard for intelligent shoppers. It does more than identify a product, however. It tells where this product is available, and at what price. About thousands of products, thousands of necessities and conveniences, it gives accurate information instantly—information that one individual could not secure, even after the most painstaking and wearying search.

You can't tell the values without reading the advertisements in this newspaper!
