Traffic Victims Mostly Oldsters

SEATTLE, Sept. 30.—(AP)—If you're a walking grandfather, and like a safe bet, duck for cover when you see an automobile's headlights coming.

"It's grandpa who gets killed most frequently," commented Burton W. Marsh, director of the safety and traffic engineering department of the American Automobile club, before the Western Safety conference here. He had just explained that three out of four traffic victims in large cities were pedestrians.

"Fifty per cent of the persons killed are over 50 years old. Of these, seven grandpas are killed to every three grandmothers. Grandpa is five times more likely to be killed in a traffic accident than his school-age grandson. Two out of three meet their death at night."

Marsh reported that 29 children are injured for each one killed while there are only five injury cases to each death among those over 60.

"Children," he commented "are tough."

There Can Be No Curtailment of Dodge Quality
... No Substitute for Dodge Dependability

Being Shown and Demonstrated Now
With Extreme New Economy in Gas and Oil Consumption

TUNE IN MAJOR EDWES, C. B. S., THURSDAYS, 9 TO 10 P. M. E. S. T.

The New and the Finest Dodge

EVERY MAN OR WOMAN who buys one of these new Dodges will get for his money the very finest car that Dodge has ever turned out. He will get it, of course, from a smaller total production, because the Government of the United States has first call upon Dodge factories and men. But, we repeat, every civilian buyer of Dodge motorcars will receive for his investment all of the traditional Dodge quality at higher levels of endurance, performance and economy than Dodge has ever supplied them before.

Power-Flow Engine—For All-Fluid Drive

He will get, literally, the climax value of twenty-seven years of fine car engineering. He will get the phenomenal success of Dodge All-Fluid Drive. He will get the new Power-Flow Engine, designed and adapted as the more powerful complement to the fluid smoothness of Dodge All-Fluid Drive. He will get a motorcar of lifetime lasting qualities, in which riding and driving have become almost the same thing—except that the driver gets the added joy of command.

Is This Asking Too Much?

People by the hundreds who have driven the new Dodge say almost the same thing. They say they could not, and would not, go back to the old way of driving. It is not asking too much, we believe, that you investigate these revolutionary Dodge qualities.

You should experience the ebb and flow of Dodge power, at any speed, in any traffic, with or without shifting gears as you may wish. You should measure its new economy against the old, and realize that Dodge, all by itself, has turned the corner into a new day of motorcar performance, long life, and Dependability.

Dependability—Forever the Watchword

It is unquestionably true that fewer cars will be built this coming year, according to your own defense requirements. But, above all, it is true that there can never occur any curtailment of Dodge motorcar quality—and no substitute, ever, for Dodge Dependability.

A new Dodge car is a basic investment for the years.
