GLENDALE MISSIONARY SOCIETY HOLDS MEETING

GLENDALE, Aug. 28.—The Missionary society of the Presbyterian church met in the parlors of the church Friday afternoon at two o'clock. The meeting opened with a hymn and then Rev. Glaser, of the Assembly of God church, spoke. Rev. Glaser is a former missionary to Africa. He told of some of his experiences while there and showed some of the trophies, which he has and told how he came to possess them. Among them he had a lion's tooth from a lion which he had shot himself. He also had some heavy iron bracelets which the women wear. He said that he had three hundred thousand people to reach but had trained natives to help and to carry on the work. All the missionaries have been doing the same as the stations are so far apart and there are so many people to be taught. Some of the people learn very easily but others can hardly learn at all. Rev. Glaser had a good garden but the ground was poor and required lots of working. The natives admired his garden but he couldn't get them to do the required work to raise their own. They plant right in the weeds and expect it to grow.

After Rev. Glasers' talk a short business meeting was held. The women present were Mrs. J. K. Howard, Mrs. Roy Cunningham, Miss Luella Cunningham, Mrs. William Wunsch, Mrs. Charles Boice, Mrs. H. B. Y'Blood, Mrs. B. F. Mouchett, Mrs. G. H. Ashman, Mrs. R. D. Sorrells, Mrs. Lacy Sparkes, Mrs. R. B. Gardner, Mrs. M. Nye, Mrs. B. C. Huntington, Mrs. Jim Miller, Mrs. George Mill and the guest of the afternoon was Mrs. Art Paschelke of Salem.

BACKACHE, LEG PAINS MAY BE DANGER SIGN
Of Tired Kidneys

If backache and leg pains are making you miserable, don't just complain and do nothing about them. Nature may be warning you that your kidneys need attention.

The kidneys are Nature's chief way of taking excess acids and poisonous waste out of the blood. They help most people pass about 3 pints a day.

If the 15 miles of kidney tubes and filters don't work well, poisonous waste matter stays in the blood. These poisons may start nagging backaches, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness. Frequent or scanty passages with smarting and burning sometimes shows there is something wrong with your kidneys or bladder.

Don't wait! Ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from the blood. Get Doan's Pills.

3-Day Celebration Plans Completed By Eagles Lodge

Reports made by committees at the regular meeting of the local aerie of the Eagles lodge Tuesday night indicated that all details are complete for the three-day celebration at Idleyld over the Labor day week-end. The celebration will be held Aug. 30, 31 and Sept. 1, with special entertainment each day. The general public is invited to attend. The feature will be the free salmon bake at noon Labor day.

The lodge has purchased a large number of salmon, which will be barbecued and served free of charge to all in attendance at the picnic. The entertainment program will include various contests, races, horseshoe and fly-casting tournaments, etc., with dancing to Dick Firman's music each afternoon and evening.

The lodge at its business session initiated Raymond Olson into the order and installed Dan Weatherford as conductor to fill the place left by the appointment of Bill Black to the post of chaplain. Harold Bender was made steward, replacing Oscar Snook, who resigned due to removal to Drain.

Short talks were made by Wallace Rapp and Bud Gillespie, reporting on the recent national convention at Milwaukie, Wis., and announcement was made that a more complete report and showing of motion pictures will be arranged at a later meeting.

Carl Coleman and his team won the membership contest for the month of August, it was reported, and Earl McCoy, captain of the losing team, has arranged a chili feed at the regular meeting to be held Sept. 2.

Information For Recreationists

(Forest Service Bulletin)

Fishing: Streams are low and fishing is practically a thing of the past in the Bohemia district. Steelhead fishing in the North Umpqua is reported to be not too good. Likewise, fly fishing has not been especially good in recent days, but some reports have come in that bait fishing particularly with single eggs has netted some good catches in the North Umpqua river.

In the South Umpqua district streams are generally too low for satisfactory catches. Most of the fish that bite are so small that they must be returned to the streams. Lake fishing at Buckeye and Fish lakes is also reported to be below par, although undoubtedly some fish could be taken by experimenting with various kinds of lure.

The fishing at Diamond lake is reported to be fair. Usually some fish can be taken at Diamond lake at almost any time by trolling and "nigger fishing," and expert fly fishermen can usually get some results. Fly fishing for the novice would likely be disappointing.

Huckleberries: The recent hail storm in the Bohemia district practically destroyed the huckleberry crop, but the berry season is still on at Huckleberry gap and neighboring areas along the Umpqua-Rogue divide easterly from Butler butte, and the crop is said to be fair. It is reported that the huckleberry crop is light in the Diamond lake district in the vicinity of Dog prairie and Three lakes, although probably some berries could be found by people who know just where to go.

Roads: The North Umpqua road is open for travel at all times. Graveling is in progress westerly from Big Camas, and most of the sections which ordinarily have become impassable after rain storms are now surfaced sufficiently to enable travel to go over even after any ordinary rain at this season of the year. Chains are advised for the Copeland-Big Camas section if travel is undertaken immediately after a considerable amount of rainfall.

The Rock creek-Boundary section of the North Umpqua road is rough; likewise, the Copeland creek section is still in an unfinished condition, but the rough section here is less than a mile in length and the balance of the road to Diamond lake is fair. Recent rains have reduced the dust menace on all roads in the forest, so, except for roughness, travel is possible on practically all forest roads.

Fire danger: Recent light rainfall throughout the forest has temporarily reduced the fire hazard quite materially, but with a day or so of dry weather, particularly if it becomes windy, fires will again burn briskly; so all travelers, whether on foot, horseback, or by auto are urged to not smoke while traveling, except on strictly highways such as the Union creek highway to Diamond lake and other strictly two-way and surfaced roads. Smoking is permissable on the North Umpqua road as far up as the mouth of Copeland creek only. From the mouth of Copeland creek to Diamond lake, smoking while traveling is against Oregon state law and federal regulation. The Umpqua forest has an excellent record this season for no man-caused fires, either carelessly or otherwise; so, the recreating-seeking public is urgently requested to help keep our record 100 per cent.—Umpqua National Forest.
