Joker In Auto Use Tax

CONGRESS has the Treasury department across a barrei and all because of a little \$150,to considering the overall billions needed to run the government and finance national detense. This is the comment of Jack Festival Play To This is the comment of Jack tional capital, who goes on to SHV:

When the latest tax bill come out of Congress, one thing in it NOT recommended by the treasury was the \$5 motor vehicle use tax. Even now that it has become law, you can't get any on the record discussion of it at

the treasury department. Certain regulations concerning the tax were laid down in the law: the use of windshield stickers as certificates of payment jail sentence and fine provided for tax dodgers and principally the fact that the tax should become effective February 1, with a prorated payment until the beginning of the tax year July 1.

This little joker means that the treasury department's collectors of internal revenue will take the field February 1 to collect \$2.09 from each of the 32,000,090 private and commercial automobile owners in the country one of the neatest little problems in tax collection that the treasury ever has been faced with. 11 1 person buys a new car or a second-hand one on which the use-tax has not been paid around the first of March, he will pay 42 cents less; and so on, until purchasers of untaxed cars on June 1 will pay just 42 cents. On July 1, the collectors will have to start all over again with the 32. 000,000 and pick up \$5 from each. There have been no official announcements so far as to the

methods of collecting the tax. Under consideration is the plan of obtaining the state ownership lists and billing each owner. Since the absolute minimum of letters required by the government under such a system would be two (the bill and the mailing out of the sticker) and since it probably

would take twice that to get in
