Plans were made for a day-time picnic and meeting to be held on Little river on August 28.

POET'S CORNER

THE FORTY-FIRST DIVISION
Stalwart, proud and manly,
Erect and clear of eye,
Ready for a fight or frolic,
Ready to do or die.

Men of a fine division,
Soldiers of today,
Sons of proud Americans,
Sons of the U. S. A.

It isn't the clank of sabers
Or the tramp of your marching
feet,
But your pleasant smile and your
carefree style
As we meet you on the street.

That makes you love the army,
Look on you with pride,
And we pray as you go about
your daily tasks
That God walks by your side.
Signed: United Spanish War
Veterans.

Deferment of Men 28 Or Over Voted

WASHINGTON, Aug. 6.—(AP)—The senate completed congressional action yesterday on legislation which would defer selective service for men 28 years old or older on last July 1 and would provide for the release from present service of those in that age group.

The chamber approved a compromise version of the measure, previously passed by both houses in different form. The legislation accepted earlier today by the house, now goes to the White House.

In its final form the bill did not contain authority to take over defense plants where an interruption of production occurred. Such a provision was originally voted by the senate but twice rejected by the house.

Under the legislation deferment would be mandatory for men who had reached 28 years of age prior to July 1 without being inducted into service and will apply to those reaching 28 by July 1 of each subsequent year without having been inducted.

Livestock, Wool Poultry Prices Far Above Parity

By FRANKLIN MULLIN

CHICAGO, Aug. 6.—(AP)—Domestic livestock, American agriculture's richest source of income, are producing at full emergency rates to meet wartime demand and are yielding farmers prices 17 to 28 per cent greater than a year ago, market statistics showed today.

Not only are milk cows and hens breaking all records for output, but prices farmers receive for their produce, once classed as a source for the farm wife's pin money, have spiraled upward. Furthermore, the value of all livestock on farms has risen sharply.

Prices of all principal livestock products are now above parity and well above the minimums the government sought to maintain when it began its lend-lease and domestic relief buying program in April. In fact, at mid-July butterfat, chickens, beef cattle, veal calves, lambs and wool were above 110 per cent of parity, the minimum ceiling provided under price control legislation now pending.

Administration economists define parity as a price level which would give farm products a purchasing power in terms of non-farm products and services equivalent to that of a base period, set at 1909-1914. Income May Set High. This steep rise in output and prices is expected to contribute much more than half of agriculture's 1941 income, which some market experts believe may top that of 1929. The rise reflects farmers' early response to government pleas for more hogs, dairy products, chickens and eggs, after passage of the lend-lease bill. Huge government purchases of livestock products, totaling almost 500,000,000 pounds of pork, lard, milk products and eggs since the beginning of the program, has helped to raise prices, thus directly spurring production. Rising domestic consumer purchasing power also has been a potent factor.

In addition to increased price yields from livestock products, livestock has been enhanced handsomely in value. Stock yards

experts estimated the market value of the nation's population of hogs, around 53,000,000 head at the start of the year, has been increased more than half a billion dollars since January 1. Cattle prices, although more than a dollar higher than a year ago, show the smallest gain of any major livestock item, but the value of the nation's cattle population was estimated to have increased possibly almost a billion dollars over a year ago. Sheep and lamb valuation is believed to have increased about \$50,000,000.

Ingratitude

PHILADELPHIA.—The zoo tried hard to put on a nice birthday anniversary party for Bamboo, its 435-pound gorilla whose 15 years in captivity is the longest recorded sojourn behind bars of any gorilla.

But Bamboo refused to cooperate. He wrecked a table containing a specially-made birthday cake, and instead chewed on a new straw hat. Then he threw watermelon slices at visitors.
